Overview

Recent Computer Science graduate with management experience and excellent organization skills seeking a software developer role.

Recent Work Experience

Hornbacher's

June 2018 – October 2021

Deli Manager, Deli Assistant Manager, Deli Night Supervisor, Deli Clerk

- Managed 12+ deli employees and fostered a productive and engaging team environment, improving customer service and employee retention.
- Identified opportunities for growth in all areas (personnel, financial, operations) and constantly adapted standard practices to pursue targeted goals.
- Maintained standards of quality and cleanliness according to SOPs and applicable regulations.
- Identified and mentored employees with leadership potential and provided opportunities for advancement.
- Consistently exceeded sales targets while operating within budget constraints. Oversaw and facilitated department sales growth of more than 60% throughout my tenure.
- Guided the department through frequent operational changes due to the Covid-19 pandemic and ensured continued compliance within a volatile landscape of recommendations and best practices.

Target

August 2021 – Present

Food Service Expert, Fulfillment Expert

- Identified opportunities for operational improvement and increased efficiency while minimizing waste.
 - Led the region over a multi-week period according to fulfillment metrics regarding efficiency (highest units per hour) and effectiveness (lowest items not found).
 - Cross-trained and transferred work centers to meet business needs and leverage my strengths more effectively.
 - Treated each guest interaction as an opportunity to create a positive and memorable experience and consistently sought chances to improve my communication skills.
-

Education

Bachelor of Science

Oregon State University

June 2025

Corvallis, Oregon

Massage Therapy Diploma

Lake Superior College

May 2012

Duluth, Minnesota

Associate in Arts

Central Lakes College

May 2011

Brainerd, Minnesota

Skills

Soft Skills: Leadership, Organization, Communication, Optimization

Highlighted Coursework: Data Structures, Software Engineering, Cloud App Development, Databases, Analysis of Algorithms, Parallel Programming, Usability

Languages: Python, C++, C#, C, JavaScript, HTML, CSS, SQL, Ruby

Technologies, Tools, Methodologies: Agile, OOP, GCP, Flask, Node, React, VS Code, GitHub, WireShark, Docker, Trello, Figma, GLMan, OpenGL, OpenCL, Postman, VMware, TDD

Recent Projects

Cloud Based REST API

June 2025

- Lightweight course management tool that satisfies 13 endpoints to manage courses, students, administrators, instructors, and enrollment.
- Built in Python using Flask, deployed on the Google Cloud Platform using the Google App Engine and Datastore.
- RESTful API that performs CRUD operations.
- Authenticates users with Auth0 and allows authorized users to add, delete, or alter enrollment information. Rejects access attempts by unauthorized parties or users with insufficient permissions.
- Can be tested using custom Postman environment and collection files.

Escape Room Challenge Capstone Project

May 2025

- Multi-term development project to experience every aspect of the development process as part of a four member team.
 - Built with the Godot Game Engine using C#. Collaboration was managed through GitHub, Trello, and Google Workspace.
 - Early project phases involved the creation of several documents centered on technical requirements, design elements, and a development plan.
 - The primary development period involved several multi-week sprints aligned with an Agile methodology, and included weekly progress report presentations in addition to sprint planning meetings.
 - Final development phases focused on testing, bug fixes, and documentation regarding project continuance.
-
