SUMMARY

4+ years of industry experience in data analytics and business intelligence for the HR domain. Extensive experience in delivering actionable business insights through market data analysis, data reporting and process optimization. Recent graduate in Advanced Data Analytics from the University of North Texas, USA, strengthening my expertise in data analytics, machine learning, and cloud-based data solutions.

- Highly Skilled in SQL, Tableau and Power BI for analytics and visualization.
- Extensive experience in persisting & maintaining large-scale data using MySQL, GCP.
- Proficient in building interactive dashboards and delivering business insights with Tableau.
- Highly experienced in data preparation and cleaning using OpenRefine and Tableau Prep.
- Proficient in using Python for data analysis, cleaning, and generating business insights.
- Hands-on experience in deploying end-to-end data solutions on Google Cloud, including data harvesting, storage, and retrieval.

EDUCATION

Master's in Advanced Data Analytics - University of North Texas, USA	Mar 2024 - Dec 2025
Bachelor of Computer Science & Engineering - Anna University, India	Aug 2014 - Apr 2018

PROFESSIONAL EXPERIENCE

Senior Executive - Teamware Solutions, Chennai, India	Jan 2021 - May 2023
--	----------------------------

- Successfully developed recruitment analytics processes to track candidates profiles and helped businesses on reducing sourcing costs from external vendors — SQL, Excel.
- Extensively analysed recruitment data to monitor key metrics such as turnaround time (TAT) and conversion rates, delivering actionable business insights to identify cost effective, highly skilled candidates, etc. — SQL, Excel.
- Led a team of 4 executives and guided them to analyze candidate & client data and generate insights tailored to business needs.
- Successfully delivered interactive dashboards to track and report weekly client hiring status, improving decision-making and transparency for stakeholders — SQL, Tableau.
- Enhanced recruitment efficiency by forecasting hiring trends and optimizing sourcing strategies through data analysis.
- Effectively created and managed routine hiring status reports to provide timely insights for business-critical recruitment needs — SQL, Tableau.

Resource Manager - Balbhas Business Sysnomics Pvt. Ltd. Chennai, India	Aug 2020 - Jan 2021
---	----------------------------

- Conducted sourcing channel efficiency analysis, leading to more targeted campaigns — SQL, Excel.
- Analyzed previous data and created actionable reports on hiring trends across different roles (e.g., Java, Cloud, QA).
- Gathered and documented client requirements to translate hiring needs into actionable recruitment analytics and reports — Excel, MS office.
- Collaborated with business stakeholders to gather requirements and translate them into recruitment analytics solutions tailored to hiring needs.
- Built simple dashboards to track key hiring metrics like cost-per-hire and time-to-fill, giving managers

better visibility — Excel, Tableau.

- Collaborated with HR managers to use hiring data for business decisions and workforce planning.
- Provided analytical insights for better decision-making and to support process improvements — SQL, Excel.

Senior IT Recruiter - Vy Systems

Oct 2018 – Aug 2020

- Collected and analyzed market and recruitment data to identify candidate trends and sourcing performance patterns.
- Evaluated job portals and recruitment channels to highlight high-performing sources, improving hiring efficiency and reducing costs.
- Built Excel dashboards to track KPIs such as response time (TAT) and candidate quality and sourcing efficiency, giving better visibility to managers.
- Maintained and presented analytics reports on candidate performance and sourcing trends, enabling proactive and data-driven hiring strategies.
- Worked with managers to turn hiring data into useful insights that improved workforce planning and reduced hiring costs.

TECHNICAL PROJECTS

Multimodal Mental Health Analysis (Python, TensorFlow/Keras, BERT)

Built a multimodal ML pipeline integrating text, audio, and video features to classify depression from interview data and applied deep learning models (BERT, CNN/LSTM) achieved higher accuracy over baseline models.

Analyzing Real Estate Price Trends (Python, Pandas, Scikit-learn)

Applied data-driven analysis on 1M+ property sales to uncover key drivers of real estate valuation, enabling informed decisions for investors and planners.

Flight Delay Prediction Using Machine Learning (Python, SQL, Random Forest, Gradient Boosting)

Predicted delays on 100K+ flights by engineering seasonal, route, and temporal features, applied ensemble models to identify key delay drivers and support airline scheduling.

Eventease - Online Event Management System (Python, MySQL, React)

Developed a full-stack platform for event/session management with REST APIs, relational database schema and automated email integration with React UI.

Infectious Diseases in California – Tableau Dashboard (SQL, Tableau, Tableau Prep)

Transformed public health datasets using Tableau Prep and built an interactive Tableau dashboard to analyze disease spread. Identified high-risk regions and seasonal patterns to assist healthcare decision-making.

Hotel Booking Trends Analysis (Python, SQL)

Analyzed 100K+ booking records to uncover seasonal demands, cancellation trends, and pricing impacts. Conducted EDA, ANOVA, regression and automated insights with reusable Python scripts.

Certification

Introduction to Linear Modeling in Python – DataCamp | Mar 2025

Exploratory Data Analysis in Python – DataCamp | Jan 2025

MySQL for Developers – Oracle Workforce Development Program | Hindusthan College of Engineering and Technology
