(804) 641-0818 polamreddymadhumitha1310@gmail.com [LinkedIn](#) [GitHub](#)

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with expertise in Power BI, SQL, Python, and Excel. Skilled in building interactive dashboards, automating reports, and translating complex datasets into actionable insights. Proven ability to support cross-functional teams and improve decision-making using data-driven approaches across healthcare, retail, and e-commerce domains.

WORK EXPERIENCE

Duroflex – Bangalore, India

Data Analyst Intern | Apr 2024 – Jun 2024

- Designed Power BI dashboards tracking sales, orders, and returns, leading to a 12% increase in demand forecast accuracy.
- Automated business reporting using Power BI and integrated Azure DevOps for real-time issue tracking.
- Enabled natural language Q&A in dashboards to support decision-makers with self-service analytics.

Life Line Hospital – India

Data Analyst Intern | Oct 2023 – Mar 2024

- Created Power BI dashboards to track financial KPIs (revenue, expenses, profitability), improving forecast accuracy and speeding insights.
- Built and maintained Excel models for budgeting, forecasting, and variance analysis using pivot tables and advanced formulas.
- Collaborated with cross-functional teams to gather and validate financial data, supporting strategic decisions.

Smollan – Bangalore, India

Consultant Intern | Dec 2022 – Apr 2023

- Used Python and R for preprocessing and visualizing large volumes of raw retail data.
- Enhanced data reliability and readiness by applying statistical checks and standardization techniques.
- Contributed to BI reporting that informed category-level strategic planning.

EDUCATION

Master's in Decision Analytics in Data Science | GPA: 3.6 | May 2025

Virginia Commonwealth University – Richmond, VA

Master's in Business Administration – Business Analytics | May 2024

Christ (Deemed to be University) – Bangalore, India

Bachelor of Technology – Computer Science & Engineering | GPA: 3.8 | May 2023

Sri Venkateswara College of Engineering – Tirupati, India

TECHNICAL SKILLS

Tools & Languages: Power BI, SQL, Python, R, Excel, JMP, HTML, CSS, basic JavaScript, Excel VBA, Google Sheets, SQL Server, AWS QuickSight, GitHub, Jupyter Notebook, Alteryx, ETL, AWS, Azure ML, Docker, MLflow, Hadoop, Spark, VS Code, JIRA, ServiceNow, Scrum, MS Office Suite, CRM platforms, ERP systems, Visio, Lucidchart, Google Analytics, MS Access.

Certifications: Power BI (2024), Lean Six Sigma Green Belt (2024), MTA: Java (2022), CCNA (2022)

Analytics: Data Visualization, Dashboarding, Statistical Analysis, Reporting Automation, Data Cleaning, Data Wrangling, Exploratory Data Analysis, A/B Testing, Descriptive Statistics, Hypothesis Testing, Business Process Modeling, KPI Development, Requirements Gathering, Root Cause Analysis, Forecasting.

AI & ML: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Time Series Forecasting, Large Language Models, GenAI, Reinforcement Learning, Generative Models

Soft Skills: Problem-Solving, Communication, Teamwork, Attention to Detail

Relevant Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, XGBoost, LightGBM, OpenCV, Keras, NLTK, SpaCy, Statsmodels, Transformers, Matplotlib, Seaborn, Plotly.

PROJECTS

Financial Performance Forecasting Dashboard - Apr 2025

- Designed a Power BI dashboard to visualize past performance and forecast scenarios: revenue projections, cost-driver sensitivities, and margin trends. Integrated natural language Q&A for ad hoc insights.
- Automated data ingestion and transformation with Power Query; created DAX measures for key. Reduced manual reporting time by ~30%.
- Performed scenario and sensitivity analyses in Excel and Power, enabling stakeholders to evaluate budget allocation and risk exposure. Improved forecast accuracy by ~15%.

Stress Forecasting System - Jun 2023

- Predicted employee stress using LightGBM and workload data; results guided HR decisions.
- Automated stress scoring based on behavioral and work patterns.

Drowsiness Detection using Deep Learning - Oct 2023

- Used OpenCV and deep learning to detect eye status and predict drowsiness in real time.
- Demonstrated application potential for safety monitoring in logistics and fleet industries.
