

Madhura Pandeti

BUSINESS ANALYST

MD, USA | Mobile: (551) 888-0769 | Email: madhurap0109@gmail.com

SUMMARY

- Business Analyst with 4+ years of hands-on experience in analyzing and interpreting complex business requirements to drive strategic decision-making and enhance operational efficiency.
- Proficient in utilizing the latest tools and technologies to extract meaningful insights from large datasets, enabling data-driven decision-making for stakeholders and executive leadership.
- Proficient in creating essential project documentation such as FRD, BRD, SRS, Test Plans, and BPMN diagrams, ensuring clear communication and alignment of development efforts.
- Extensive experience working in Agile environments, employing methodologies such as Scrum and Kanban to deliver iterative, high-quality solutions on time and within scope.
- Adept at utilizing a variety of project management tools, including Asana, Trello, Jira, Rally, MS Project, MS Excel, and MS SharePoint, to facilitate collaboration and ensure project timelines and objectives are met.
- Experience with the latest business intelligence and analytics tools, including but not limited to Tableau, Power BI, and Python, ensuring seamless integration with existing systems and platforms.
- Conducted in-depth analysis of business rules, ensuring their accurate representation within systems and applications to maintain consistency and compliance with business policies.
- Successfully identified and implemented process improvements, resulting in streamlined workflows, reduced operational costs, and increased overall productivity for various projects.

SKILLS

Methodologies:	SDLC, Agile, Waterfall
Documentation:	FRD, BRD, SRS, Test Plan, User Guide
Project Management Tool	MS Project, MS Excel, MS SharePoint, Asana, Trello, Jira, Rally
Visualization Tools:	Tableau, Power BI
ERP Planning and CRM:	SAP, MS Dynamics Nav, Salesforce, HubSpot
Analysis Skills:	Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis
Tracking / Other Skills:	Microsoft Visio, JAD, Rational ClearQuest, RTM, UAT, KPI, Alteryx, Requirement gathering, Google Analytics, Data Analysis, MS Office, Software development & testing, PowerPoint, NICE Engage, VPAS, Six Sigma Black Belt, Introduction to SQL, Supervised Learning with scikit-learn, Introduction to Data Science in Python, Intermediate SQL Queries, Tableau for Data Scientists, Celonis foundations for process mining, Celonis Process automation, MAKE Automation software
Cloud Technology:	AWS, Azure DevOps
Soft Skills:	Time management, Leadership, Management, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication
Operating Systems:	Windows, Linux, Mac iOS

EXPERIENCE

Business Analyst Fidelity Investments , MD	Jun 2023 – Present
• Working on a project at Fidelity Investments to enhance the client onboarding process for investment accounts. • Clearly outlining the business objectives of the project, such as improving the efficiency of the client onboarding process and increasing account activation rates. • Implementing SQL security measures to protect sensitive data and ensure compliance with regulatory requirements, such as access controls and encryption. • Identifying gaps between the current state and desired state of the client onboarding process, focusing on areas where performance falls short of business objectives or industry standards, leading to a 20% improvement in process efficiency. • Using AWS storage services like Amazon S3 (Simple Storage Service) for scalable object storage and Amazon EBS (Elastic Block Store) for block-level storage volumes. • Maintaining version control of project documents and files in Confluence, enabling team members to track changes, revert to previous versions, and ensure document integrity.	

- Integrating data from multiple sources into Power BI, including databases, spreadsheets, and cloud services, to create a unified view of the client onboarding process and related metrics, improving reporting accuracy by 45%.
- Creating data flow diagrams in Visio to model the flow of data and information across different systems and components involved in the client onboarding process.
- Providing training to end-users and stakeholders on how to use the client onboarding system effectively and prepare comprehensive documentation to support ongoing use and maintenance.

Business Analyst | HCL Tech, India

Apr 2019 – Jul 2022

- Managed a project which focused on optimizing healthcare claims processing, resulting in a significant 25% reduction in processing time.
- Developed and deployed Python automation scripts to streamline workflow processes, reducing manual effort by 40% and significantly minimizing data entry errors.
- Designed and created interactive dashboards in Tableau, providing stakeholders with real-time insights into claims processing performance and facilitating data-driven decision-making.
- Identified potential risks and uncertainties that could impact the success of the healthcare claims processing optimization project, including technical, operational, and regulatory risks.
- Conducted a cost-benefit analysis to evaluate the potential return on investment (ROI) of the project, weighing the anticipated benefits against the projected costs.
- Executed test cases and scenarios according to the UAT plan, validating system functionality, data accuracy, and user workflows to ensure alignment with user expectations.
- Specified the functional requirements of the system, detailing the features, capabilities, and behaviors required to support efficient claims processing, such as data entry, validation, adjudication, and reporting.
- Measured the average time taken to process a healthcare claim, from submission to adjudication, to assess operational efficiency and customer service levels.
- Created prototypes and visual representations of system features and workflows during JAD sessions to facilitate stakeholder understanding, validate requirements, and solicit feedback.
- Customized workflow configurations in Jira to reflect the specific stages and statuses of tasks within the claims processing optimization project, aligning with the team's development process.
- Made PivotTables and PivotCharts in Excel to summarize and visualize claims data, enabling stakeholders to gain insights into trends, patterns, and anomalies.
- Conducted regular sprint reviews and demos to showcase completed work to stakeholders, gather feedback, and validate those deliverable meet acceptance criteria and user expectations.

EDUCATION

Master of Science in Information Systems – University of Maryland, Baltimore County, MD, USA

Bachelor of Technology in Computer Science & Engineering - REVA University, Bangalore, India
