EDUCATION

Master of Computer Applications

KLE Technological University

[Earlier known as B. V. B. College of Engineering and Technology]

Hubballi, Karnataka, India

October 2017 – August 2020

Bachelor of Computer Applications

Global College of Computer Applications

Hubballi, Karnataka, India

October 2014 - April 2017

TECHNICAL SKILLS

Programming Languages and Frameworks: Java, Spring, C#, .NET, C++, Python, JavaScript, HTML, bootstrap, jQuery CSS, SQL, PLSQL NoSQL, Node JS, PHP, Agile, Django, Perl, UNIX

Libraries and Tools: XAMPP Server, Jaspersoft, Mockito, Git, Apache Tomcat, Visual studio, Eclipse, PowerBi/Tableau

Technologies: Azure Cloud, Hadoop, ETL, Big Data, Kubernetes, Docker, Oracle Database, Data Visualization, Distributed Systems, Spark

WORK EXPERIENCE

Software Engineer

w3logistics AG GmbH, Germany

March 2022 - January 2024

- Modeled database tables and managed the ingestion of data into SQL database from various sources.
- Worked on extracting the data from databases using SQL queries or PLSQL stored Procedures and serving it to the application code.
- Optimized the database tables (using indexes and partitioning strategies) and refactored the queries to facilitate faster data access.
- Enhanced application functionality by implementing new features using Java, Spring framework and Eclipse IDE.
- Ensured product quality by writing extensive tests using frameworks such as Mockito.
- Improved client-side code by developing new features using C# and .Net.
- Generated detailed reports by extracting and transferring data using Tibco Jasper Report Server (Jaspersoft).
- Developed patches, DDL, Liquibase scripts, and views to facilitate easier data access.
- Utilized Jenkins for continuous integration and delivery throughout the building, testing, and deployment phases.

Software Engineer

Stork Technical Services GmbH, Germany

June 2021 - March 2022

- Worked on a browser-based platform for reporting and processing deviations/errors in turbine manufacturing using MariaDB, XAMPP server, Apache, PHP, HTML, CSS, JavaScript, XML, Bootstrap, and JQuery.
- Integrated WampServer, Apache, and Tomcat with MYSQL and established robust server connectivity to the backend.
- Implemented front-end interfaces with JavaScript, CSS, HTML, JQuery, and Bootstrap to enhance user experience.
- Utilized localhost and MyPHPAdmin for seamless project execution and management.
- Extracted and integrated data from MYSQL databases to server environments, ensuring data consistency and reliability.
- Augmented existing applications by adding advanced features and functionalities.
- Gained experience making modifications to database tables using DML commands. Or restoring a database from backup in the event of a disaster.
- Assisted in designing efficient database models, optimizing stored procedures, and writing effective triggers.
- Enhanced departmental performance through refining new calculation templates using MS Excel and VBA.

Intern (Machine learning with Python)

Winsoft Solutions, India

Jan 2020 - May 2020

- Developed a project for Emoji prediction, adding a unique twist to sentiment analysis.
- Used Python, Sci-Kit Learn library and Machine Learning technologies.
- Provided expert assistance in designing database models
- Excelled in debugging, testing, and performance tuning to ensure optimal functionality.
- Offered comprehensive support for requirements gathering and code standards adherence.

- Efficiently resolved technical issues, enhancing overall project success.

Academic Projects

NLP Data pre-processing App [Semester: Master of Computer Application 5th Semester]

- An application that would pre-process the data to be used for NLP based ML models. Which involved part-of-speech tagging, lemmatization, tokenization, sentence segmentation etc. when a file is uploaded. (used Java and Natural language processing (NLP) techniques).

Student Feedback Portal [Semester: Master of Computer Applications 4th Semester]

- An application that facilitates the management and students to provide/obtain feedback. Small module that's taken up under Digital India. (Done using Django, DB Browser, Python Interpreter).

Student Internal Assessment [Semester: Master of Computer Applications 3rd Semester]

- An application that develops reports, analyzes and assigns grades to students. The goal is to assign tasks and measure the performance of students. (Done using Wamp server, MYSQL, JavaScript, jQuery, CSS, PHP).

Hostel Management System [Semester: Master of Computer Applications 4th Semester]

- An application that provides college students with accommodation to the university hostel more efficiently. This application stores details of the hostellers and applied students (Done using Wampserver, HTML, CSS, JavaScript and PHP).

Hotel Management [Semester: Master of Computer Application 6th Semester]

- An application that facilitates customers to book rooms and make payments online (Done using HTML, CSS, JS, Wamp server).
