SUMMARY

Data Analyst with 5+ years of experience in data analysis, ETL, validation, and reporting across financial services, healthcare, and enterprise platforms. Proficient in SQL, Python, PySpark, AWS, Azure Synapse, Tableau, and Business Objects. Proven expertise in building automated pipelines, optimizing queries, and delivering actionable business insights. Adept at data modelling, governance, and dashboard development to enable data-driven decision-making.

EDUCATION

- Pursuing Master of Computer and Information Science, Concordia University, Wisconsin 2023-2025
- Bachelor's Information Technology, B.V Raju Institute of Technology, India 2016-2020

TECHNICAL SKILLS

- Languages: SQL, PL/SQL, T-SQL, Python 3.11, R, UNIX Shell
- Databases: Teradata, Oracle 12c, PostgreSQL, SQL Server, Redshift, Snowflake
- Cloud: AWS (S3, Redshift, Lambda, Cloud Search), Azure Synapse
- Big Data: PySpark, Hive, HBase, Kafka, Databricks, Spark SQL
- BI Tools: Tableau, Looker, Business Objects, SAP BO
- Data Modelling: Star Schema, Snowflake Schema, ER Diagrams, Metadata Hub
- Tools: GitHub, JIRA, Confluence, Toad, SQL Developer
- OS: Windows, UNIX, Linux

CERTIFICATIONS

- Certified in Software courses are SQL, Java, Manual Testing, Selenium
- Certified in AWS Cloud Practitioner

WORK EXPERIENCE

Senior Data Analyst | AgFirst | Columbia, SC (Apr 2025 – Present)

- Built PySpark pipelines on Databricks integrating Snowflake, Redshift, Oracle, and APIs, reducing manual ETL work by 70%.
- Automated client communications via Python + AWS SES, saving 200+ hours annually.
- Created Tableau dashboards for financial KPIs, cutting reporting turnaround by 40%.
- Implemented SQL/Hive data quality checks achieving 99% accuracy.
- Ingested structured/unstructured data into AWS S3 for analytics workflows.

Data Analyst | Gilead Sciences | Foster City, CA (Feb 2024 – Mar 2025)

- Led Azure Synapse + SQL + Tableau reporting for 4,700+ participant survey analytics.
- Built ETL validation logic integrated with Azure Data Factory pipelines.
- Developed parameterized Tableau dashboards with LOD expressions.
- Created Python automation scripts for data cleansing and merging.
- Managed Azure DevOps pipelines and role-based data governance.

Mid-Level Data Analyst | Tata Consultancy Services | Hyderabad, IN (Feb 2022 – Aug 2023)

- Migrated data from legacy systems to Hadoop Data Lake and AWS S3.
- Designed fraud detection pipeline using Kafka + Spark Streaming.
- Optimized Snowflake Star Schema models for reporting performance.
- Created Tableau dashboards visualizing KPIs for faster decision-making.
- Resolved data discrepancies using PySpark and SQL.

Junior Data Analyst | Aegis Technical Services | India (Jun 2020 – Jan 2022)

- Developed Teradata SQL scripts with OLAP and window functions.
- Built Business Objects universes and operational dashboards.
- Performed ETL with Teradata BTEQ, FLOAD, MLOAD for large datasets.
- Used Python (Pandas, NumPy) for data wrangling and analysis.
