

Professional Summary: Experienced **Data Engineer** with over **3+ years of experience** specializing in **data integration, ETL processes, and process optimization**. Experienced in utilizing **AWS, Python, SQL**, and various data processing tools to streamline data workflows and improve operational efficiency. Strong problem-solving skills with a keen attention to detail and a commitment to achieving business objectives.

- **Designed and developed ETL workflows** using Python and **AWS Glue**, automating data ingestion, transformation, and loading from on-premises systems and third-party APIs to **Amazon S3**, improving data freshness and availability.
- Built and maintained **SQL-based data pipelines** for large-scale data integration, optimizing performance and reliability across **Oracle, MySQL, and Snowflake** environments.
- Implemented **Informatica PowerCenter** for batch ETL jobs, handling data extraction and cleansing for enterprise reporting and downstream analytics platforms.
- **Created BTEQ-like scripting logic** in SQL to handle transformations and aggregations in **AWS Athena** and **Amazon Redshift**, ensuring compliance with business rules and SLAs.
- Developed automated monitoring and validation processes using **Pytest, CloudWatch, and AWS Lambda**, resulting in a **40% reduction in data quality issues** during nightly ETL cycles.
- Partnered with **cross-functional teams** across product, engineering, and business domains to gather requirements and translate them into scalable data models and workflows.
- Leveraged **Agile/Scrum methodology** in sprint planning and daily standups, using **JIRA** for tracking tasks and collaborating on user stories with both technical and non-technical stakeholders.
- Collaborated closely with QA and DevOps teams to support **cloud migration projects**, including **AWS DMS** (Database Migration Service) and data quality validation for post-migration testing.
- Conducted in-depth **data profiling and anomaly detection**, ensuring consistency across systems and enhancing the trustworthiness of business-critical dashboards in **Power BI** and **Tableau**.
- Delivered on-time project releases by managing priorities and supporting deployment tasks during **evening/weekend hours**, demonstrating strong commitment to release cycles and business continuity.
- Demonstrated strong verbal and written communication skills by leading stakeholder meetings, documenting ETL processes, and presenting technical summaries to leadership.
- Prioritized and executed multiple tasks efficiently under tight deadlines, ensuring timely delivery of key data assets and reports for business operations.

TECHNICAL SKILLS:

Programming Languages	Python, SQL
Cloud Services	AWS (S3, Athena, Glue, Lambda, Redshift, DMS, CloudWatch, CloudTrail)
ETL & Data Pipelines	AWS Glue, Informatica PowerCenter, Ab Initio (basic knowledge), Data Modeling, Automation Scripts
Data Visualization	Tableau, Power BI
Data Processing & Pipelines	Data Pipelines, ETL Tools, Ab Initio, Data Modeling, Automation Scripts
Data Validation & Management	Pytest, Data Validation Techniques, AWS CloudWatch, Data Profiling, Data Quality Frameworks
Spreadsheets & Reporting	Excel (PivotTables, Formulas, Dashboards), Ad-hoc Reporting
Monitoring & Deployment	AWS CloudWatch, Git, CI/CD Concepts

WORK EXPERIENCE:

Client: Med Converge Healthcare Services Pvt Ltd
Role: Data Engineer

April 2022 to December 2022

- Managed **client relationships** by coordinating with counterparties and ensuring that all derivative documentation queries were handled efficiently, ensuring all outstanding confirmations were signed and returned in line with standard procedures.
- Collaborated with **cross-functional teams** (TMG, legal, and client services) to negotiate and resolve queries, while escalating issues in a timely manner to maintain a smooth workflow.
- Proactively **anticipated and mitigated risks** by identifying potential issues related to documentation and derivatives, resolving them quickly with minimal impact to clients and internal processes.
- Led and organized **team activities**, delegating tasks effectively to ensure timely resolution of queries and alignment with business objectives, while managing daily operational tasks.
- Maintained and strengthened **client relationships** by offering support and guidance on queries related to documentation, ensuring accurate and efficient service.

- Gathered and analyzed **domain knowledge** on new products being developed as per client specifications, collaborating with development teams to ensure proper implementation of these products.
- Analyzed and resolved **internal account payable issues**, leveraging data tools like **SQL** and **Python** to educate suppliers and internal teams on missing or inaccurate information, ensuring seamless financial data flow.
- Reviewed and investigated **aged invoices**, working closely with internal teams to resolve discrepancies in data and ensuring accurate, timely payment to suppliers, leveraging automation and data validation techniques.
- Built **automated data workflows** using **AWS Glue**, **Python**, and **CloudWatch** to track documentation status, flag delays, and support compliance tracking.
- Actively participated in **process improvements**, automating manual workflows and ensuring adherence to standard operating procedures (SOPs) and protocols to streamline documentation and approval processes for new products and regulatory compliance.
- Supported **regulatory applications and documentation processes** by utilizing data management tools and ensuring adherence to all regulatory requirements for new product approvals and compliance, tracking progress through automated reports and data validation systems.
- Leveraged data tools like **AWS Glue** and **Python** to build automated workflows for documentation tracking and issue resolution, significantly improving turnaround times and ensuring accuracy across all teams involved.

Environment: Python, SQL, AWS (S3, Athena, Glue, CloudWatch), Tableau, Excel, Jira, Ab Initio, Power BI, Automation Tools, Process Management Tools, Data Validation Techniques.

Client: Med Converge Healthcare Services Pvt Ltd

September 2019 to April 2022

Role: Data Process Associate

- Prepared and processed invoices using **automated systems** and **tools**, applying data validation techniques to ensure accuracy and completeness, and utilizing **Python** and **SQL** for streamlining data entry and payment processes.
- Performed opening and closing procedures in the **data processing** systems, ensuring smooth operations by automating reporting tasks and implementing data quality checks for efficient **data flow**.
- Managed escalated **customer orders**, utilizing **data pipelines** and **SQL** queries to ensure timely processing and resolution of special orders, meeting aggressive deadlines with a high degree of accuracy.
- Gathered and analyzed **business process data**, utilizing data visualization tools like **Tableau** or **Power BI** to create summary reports for management, providing actionable insights into operational performance.
- Collaborated with **IT development teams** to identify opportunities for improving the efficiency of data workflows, using **Python** scripts and **AWS services** (S3, Athena, Lambda) to enhance current technology infrastructure.
- Assisted in the creation of **quarterly business process** analysis presentations, aggregating data from multiple sources and providing data-driven recommendations for improvements, using **SQL** and **Excel** for analysis.
- Contributed to the development of a comprehensive **business process report** that supported a major company expansion, ensuring the accuracy of data and smooth integration of new systems.
- Tracked **logistics processes**, identifying data inefficiencies and utilizing **data pipelines** and **ETL tools** to automate reporting and make recommendations for process optimization.
- Worked with **departmental managers** to create detailed process reports, leveraging **data engineering** tools and technologies to automate the extraction and transformation of data, enabling data-driven decision-making.
- Assisted in developing **monthly reports** for management by utilizing data from various systems, streamlining data collection and validation processes to ensure timeliness and accuracy.
- Collaborated with **production teams** to identify inefficiencies and used **data modeling** and **SQL queries** to suggest data-driven solutions aimed at improving productivity.
- Worked with **IT teams** to develop policies related to user activity management, ensuring compliance with data security standards and implementing automated monitoring systems to track user interactions with company data.

Environment: Python, SQL, AWS (S3, Athena, Lambda), Tableau, Power BI, Excel, Data Pipelines, ETL tools, Data Modeling, Automation Scripts, Business Process Analysis Tools.

PROJECT: PHARMACEUTICAL WEB APPLICATION WITH BLOCKCHAIN INTEGRATION

Tools: PHP, HTML/CSS, MySQL, XAMPP, phpMyAdmin, Solidity (Ethereum Smart Contracts)

- Designed and implemented a dynamic web application for pharmacy operations allowing users to register, log in, and purchase over 20 commonly prescribed medicines.
- Developed secure backend workflows in **PHP** with **MySQL** for inventory management, order history, and user authentication.
- Utilized **phpMyAdmin** for schema design and managing drug details such as Paracetamol, Ibuprofen, Metformin, etc.
- Created a modular front-end using **HTML** and **CSS** to deliver a responsive and user-friendly experience.
- Integrated **blockchain** components using **Ethereum smart contracts** to validate medical prescriptions and log transactions immutably, reducing the risk of fraud and ensuring regulatory compliance.
- Simulated decentralized prescription approval to demonstrate how blockchain can increase transparency and security in pharmaceutical supply chains.

EDUCATION:

2022 – 2024	Master of Science in Management Information Systems, (CGPA: 3.76/4.00) Fairleigh Dickinson University, School of Engineering and Applied Science Teaneck, NJ
2016 – 2019	Bachelor of Science in Microbiology, Biochemistry & Chemistry, (CGPA: 9.29/10) Aurora Degree College, Osmania University Hyderabad, TS, India
