

Madhulica Chand *(US Permanent Resident/Green Card)*

Clinical Data Management & Acquisition Specialist

SUMMARY

A quality focused, detail-oriented Clinical Data Manager with extensive knowledge and 8+ years' experience in Data Management in the Pharmaceutical industry. Extensively worked on Phase I/II/III/IV Pain management, Hematology & Blood Disorders, Iron regulation, Inflammatory & Immunomodulatory Diseases, Oncology and Diabetes therapeutic areas.

SKILLS/EXPERTISE

Software Tools: Oracle Clinical-OCRDC, INFORM, Medidata Rave, Medrio, Merative Zelta (IBM Clinical Development), PhlexView, DFdiscover, Trial Online, Trial Master, Celexus, SureClinical CTMS, Medpace ClinTrak CTMS, IQVIA & Suvoda IRT, TrialMax eCOA, WeConnect, Cerba Trova Okta, Synteract, Citrix, Symphony, SAS, LIMS, LMS Trainings-Bloom, Veeva Vault Clinical, Elluminate, GlobalScape.

Software applications: Microsoft - Excel, PowerPoint, Word, SharePoint, Outlook, OneNote, Project, OneDrive, Teams, Yammer, Microsoft Power BI, Delve, Office 365, Windows, To-Do, Stream, Planner, PowerApps, Forms, Sway, Dynamics 365, Microsoft 365 Admin Center, Microsoft Whiteboard, SwiftKey, Adobe Acrobat Professional, Zoom, Webex, Skype, DocuSign, Surface Hub, MFA, and SharePoint.

Standards: CDISC (Adam, SDTM, ICH- GCP, GLP, GDP, 21CFR Part 11, Quality standards defined by FDA/ICH/GCP/CFR Guidelines.

Soft Skills: Communication, Networking, Observation, Time management, Problem Solving, Team Building, Organization, Teamwork, Leadership, Decision Making, Active Listening, Critical Thinking, Attention to Detail, Negotiation, Cultural Awareness, Meeting Management, Problem solving and Conflict management, Client relationship management, Reporting & Collaboration and Presentation skills.

Certifications: PMP training, ISO 17025,

EXPERIENCE

Takeda Pharmaceuticals, MA

Oct'24- Jan'25

Sr. 3rd Party Data Acquisition Specialist

- Support the planning, setup, and acquisition of external clinical data at the study level, assisting in managing study start-up, conduct, and closeout activities.
- Assist in creating external data transfer agreements, ensuring alignment with Takeda Standards and specifications to support data integration, analysis, and reporting.
- Provide support in setting up infrastructure for external data to flow into Takeda Clinical data pipelines.
- Assist in validation of all 3rd Party Data generated in clinical trials into Takeda Clinical Data pipelines.
- Develop and maintain working relationships with key stakeholders like Clinical Data Management, Clinical Data Engineering, Standards, and other Study Execution Team members.
- Assist in preparing function for submission readiness and may support Clinical Trial Tools & Technologies (CT3) group in formal inspections or audits.
- Act as a representative for Takeda in interactions with key external partners as part of the Takeda CT3 3rd Party Data Acquisition team.
- Support timely submission and ongoing maintenance of study-related 3rd Party Data Acquisition documentation in TMF.
- Follow procedural documents and assist in reviewing and updating documents to ensure they reflect industry standards and regulatory requirements and include optimal processes.

- Assist in liaising with and reviewing work delivered by external partners (e.g., laboratories, eCOA providers, technology providers) performing services on behalf of Takeda.
- Escalate issues to CT3 leadership as appropriate.
- Develop working knowledge and understanding of FDA and ICH regulations and industry standards and quality control principles.
- Assist in handling Clinical data acquisition and management from external/3rd Party vendors.
- Support study-level negotiation and agreement for data transfer or integration on behalf of Takeda.
- Collaborate with all levels of employees with moderate supervision required.
- Familiar with FTP tools like GlobalScape, Clinical platforms like Veeva Vault CDMS and eTMF, Elluminate, WeConnect (Clinical Trial Patient Registration and Recruitment portal) and TrialMax (eCOA).
- Ensure documents are filed/archived in Veeva eTMF according to applicable regulatory requirements.

Protagonist Therapeutics, CA

Jun'20- Oct'23

Sr. Clinical Data Manager

- Reviewed Data Management documents e.g. Protocol, aCRF, eCRF & Visit map specifications, DMP, DVP, DVS, UAT scripts etc. for discrepancies and inconsistencies.
- Prepared Data Management documents e.g. eCRF, eCCGs, DTA, DMR, DMP and UAP.
- Involved in development of Patient Profile specifications and edit check specifications.
- Performed study start-up activities like database UAT, edit check/DVS UAT, EDC integration and log issues.
- Performed data review, discrepancy management and data cleaning activities on a regular basis.
- Ensured compliance with CDISC standards (ADaM and SDTM) to prepare CRFs and data review enabling seamless data management.
- Assisted in liaising with and reviewing work delivered by external partners and 3rd Party vendors e.g., laboratories like Metropolis, ICON, LabCorp, Charles River, PPD, Medpace, Cerba, Intrinsic, Celerion; eCOA/ePRO IRT providers like Suvoda, IQVIA, Veeva, Medrio, Medidata, ClinTrak etc.; CROs like Syneos Health (INC Research and InVentiv Health Incorporated), Thermo Fisher Scientific (PPD), Medpace, Celerion, Parexel, LabCorp (Covance), IQVIA, and ICON (PRA) for performing services on behalf of Protagonist.
- Assisted in handling, acquisition, validation, management of clinical data generated by external/3rd Party vendors.
- Performed SAE and vendor reconciliation.
- Performed reconciliation of PK, ADA, JAK2 and Protein Binding samples data against EDC.
- Uploaded essential study documents on eTMF portal (ExternalSharepoint, Novotech) and perform QC by reviewing documents uploaded on Veeva Vault like DMP, DVP, IA, SDE, eCRF, aCRF, CCG, Coding Conventions, DRP/DQRP, DB Lock/unlock forms & approvals, CRF Design Approval Form and feedback logs, DTAs, external data transfer specifications, SAE Reconciliation, PD reports, PK reconciliation report, Dictionary Coding documents like Coding Convention plan, CM, IM, RM, MH coding documents, meeting agendas, MOMs, meeting tracker, NTF Final Subject PDFs etc., log errors and fix the errors as part of internal QC process.
- Supported timely submission and ongoing maintenance of study-related 3rd Party Data Acquisition documentation in eTMFs Veeva Vault, Zelta (IBM), ICOMaster and Medidata.
- Reviewed Data Management SOPs/WIs.
- Participated in weekly DM team, Medical Review and study specific meetings. Developed and maintained working relationships with key internal and external clients and stakeholders.
- Participated in interactions with key external partners as part of the 3rd Party Data Acquisition team.
- Coordinated with vendors and CROs to ensure Data Management deliverables meet project/study team expectations regarding quality, time, and cost and that Data Management documents are filed/archived according to applicable regulatory requirements.

Pacira BioSciences, Inc., NJ

Nov'19- May'20

Sr. Clinical Data Manager

- Reviewed Data Management documents e.g. Protocol, aCRF, eCRF & Visit map specifications, DMP, DVP, DVS, Patient Profiles, Source document template (Symphony Healthcare worksheet), UAT scripts etc. for discrepancies and inconsistencies.
- Prepared DM Listings for Vitals Signs, Pain Score, Prior & Con Med, MH, AEs etc.
- Involved in development of Patient Profile specifications and edit check specifications.

- Prepared DM Listings and Interim Analysis listings.
- Performed study start-up activities like database UAT, edit check/DVS UAT, IWRS UAT, UAT for the IWRS to EDC integration and log issues.
- Performed data review, discrepancy management and data cleaning activities on a regular basis.
- Assisted in handling Clinical data acquisition and management from external/3rd Party vendors.
- Prepared various adhoc reports on Trial Master on regular basis like Rescue Medication, Prescription Daily Pain Medication, Intraoperative Medications, Multimodal Pain Mediation, Pain Intensity – NRS etc.
- Performed SAE and vendor reconciliation.
- Performed QC of data in the CD vs EDC.
- Uploaded essential study documents on eTMF portal (PhlexEview) and perform QC by reviewing uploaded documents like DMP, DVP, IA, SDE, eCRF, aCRF, CCG, Coding Conventions, DRP/DQRP, DB Lock/unlock forms & approvals, CRF Design Approval Form, IPPs, UAT scripts and feedback logs, external data transfer specifications, SAE Reconciliation, PD reports, PK reconciliation report, Dictionary Coding documents like Coding Convention plan, CM, IM, RM, MH coding documents, meeting agendas, MOMs, meeting tracker, NTF etc., log errors and fix the errors as part of internal QC process.
- Supported timely submission and ongoing maintenance of study-related 3rd Party Data Acquisition documentation in TMF PhlexEview.
- Used Medidata Rave reporter for generating various reports like Standard Reports, Data Streaming Reports, User Saved Reports, Custom Reports (Audit Trail, Data Listing, eCRF, Enrollement, Failed Edit Checks report).
- Reviewed Data Management SOPs/WIs.
- Participated in weekly DM team, Medical Review and study specific meetings.
- Ensured Data Management deliverables meet project/study team expectations regarding quality, time, and cost and that Data Management documents are filed/archived according to applicable regulatory requirements.

Tech Observer CRO, NJ

Aug'17- Oct'19

Clinical Data Manager

- Performed and oversaw study start-up activities (including but not limited to creation of Data Management documents, creation of CRFs, creation of database, UAT etc)
- Developed and/or reviewed Data management documents, including but not limited to DMP, DRP, UAT Plan.
- Worked with programmers to generate SAS listings for review to ensure data quality and integrity for regulatory submissions.
- Involved in development of edit check specifications and data validation reports
- Involved in study start-up activities like UAT testing using EDC tools (Oracle Clinical)
- Performed data review, discrepancy management and data cleaning activities on a regular basis
- Performed reconciliation of SAE's.
- Performed QC by reviewing updated TMF, CRFs and DCF responses, logged and fixed the errors as part of audit.
- Ensured Data Management deliverables meet project/study team expectations regarding quality, time, and cost and that Data Management documents are filed/archived according to applicable regulatory requirements.

Tech Observer CRO, NJ

Aug'16- Jul'17

Sr. Clinical Data Associate

- Developed data management plans and data validation plan
- Developed edit check specifications, and data validation specifications for data cleaning
- Coordinated with coding/programming team in obtaining desired outcomes
- Involved in SAE reconciliation and Lab reconciliation and ECG reconciliation
- Worked with external data providers on data issues
- Worked on EDC studies using OC/RDC and INFORM
- Participated in study start up projects and start up activities involving UAT testing and validation procedure testing
- Performed QC of the database and fixed the errors in the database
- Involved in CRF completion guideline meetings
- Responsible for post DB lock issues and queries

EDUCATION

Masters in Microbiology
Bachelors in Biochemistry
PG Diploma in Clinical Research
Masters in Business Administration
