Email: kmsr212@gmail.com

EXECUTIVE PROFESSIONAL SUMMARY:

- 3 years of experience as a Data analyst, Report Development and writing SQL scripts. Expert in gathering requirements, collecting Data, design/develop Power BI and Tableau Reports for decision making. Approach all projects with a winning attitude and passionate about providing high quality products.
- Experience in Data Modeling and Architecture, Database Administration, Data Conversion Validation, Data Warehouse Development, Report Creation, Data Conversion, Applications Testing, Software Quality Assurance, User Acceptance Testing, Training and Support.
- Experienced and knowledgeable in Systems Development Life Cycle (SDLC) like Requirements gathering, Analysis, Design, Implementation and Agile (Scrum) Software Development cycle includes Standup for story updates, Grooming, PI Planning, story creation, creating blockers, Impediments, burning hours and story movement.
- Knowledge and Experience in Banking Deposits, credit cards, home loans, and auto Applications.
- Strong Teradata skills that include build/maintain Teradata tables, Views, Constraints, Indexes, SQL & PL/SQL scripts, Functions, Triggers and Stored procedures.
- Used Aggregations, Set Operators like Union, Minus, and Intersect, CASE Expressions and String expressions to retrieve data in required form from multiple tables.
- Good knowledge in Tableau Reporting Tool and hands on experience on creating heat maps.
- Expertise in Data mining with querying and mining large datasets to discover transition patterns and examine financial data.
- Experience in Developing scripts using Teradata advanced techniques like Row Number and Rank Functions.
- Experience in creating dashboards, scorecards and building reports using performance point server 2007.
- Experience in Business Objects functionalities like Slice and Dice, Drill Up and Drill Down, Cross Tab, Master/Detail, Formulas and Variables etc.
- Extensive experience in Strategic development of a Data Warehouse and in Performing Data Analysis and Data Mapping from an Operational Data Store to an Enterprise Data Warehouse.
- Hands on Experience in Troubleshooting test scripts, SQL queries, ETL jobs, data warehouse/data mart/data store models.
- Hands on Experience in Developing and maintaining dashboards/reports using Tableau.
- Recognized for partnering with business leaders and technical teams to plan, integrate, document and execute complex project plans on time and on budget.

TECHNICAL SKILLS:

Databases	MY SQL, SQL server, Oracle, Sales force, Teradata, DB2, Postgres.
Cloud databases	Azure, AWS, Snowflake.
ETL Tools	SSIS, Informatica, Talend, Azure, AWS
BI Tools	Power BI, Tableau, Excel
Power Platform	Power BI Desktop, Services, Power on, Automate, Power BI Embedded, Apps, Virtual Agent
Languages	SQL, DAX, T-SQL, PL-SQL, Python, R
Methodologies	Waterfall, Agile, Jira software, Share Point, SDLC
Data Modeling	Star Schema, Snowflake Schema, Logical & Physical, Dimensional Modelling

EDUCATION:

- Bachelors degree in ECE ST.Ann's College of Engineering & Technology _ Andhra Pradesh, India.
- Masters degree in Computer and Information Science _ University of South Dakota_ South Dakota, SD, U.S.A.

Certifications & Courses:

- Successfully completed an online course of Data Visualization With Power BI offered by Great Learning Academy.
- Successfully completed an online course on Python Fundamentals for Beginners offered by Great Learning Academy.
- Python for Data Science, AI & Development – online course authorized by IBM
- SQL for Data Science from University of California Davis

Professional Experience:

Junior Data Analyst | General Mills | Minneapolis, MN | August 2024 – Present

Responsibilities:

- Involved in analysis, design, and documenting business requirements and data specifications. Supported data warehousing extraction programs, end-user reports, and queries.
- Interacted with Business Analysts to understand data requirements to ensure high-quality data is provided to the customers.
- Created monthly and quarterly business monitoring reports by writing Teradata SQL queries, including System Calendars, Inner Joins, and Outer Joins to retrieve data from multiple tables.
- Good knowledge of JSON format data and performed source and target validations using aggregations and null validity functions.

- Created multi-set tables and volatile tables using existing tables and collected statistics on tables to improve performance.
- Developed Teradata SQL scripts using RANK functions to improve query performance while pulling data from large tables.
- Designed stunning visualizations using Tableau software and publishing and presenting dashboards on web and desktop platforms.
- Designed and deployed reports with Drill Down, Drill Through, and Drop-down menu option and Parameterized and Linked reports using Tableau.
- Implement point-of-view security to Tableau dashboards to facilitate visibility across various levels of the organization.
- Responsible for gathering report requirements, collecting data using SQL Script, and creating Power BI Reports.
- Analyzed and validated data in partnership with business owners to identify trends and problem areas and propose improvements.
- Wrote various SQL scripts to create datasets for reporting.
- Expertise in creating Excel (pivot tables, charts, and VLOOKUPS) for on-demand and ad-hoc reports.
- Installed and set up Power BI Gateway inside a VM for data refresh.
- Scheduled SQL Jobs using SQL Server Agent and report jobs using Power BI Gateway.
- Developed multiple Power BI dashboards for leadership team decision-making.

Technical Skills: Teradata SQL Assistant, Teradata, Teradata Loading utilities, Python, Tableau, MS Excel, MS PowerPoint, PowerBI

Technical Data Specialist | Avangrid | Orange, CT | June 2023 – July 2024

Responsibilities:

- Responsible for gathering requirements from business analysts and operational analysts, identified the data sources required for the reports needed by the customers.
- Used Python programs to automate the process of combining large datasets and data files and then converting them as Teradata tables for data analysis.
- Created automated Python programs to archive the database tables which are large in size and not in use into mainframe folders.
- Developed programs to manipulate arrays using libraries like NumPy and Python.
- Performed performance tuning and optimization to increase the efficiency of the scripts by creating indexes, adding constraints, and query optimization.
- Wrote SQL scripts for huge data pulls and ad-hoc reports for analysis. Used Teradata advanced techniques like rank, row number, etc.
- Generated graphs using MS Excel Pivot tables and creating presentations using Power Point.
- Generated reports using Proc Tab, Proc Report, Data Null, Proc SQL and Macros. Used OLAP functions like sum, count, csum, etc.
- Created numerous processes and flow charts to meet the business needs and interacted with business users to understand their data needs.
- Created Set, Multiset, Derived, Volatile, Global Temporary tables to retrieve the data from multiple tables.
- Experience in writing Korn shell scripts for automating the jobs. Automated reports by connecting Teradata from MS Excel using ODBC.
- Documented scripts, specifications, other processes and preparation of Technical Design Documents.

Technical Skills: Teradata, Teradata utilities (SQL Assistant, Fast Load, Fast Export), PowerBI, Tableau.

Data Analyst | Spertaj Ltd | Hyderabad, India | Jan 2022 – Dec 2022

Responsibilities:

- Assisted senior analysts in collecting, cleaning, and organizing datasets for analysis, ensuring data accuracy and consistency
- Performed preliminary data analysis using tools such as Excel, Python, or Mat lab to support research and project development
- Assisted in managing SQL databases, including data entry, updating records, and ensuring data integrity Created and maintained basic SQL queries to retrieve and manipulate data as needed for various projects
- Generated data reports in CSV, JSON, and TEXT formats under guidance of senior team members
- Assisted in writing documentation for new systems and processes, ensuring future team members had clear guidelines
- Participated in cross-functional team meetings to understand project goals and contribute ideas for improvement.
- Assisted in tracking project milestones and deliverables, ensuring that timelines were met by coordinating with team members
- Proactively sought opportunities to learn new technologies, including programming languages like Python, R, or SQL
- Shadowed senior developers, data analysts, and engineers to gain deeper understanding of industry best practices and tools
- Assisted in daily administrative tasks such as scheduling meetings, maintaining project records, and preparing presentations for internal use.

Technical Skills: SQL, Python, Pandas, PowerBI, Tableau, MS EXCEL.
