- Languages, Frameworks & Libraries: HTML/CSS, JavaScript, Python, React, Bootstrap, Node.js, Express.js
- CMS: Shopify, WordPress, Wix, Squarespace
- Database, Cloud & Backend Technologies: MySQL, RESTful APIs, Google Cloud, AWS, CI/CD
- Tools, Version Control & DevOps: Git & GitHub, GitHub Actions, Figma, Chrome DevTools, Postman, Google Analytics 4, Jest
- Methodologies: Agile, A/B Testing
- UI/UX & Graphic Design: Figma, Canva

CERTIFICATIONS

- AWS Certified Cloud Practitioner (2025)
- Google Analytics Certification (2024)
- Canva Essentials (2024)
- JavaScript Algorithms and Data Structures, freeCodeCamp (2021)
- Responsive Web Design, freeCodeCamp (2021)

WORK EXPERIENCE

Lead Software Developer | Camara Ghana Web Development | Remote

06/21 - Present

- Led end-to-end development of custom web solutions for small businesses, including e-commerce sites, landing pages, static informational sites, using MySQL, Express, React, Node.js, Figma, HTML/CSS, Shopify, WordPress and Wix.
- Managed all phases of web development, from initial consultation and design to deployment of site, and support after launch.
- Integrated RESTful APIs (Hubtel, DPO Pay) for secure payment processing, handling 500+ daily transactions with 99.9% uptime.
- Delivered all projects on time, and within budgets, and ensuring maximum customer satisfaction. This was done through periodic meetings with clients for feedback, planning timelines, ensuring that work was delegated to team members based on roles in development, marketing and customer relations.
- Provided ongoing website maintenance and optimizations for improved performance.
- Collaborated with a team of developers to build and maintain internal tools using Python and JavaScript.
- Assisted in debugging and resolving issues with code performance and functionality.
- Participated in code reviews and gained exposure to Agile methodologies.
- Wrote unit tests using Jest to ensure code quality.

Website Developer | The Dayton Weekly News | Dayton, Ohio

03/23 – 04/25

- Redesigned and rebuilt a new website using React for front-end and MySQL, Express and Node.js for backend server and database (MERN Stack), resulting in a 78% increase in traffic to the homepage and improved responsiveness in mobile devices.
- Used modular UI components in React code to streamline updates, reduce duplication of code and enhance maintenance.
- Integrated GitHub Actions for automated deployments and version control.
- Optimized SEO by restructuring metadata and implementing schema markup, improving Google rankings and search indexing.
- Analyzed site analytics using Google Analytics to identify user behavior trends and optimize content layout for higher engagement.
- Enhanced visitor retention and increased local engagement with significant rise in traffic from Dayton, OH, through strategic content updates and design.
- Collaborated with the editorial team to create streamlined publishing workflows.
- Introduced A/B testing for homepage layouts and new features, boosting click-through rates on featured stories.
- Integrated newsletter subscription features, growing the email list by 60% through strategic sign-up placements.

PROJECTS

Elopement Tracker for Children with Autism (MERN, IoT, Google Maps API, MQTT, LoRaWAN)

- Built a real-time geofencing alert system with MySQL, Express, React, Node.js, GPS, and LoRaWAN to track children with autism.
- Used React and Google Maps API for live fence drawing, and Socket.IO & MQTT for instant alerts.
- Designed a scalable backend with Node.js and MySQL, optimizing long-range data flow.

Bilingual FAQ Chatbot (Python, Streamlit, AI, TensorFlow)

- Created a bilingual chatbot with Python; NLP and langdetect to support English and French queries.
- Achieved accuracy using a TensorFlow/Keras model with JSON-based intent handling.
- Delivered a responsive Streamlit UI for easy user interaction and FAQ access.

EDUCATION

B.Sc. Computer Engineering, Academic City University College, Ghana
