

# Madan Mohan Chunduri

Dallas, TX | (361)-466-7555 | [mmohanch12@gmail.com](mailto:mmohanch12@gmail.com) | [LinkedIn](#)

## SUMMARY

Entry-level Data Analyst with a strong computer science background and hands-on experience in Python, SQL, and Excel. Demonstrated ability in data processing and trend identification during machine learning projects. Proven skills in organizing technical forums and developing digital solutions to support data-driven decisions.

## EDUCATION

### Texas A&M University, Kingsville

Aug 2023 - May 2025

Master of Science, *COMPUTER SCIENCE* (GPA: 3.66)

Kingsville

- **Coursework:** Database Management systems, Data Mining, Design Analysis of Algorithms, Advanced Python, Data Science, Cloud Computing, Operating Systems, Analysis Of Algorithms, Compiler Design

### VVIT, Guntur

Aug 2019 - Mar 2023

Bachelor of Science, *COMPUTER SCIENCE* (GPA: 3.0)

Guntur

- **Coursework:** Data Structure, Database Systems, Object Oriented Programming, Machine Learning, Software Testing, Managerial Accounting, Management and Organizational Behaviour

## EXPERIENCE

### Cytiva | Machine Learning Engineer

Nov 2024 - Dec 2024

- Trained Cytiva's Amigo Gen AI model 'Service CoPilot' for the product AKTA OLIGOPILOT 10/100 using Human Reinforcement Learning (HRL) with human feedback, reinforcing data-driven decision-making and model fine-tuning.
- Implemented a reward and punishment system using Python to enhance the accuracy of the Service CoPilot model, demonstrating robust analytical and programming skills essential for data processing and analysis.

### VVIT | University Innovation Fellow (UIF) by d. School, Stanford

Apr 2021 - Apr 2023

- Organized weekly tech discussion forums for students and faculty to present and analyze emerging technology trends, fostering cross-departmental communication and collaborative problem-solving.
- Developed a campus-specific Q&A webpage to streamline communication and consolidate data from queries, enhancing information accessibility and insights.
- Created an interactive platform for alumni and current students to connect, providing career guidance and leveraging user feedback data to improve networking opportunities.
- Initiated a foreign language program by partnering with experienced instructors, using participant data to evaluate program impact and enhance global communication skills.
- Launched a campus-based pitch event modeled after Shark Tank, integrating feedback mechanisms and data insights to support entrepreneurial initiatives and mentor guidance.

## PROJECTS

### Mining The Blogs using Latent Semantic Analysis.

- Developed a website that will summarize the text in the Blogs with 98% accuracy in summarizing the data in word, line and paragraph count by using Python and Machine Learning.
- We used the NATURAL LANGUAGE PROCESSING (NLP) algorithm for the text summarization. For analyzing the summarization.
- We used a technique called Latent Semantic Analysis (LSA), which is part of extractive based summarization.

## SKILLS & TOOLS

- **Data Analysis & Programming:** Python, SQL, MySQL, HTML, CSS, Statistics, Business Analytics
- **Platforms & Visualization:** Excel, Tableau, Data Visualization, SQL Server Management Studio, UiPath, Jupyter, Azure, AWS, GCP, RPA

## CERTIFICATION

- Google Cloud Data Analytics Certificate.
- Python Programming Certificate.
- Salesforce Developer Certificate.

## OTHER ACHIEVEMENTS

- Freshmen Mentor and Student Speaker for Freshmen Orientation
- Organized & Facilitated 3 Design Ventures & 12 Design Thinking Workshops
- Contributed to UIF's Change Forward Journal, Second Edition
