

# MADHULIKA DAYAL

## SOFTWARE ENGINEER

[madhulika.dayal.tech@gmail.com](mailto:madhulika.dayal.tech@gmail.com) + 1 (913) 308-4552 Overland Park, Kansas

### SUMMARY

- Full Stack Developer with 3 years of experience in designing, developing, and testing web applications.
- Proficient in front-end technologies including React.js, Angular, JavaScript, TypeScript, HTML5, CSS3, and Bootstrap.
- Skilled in manual and automation testing of UI using Selenium WebDriver, TestNG, JUnit, Cypress, and Postman for API testing.
- Experience in integrating RESTful APIs with front-end applications for seamless data exchange.
- Strong understanding of Agile methodologies, including Scrum, JIRA, and version control (Git, GitHub, Bitbucket).
- Hands-on experience with unit testing, regression testing, cross-browser testing, and performance testing.
- Knowledge of responsive design, ensuring applications work across different screen sizes and browsers.
- Experience in debugging UI issues, optimizing front-end performance, and writing clean, maintainable code.
- Familiar with CI/CD pipelines, using tools like Jenkins, Azure DevOps, and GitHub Actions.
- Passionate about learning new front-end frameworks, improving test automation, and enhancing user experience.

### SKILLS

- Mobile Testing: 2 years (Manual and Automation testing for Android & iOS using Appium, UI Automator, XCUITest)
- Embedded Testing: 1 year (Testing software on embedded systems and IoT devices)
- Automation Testing: 2 years (Selenium WebDriver, Cypress, Appium, TestNG, JUnit, JavaScript-based test scripting)
- Manual Testing: 2 years (Mobile app testing, functional testing, UI testing, regression testing, exploratory testing)
- API Testing: 2 years (Postman, REST Assured, Swagger, API validation – Manual & Automation)
- Programming Languages: 2 years (Java, JavaScript, Python, TypeScript)
- Performance Testing: 1 year (JMeter, Load Testing, Mobile Performance Optimization)
- Defect Tracking & Bug Reporting: 2 years (JIRA, Bugzilla, TestRail, HP ALM)
- CI/CD & DevOps Integration: 2 years (Jenkins, Azure DevOps, GitHub Actions)
- Database Testing: 2 years (MySQL, MongoDB)
- Agile & Scrum Methodologies: 2 years (JIRA, Sprint Planning, Agile Testing)

### EXPERIENCE

#### Broadridge Financial Services | Software Engineer

Oct 2024 – present | TX

- Performed manual and automation mobile testing using Appium for Android and iOS applications, ensuring seamless user experience across devices.
- Developed and executed JavaScript-based automation scripts for mobile UI testing, improving test efficiency and reducing manual efforts.
- Designed and implemented test cases for functional, UI, regression, and exploratory testing, ensuring mobile applications meet business requirements.
- Conducted embedded testing on IoT-based flood monitoring sensors, validating software compatibility with hardware devices.
- Automated and executed API testing using Postman and REST Assured, verifying data flow, authentication, and integration between services.
- Debugged and resolved mobile performance issues, optimizing load times, responsiveness, and battery consumption on different devices.
- Collaborated closely with developers, product managers, and QA teams in an Agile environment, participating in daily stand-ups, sprint planning, and retrospectives.
- Used JIRA, TestRail, and HP ALM for tracking test cases, logging defects, and managing the software testing lifecycle.
- Conducted cross-browser and cross-device testing, ensuring applications run smoothly on various mobile platforms and screen sizes.
- Integrated Appium automated test cases into CI/CD pipelines using Jenkins and Azure DevOps, allowing continuous testing and deployment.

#### Zensar Technologies | Software Engineer

Sep 2020 – Jul 2022 | India

- Worked on test data creation and database validation using MySQL and MongoDB, ensuring accuracy and consistency across applications.
- Logged and tracked software defects in JIRA and HP ALM with clear reproduction steps, priority/severity classification, and follow-up resolution validation.
- Reported test results and issues accurately to team leads and QA managers, maintaining consistent status updates during Agile sprint reviews.
- Communicated with cross-functional teams and stakeholders to gather concise bug reproduction scenarios and provided professional feedback via email, calls, and defect comments.
- Performed end-to-end **Black Box testing** for .NET-based web applications, validating GUI elements, form submissions, and backend data consistency.

- Conducted cross-browser testing (Chrome, Firefox, Safari, Edge) and cross-platform validation on **Windows, macOS, and Ubuntu**, ensuring consistent user experience.
- Executed **mobile testing** on Android and iOS platforms using **Appium and manual test cases**, verifying layout rendering, responsiveness, gestures, and crash behavior.
- Validated data integrity between UI and databases (MySQL, MongoDB) by writing complex test queries for backend verification.
- Created and maintained detailed **test cases, test data, and execution logs** using tools like TestRail and Excel.
- Performed functional, regression, exploratory, and UI testing on web applications in Agile environments.
- Assisted in root cause analysis by capturing logs, screenshots, and video recordings to help developers reproduce issues.
- Participated in daily stand-ups, sprint planning, and retrospectives, ensuring test planning and defect triaging were aligned with development efforts.
- Carried out **responsive testing** on various screen sizes and devices using BrowserStack and Chrome DevTools.
- Engaged in troubleshooting test failures on various OS platforms, verifying compatibility and identifying OS-specific issues on Windows, Mac, and Ubuntu.
- Created detailed test reports, defect analysis reports, and test execution summaries, improving visibility for stakeholders and ensuring test coverage.
- Participated in healthcare software testing, ensuring compliance with medical device regulations and validating data accuracy in healthcare applications.
- Performed security and compliance testing to validate application data protection, encryption, and secure authentication mechanisms.

## **EDUCATION**

Masters of science in Computer Science and Engineering | University of Central Missouri, May 2024
