

MADHURI BANDARI

Full Stack Software Developer | React & .NET | JavaScript, Python, Azure

+1 (326) 209-2805 | madhuri21@gmail.com | www.linkedin.com/in/madhuribandari | <https://github.com/Madhuri21>

OBJECTIVE

Motivated Full Stack Developer with over 5+ years of experience in **ASP.NET Core, React, C#, JavaScript, and Python**. Skilled in building **RESTful APIs**, optimizing **SQL Server** performance, and creating dynamic frontends with **React, HTML5, CSS3, and JavaScript**. Proficient in **Entity Framework Core, Azure cloud services, and Docker** for scalable applications. Experienced with **CI/CD pipelines, Git**, and working in **Agile environments**. Passionate about integrating **machine learning** solutions using **Python, Pandas, and NumPy**. Seeking to contribute my expertise in full-stack development and machine learning to impactful, real-world projects.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, C#, Python, JavaScript (ES6+), TypeScript, SQL, Perl
- **Frontend Development:** React.js, Angular 13+, Vue.js, Blazor, Razor Pages, HTML5, CSS3, Bootstrap 5, Tailwind CSS, jQuery, AJAX
- **Backend Development:** .NET 6/7/8, ASP.NET Core, Web API, RESTful Services, Entity Framework Core, LINQ, Microservices, Clean Architecture, SOLID Principles, Design Patterns (Repository, Dependency Injection)
- **Database Systems:** Microsoft SQL Server (2016–2022), Azure SQL, PostgreSQL, MongoDB, Redis, Cosmos DB, Stored Procedures, Query Optimization, Indexing, Performance Tuning
- **Cloud & DevOps:** Microsoft Azure (App Services, Azure Functions, Blob Storage, Key Vault, Cosmos DB, Azure DevOps), Docker, Kubernetes (AKS), GitHub Actions, CI/CD Pipelines, Infrastructure as Code (Bicep, Terraform – basic)
- **Testing & Quality Assurance:** xUnit, NUnit, MSTest, Selenium, Postman Collections, Playwright (optional), Code Reviews, Static Code Analysis (SonarQube)
- **Tools & IDEs:** Visual Studio 2022, Visual Studio Code, Postman, Swagger (OpenAPI), SSMS, Azure Storage Explorer, Git, GitHub, Bitbucket, Azure Repos
- **Machine Learning (Additional Skillset):** Scikit-learn, TensorFlow, PyTorch, NumPy, Pandas, Matplotlib, NLP, Model Deployment (FastAPI, Docker), LangChain, HuggingFace Transformers
- **Others:** OAuth2, JWT, IdentityServer4, Agile/Scrum, JIRA, API Security, Documentation, CRUD Operations

PROFESSIONAL EXPERIENCE

Farmer Products Delivery App (*In Progress(POLAM)*) – Full Stack Developer

Tech Stack: React.js, Node.js, Express.js, MongoDB, Stripe API, JWT, Tailwind CSS

Duration: April 2025 – Present | **Self-Initiated Project**

- Designing a full-stack web application to help farmers directly sell their products to consumers and retailers, aiming to reduce food waste and boost farmer income.
- Developing a responsive frontend using React.js and Tailwind CSS, with role-based dashboards for farmers, customers, and admins.
- Creating a secure backend with Node.js and Express.js to manage users, product listings, carts, orders, and payment workflows.
- Implementing Stripe for secure online payments and real-time order placement.
- Adding dynamic functionalities like product filtering by location/category, order tracking, and price updates based on market trends.
- Following Agile practices with GitHub for version control and modular development.

Goal: Empower farmers through digital solutions by simplifying the selling process and expanding market reach.

Full Stack Developer

Comcast

Nov 2024 – Present

- Contributed to the design and development of scalable web applications using **ASP.NET Core/MVC 5, C#**.
- Developed RESTful APIs and enhanced frontend functionality with Vue.js, TypeScript, Razor Views, and Bootstrap.
- Worked with Azure cloud services—deployed applications via Azure DevOps pipelines, created virtual machines, and utilized Azure SQL, Storage, and Key Vault.
- Created and consumed **Web APIs; used LINQ, Entity Framework, and ADO.NET** for database operations; performed SQL optimization.
- Implemented features using microservices, containerized via Docker, and integrated **CI/CD** pipelines for efficient delivery.
- Built custom mobile components using Xamarin and .NET MAUI, with **HTTP** Client for API communication.
- Applied security practices using OAuth2, OpenID Connect, and Active Directory for secure access. Participated in Agile development processes, code reviews, and daily stand-ups, contributing to end-to-end feature development.

Technologies: .NET Core, ASP.NET MVC 5, C#, Razor, Web API, Azure, Entity Framework, Vue.js, Bootstrap, SQL Server, MongoDB, Docker, LINQ, Bitbucket, GitHub, CI/CD, JIRA, Agile, Xamarin.

System Engineer (Full Stack Software Developer – .NET & SQL Server)

Infosys – Client: The Allstate Corporation(USA) | Mysore, India

July 2021 – Aug 2023

- Developed and maintained scalable web applications using **ASP.NET Core, .NET Core**, and **C#** for insurance and internal business platforms.
- Built and secured **RESTful APIs**, implemented business logic via **Entity Framework Core**, and integrated **SQL Server** databases.
- Designed backend modules, including for a capstone project (*OnlineFoodOrder System*), and **tested APIs** using Postman.
- Collaborated with cross-functional teams (**TRANSCEND, Image Migration, AWD**) for feature development, issue resolution, and release planning.
- Applied object-oriented principles and asynchronous programming to optimize application performance.
- Participated in the full software development lifecycle: requirements gathering, design, development, testing, and deployment.
- Led change management operations, coordinated release schedules, and ensured secure credential protocols across Windows, **Linux**, and **Oracle** systems.
- Conducted code reviews, authored technical documentation, and delivered production support.
- Proactively learned **Perl** to resolve file **date mismatch issues from Us Bank**; developed, tested, and validated scripts with full design approval, demonstrating strong adaptability and quick learning.

Capstone Project: InfyBytes – Online Food Ordering System

Nov 2021 – Aug 2023

- Developed a full-stack application to facilitate doorstep food delivery, enabling both Admin and Customer functionality.
- Built backend services using **ASP.NET Core Web API** and **Entity Framework Core** for **CRUD** operations and real-time order processing.
- Designed and normalized a relational **MS SQL Server database** (categories, items, orders, customers) and integrated it using **EF Core ORM**.
- Implemented core features: item/category browsing, order placement and tracking, price management, and delivery status updates.
- Used **Postman for API testing** and Visual Studio 2019 for application development and deployment.

Developer

Sinfynamics Technology Pvt. Ltd.

Jul 2020 – Jun 2021

Project: SmartRealtorsOnline

Client: Intelx Systems Pvt. Ltd. | **Team Size:** 8 | **Role:** Developer

Technologies: ASP.NET, C#.NET, ADO.NET, WCF, SQL Server 2008

Description: SmartRealtorsOnline is a comprehensive real estate management platform designed for property agents, developers, and classified website owners. It enables seamless customer and property listing management, centralized data access, and marketing automation, including integration with platforms like OLX, Trovit, Vivastreet, and social media.

Key Responsibilities:

- Developed core modules including Property, Customer, Enquiry, and Account Dashboards.
 - Designed application flow and implemented business logic using ASP.NET and C#.NET.
 - Developed WCF services for secure access to the centralized SQL Server database.
 - Participated in integrating external property portals and social media channels to expand listing visibility.
 - Collaborated with the team on modules like Diary Management, Administration, and Marketing for end-to-end solution delivery.
-

CERTIFICATION (Infosys Global Education Center)

- Advanced CSharp Programming
- Basic CSharp Programming
- Developing Services using ASP.NET Core Web API
- Dot Net Debugging
- Entity Framework Core
- Implementing databases using Microsoft SQL Server
- Securing the Backend Layers

EDUCATION

Master of Science in Computer Science

Wright State University, Dayton, OH

GPA: 3.9/4

Bachelor of Technology in Electrical & Electronics Engineering

Kakatiya University, Warangal, Telangana, India.

CGPA: 9.33/10

Worked on diverse projects involving .NET development, machine learning, and algorithm design, built a hybrid wind speed forecasting model using EEMD & LSTM in MATLAB, implemented linear regression with feature selection in Python, developed neural network algorithms, and solved optimization problems using Gale-Shapley and greedy algorithms. Gained hands-on experience in C#, ASP.NET, SQL, Python, MATLAB, ML modeling, and algorithmic problem-solving.
