

Madhumitha Gaddam

BUSINESS ANALYST

Ohio, USA (Open to Relocate) | gaddam0506@gmail.com | (908) 628-0494

SUMMARY

- Business Analyst with over 4+ years of experience in analyzing business processes, gathering requirements, and implementing impactful solutions to drive organizational efficiency and performance.
- Experienced in documentation, including creating detailed Business Requirement Documents (BRDs), Functional Requirement Documents (FRDs), and User Requirement Specifications (URS), utilizing tools such as MS Office Suite and requirement management platforms.
- Expertise in business analysis techniques including Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, and SWOT Analysis, enabling informed decision-making and risk mitigation strategies.
- Expertise in data analysis and visualization, leveraging SQL, Python, Tableau, and Power BI to extract insights, identify trends, and support data-driven decision-making processes.
- Proficient in conducting User Acceptance Testing (UAT), developing test plans, and executing test cases to ensure the successful implementation and functionality of software releases.
- Adept at time management, problem-solving, and decision-making, with a strong focus on continuous improvement and delivering high-quality solutions that meet business needs and objectives.

SKILLS

Languages:	SQL, Python
Methodology:	SDLC, Agile, Waterfall, Kanban, Lean Six Sigma
Documentations:	FRD, BRD, SRS, Test Plan, User Guide
Project Management Tools:	MS Project, MS Excel, MS SharePoint, Asana, Trello, Rally
Visualization Tools:	Tableau, Power BI
Tracking Tools:	Jira, HP Quality Center, Rational ClearQuest, RTM
Business Analysis	Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis
ERP Planning & CRM:	SAP, MS Dynamics Nav, Salesforce, HubSpot
Technical Skills:	KPI, User Acceptance Testing (UAT), Alteryx, Requirement gathering, Google Analytics, Data Analysis, MS Visio, Joint Application Development (JAD), MS Office, User Story creation, Software development & testing, Data Modelling, Database Knowledge, Business Intelligence (BI) Tools, Process Mapping, User Experience (UX) Understanding, Quality Assurance (QA) Knowledge, Prototyping
Soft Skills:	Time management, Leadership, Management, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication, Sprint Planning, Sprint Reviews, Interview Sessions
Operating System:	Windows, Linux

PROFESSIONAL EXPERIENCE

Business Analyst | Cardinal Health, Ohio

Aug 2023 – Present

- Optimized patient scheduling and appointment management systems, leading to reduced patient wait times and improved resource allocation across multiple clinics, thereby increasing overall operational efficiency.
- Developed comprehensive Functional and Business Requirement Documents (BRD) to provide clear guidelines for the development and implementation of the patient scheduling system, ensuring alignment with stakeholder expectations.
- Designed and implemented automated patient reminder systems through the patient portal, sending personalized SMS and email notifications ahead of appointments, effectively reducing no-show rates.
- Conducted in-depth data analysis using Tableau and Excel, employing advanced filtering, trend analysis, and visualization techniques to pinpoint inefficiencies in the scheduling process and provide actionable recommendations for improvement.
- Led Agile sprints and daily stand-up meetings, utilizing Scrum methodologies to monitor project progress, prioritize tasks, and resolve issues quickly, ensuring timely delivery of project milestones.

- Reduced patient wait times by 20% by optimizing appointment scheduling workflows and aligning patient needs with available time slots, resulting in improved patient experience.
- Utilized SQL for data extraction, cleansing, and transformation, querying large datasets from the healthcare management system to analyze patient flow, scheduling bottlenecks, and resource utilization patterns.
- Streamlined scheduling workflows and leveraged predictive analytics, reducing patient wait times by 15%, improving clinic throughput, enhancing patient satisfaction, and minimizing frustration, which in turn increased patient retention and trust.
- Created detailed process flow diagrams to visually represent existing scheduling workflows, identifying bottlenecks and inefficiencies, and providing a clear pathway for improvement from patient check-in to appointment confirmation.
- Integrated the EHR system with the scheduling software, allowing real-time access to patient data (including medical and appointment history) during the scheduling process, ensuring clinicians have immediate access to critical information, reducing errors, and enhancing care coordination.

Business Analyst | Capgemini, India

Feb 2019 – Aug 2022

- Streamlined financial reporting and reconciliation processes by identifying inefficiencies through comprehensive business requirement gathering and process mapping, leading to improved accuracy and operational efficiency.
- Performed detailed process mapping and gap analysis to pinpoint inefficiencies in financial data flow and reconciliation procedures, ensuring they aligned with the client's financial objectives and regulatory standards.
- Used Robotic Process Automation (RPA) to automate repetitive tasks such as data extraction, reconciliation, and validation, significantly reducing manual errors and accelerating the overall process.
- Created thorough documentation across all project phases, including requirements documents, design specifications, test results, and user manuals, ensuring seamless knowledge transfer for the finance team.
- Integrated SAP with Power BI to enable real-time financial reporting and visualization, providing stakeholders with interactive dashboards for more efficient decision-making and financial analysis.
- Reduced manual errors in financial reporting by 25% through the implementation of automation and process improvements, resulting in more accurate financial statements and increased trust in the reporting process.
- Automated the monthly financial reporting process, reducing the closing cycle by 20% and enhancing operational efficiency by streamlining workflows across various departments.
- Delivered real-time insights into financial KPIs through dynamic dashboards, allowing management to make informed, data-driven decisions and improve the accuracy of financial forecasting.
- Utilized SQL and Excel to extract, clean, and analyze large datasets, identifying discrepancies in the reconciliation process and creating financial models that supported data-driven insights and improved reporting accuracy.
- Analyzed the annual cost of maintaining the RPA systems, including software updates, troubleshooting, and optimization, amounting to \$15,000 per year.
- Led the final UAT sign-off meeting with key stakeholders, reviewing all results from UAT cycles, including issue resolutions and retests. Provided documentation of UAT findings, test cases, and fixes.
- Conducted SWOT analyses at various project phases to assess internal strengths and weaknesses, along with external opportunities and threats, enabling proactive adjustments in strategy and financial management.
- Facilitated Joint Application Design (JAD) sessions with key stakeholders, including the finance team, IT department, project managers, and external consultants, to gather comprehensive requirements for automating financial reporting and reconciliation processes.
- Mapped out data validation and exception handling workflows using Visio, illustrating how discrepancies (such as missing records or mismatched balances) would be flagged and addressed in the automated reconciliation process.
- Created a dedicated Jira project to track all tasks related to the automation of financial reconciliation and reporting processes, ensuring clear visibility into project progress and enabled stakeholders and team members to easily track the status of tasks, from backlog items to completed user stories, leading to more efficient project execution.

EDUCATION

Master of Science in Computer Science & Information System - Youngstown State University, Youngstown, Ohio
Bachelor in Statistics - SSR degree college, Nizamabad, Telangana, India
