Summary

A skilled Full-stack developer And Data Analyst with Around 3 years of experience in building web applications. Proficient in various technologies and programming languages, including JavaScript, HTML5, CSS, React, Angular, C#, and Python. Enthusiastic in solving complex real-world problems and dedicated to staying up-to-date with current trends and technologies. Proven ability to lead and collaborate effectively with cross-functional teams and deliver high-quality code on time. Looking for opportunities to demonstrate my skills and drive innovation.

EDUCATION

Southern Illinois University

Master of Science in Computer Science | CGPA: 3.91

Relevant Coursework: Artificial Intelligence, Software Engineering, Data Mining, Design and Analysis of Algorithms, Machine Learning, Web Data Management

Carbondale, IL

Aug 2023 – May 2025

Osmania University

Bachelor of Electrical And Electronics Engineering | Percentage: 74%

Relevant Coursework: Computer Programming, Power Systems, Database Management Systems, Design and Analysis of Algorithms, Control Systems

Hyderabad, India

SKILLS

Front-end development: HTML, CSS, JavaScript, React.js, Angular, WordPress

Back-end development: C#, Python, Java, Node.js, .NET, RESTful API

Database: MySQL, MongoDB

Tools: AutoCAD, Matlab, Simulink, Vlsi, Pycharm, Eclipse, Anaconda.

Cloud Platforms: Microsoft Azure, Amazon Web Services (Basic)

SDLC Tools: Git, Jenkins, Maven

IDEs: PyCharm, VScode, Visual Studio, Jupyter Notebook, Eclipse

EXPERIENCE

Java Developer

Optum Financial (UnitedHealth Group)

Hyderabad, IN

Aug 2020 – May 2023

Technologies: .NET, C#, SQL Server, Azure, Angular 8, Java 1.8, Spring Boot, AWS, Eclipse, Visual Studio, Docker, REST API, HTML5, CSS, GIT, Data Analyst

- Built and enhanced microservices for healthcare applications using Java 8/11, Spring Boot, and RESTful APIs, contributing to better modularity and maintainability.
- Participated in migrating a monolithic claims processing system to a microservices-based architecture, improving system performance and deployment efficiency.
- Developed key modules for member eligibility verification, claims auditing, and provider directory services, ensuring secure and accurate data handling.
- Implemented Apache Kafka for reliable asynchronous processing of large-scale healthcare data streams.
- Integrated services with OAuth2 and JWT for secure authentication and data access.
- Deployed containerized applications using Docker, with CI/CD pipelines built through Jenkins and deployments on AWS EC2 instances.
- Tuned complex SQL queries and stored procedures in Oracle DB, achieving faster response times and reduced resource usage.
- Contributed to Agile sprints by participating in planning, code reviews, and delivering well-tested code using JUnit and Mockito with 85%+ test coverage.

PROJECTS

Member Eligibility Verification System

- Developed RESTful APIs using Java and Spring Boot to verify insurance coverage and member eligibility in real time.
- Integrated with CMS and internal systems to validate data securely using OAuth2 and JWT.
- Reduced manual verification efforts by 60%, improving efficiency for provider support teams.

Patient Data Integration Platform

- Built a backend service using Spring Batch and Kafka to ingest and normalize patient data from multiple sources.
- Ensured data consistency and compliance by implementing validation and error-handling mechanisms.
- Helped improve the accuracy of patient records by 40% through real-time updates and data deduplication.

An Unmanned Aerial Vehicle with Facial Recognition / Face Recognition Attendance System

Technologies: Raspberry Pi, Python, OpenCV, TensorFlow, DJI SDK, ROS, MQTT, Cloud Integration

- Built autonomous UAV using Raspberry Pi for processing and control And Implemented facial recognition with OpenCV and TensorFlow.
- Integrated with DJI SDK and ROS for navigation and control, optimized system for efficient power usage and stable performance
- Used VNC Viewer for live video streaming and MQTT for communication, Enabled cloud storage for video and data access

Decentralized Application (DApp) For Secure User Data Storage.

- Developed a **DApp** on the **Ethereum** blockchain to securely store user details with **smart contracts** in **Solidity**.
- Integrated **IPFS** for decentralized, off-chain data storage and used **Web3.js** for blockchain interactions.
- Built a responsive front-end with **React**, ensuring secure user authentication and efficient gas usage.

ACHIEVEMENTS & CERTIFICATIONS

- Achieved Cisco Certified *Ethical Hacker* certification.
- Accomplished Hacker rank Python programming certification.
- Walmart USA Advanced Software Engineering Virtual Experience Program on Forage - March 2025

INTERNSHIPS

- Interned at Orbit Technologies, India.
- Interned at VI Solutions, India.
