SUMMARY

A highly motivated and results-driven professional with expertise in Robotic Process Automation (RPA) and Generative AI, including prompt engineering. I am skilled in UiPath Studio, Orchestrator, and various AI-driven solutions. Proven track record in automating complex business processes and integrating cutting-edge AI technologies to enhance operational efficiency. Seeking to leverage my technical skills in both RPA and AI to drive innovation and automation for forward-thinking organizations.

PROFESSIONAL EXPERIENCE

STUDENT ASSISTANT | University of North Texas

Jan 2024 – May 2025

- Integrated OpenAI GPT-3.5 Turbo and GPT-4 APIs with UiPath to automate information retrieval, improving workflow efficiency and reducing manual effort.
- Designed and implemented dynamic UiPath Forms with event-driven automation, enhancing user interaction and real-time data capture.
- Built and deployed supervised machine learning models (Logistic Regression, Decision Trees, Random Forest) to predict loan approvals using financial datasets.
- Conducted end-to-end data preprocessing, feature engineering, and exploratory data analysis (EDA) to improve model performance and interpretability.
- Evaluated ML model effectiveness using accuracy, precision, and recall, and applied neural networks and feature importance to uncover key decision factors.

Project Engineer | WIPRO | India

May 2022 – Feb 2023

- Developed and implemented end-to-end RPA solutions using UiPath, including process analysis, design, development, testing, and deployment. Implemented data scraping, mouse and keyboard automation, and interaction with web applications using selectors.
- Led automation of Salesforce website testing Cisco’s sales, services, and support tracks, ensuring high- quality execution across multiple browsers.
- Built reusable automation components using UiPath elements such as mouse, keyboard, selectors, and data scraping for extracting structured data into CSV/Excel files.
- Conducted extensive testing and debugging to improve process efficiency and reliability.
- Implemented a project for retrieving information using UiPath and integrated OpenAI’s ChatGPT API for an innovative RPA solution.
- Designed user interfaces with forms and triggered automated events, optimizing process workflows.
- To Test the automation, I developed an automated Outlook email notification system that sends process execution results, including success and failure statuses, along with corresponding component details in Salesforce.

PROJECTS

Information Retrieval using UiPath & Generative AI (Prompts) with Integration Service

- Integrated OpenAI’s GPT-3.5 Turbo and GPT-4 APIs with UiPath to develop a dynamic solution for information retrieval and process automation, improving efficiency and scalability of workflows.
- Automated data flow from AI-driven prompts to storage systems, optimizing the speed and accuracy of information processing.
- Designed dynamic user interfaces within UiPath forms, triggering automated events to streamline data retrieval tasks and enhance user experience.

Prediction of Loan Approval using Machine Learning

- Built models for loan approval prediction using a dataset of 4,269 rows and 13 features (income, assets, credit score, etc.).
- Developed a machine learning model to predict loan approval using supervised learning algorithms (Logistic Regression, Decision Trees, Random Forest).
- Conducted data preprocessing and feature engineering to improve model accuracy and utilized Data Analysis (EAD) for enhanced insights.
- Applied feature importance techniques and neural networks to identify key predictors and model complex patterns.
- Evaluated model performance using accuracy, precision, and recall metrics, ensuring reliable and effective predictions.

TECHNICAL SKILLS

Programming Languages: Python (prior experience), Java, JavaScript, SQL, PL/SQL, NOSQL.

RPA/Automation Tools: UiPath Studio 2023.10.0, Integration Service, UiPath Orchestrator (Cloud), Integration Service, Selenium, Junit.

Debugging & Analysis: Wireshark, MATLAB, Mathcad, tcpdump.

Frameworks: Selenium, Flask, REST APIs, JSON.

Systems, Cloud Tools & Data warehousing: Windows, Git, Docker, **AWS** (EC2, IAM, S3), Amazon (Redshift, DynamoDB, Glue, RDS, Athena).

AI/ML Frameworks: NLP, RAG, Machine Learning (Regression, Classification, Clustering, Anomaly Detection), Prompt Engineering, OpenAI API, GPT Models (GPT-4, GPT-3.5 Turbo), AI Agents, Langchain, Langgraph, RAG, LLMs, PyTorch, TensorFlowPandas, NumPy, Matplotlib, Seaborn, Fine-Tuning.

Business Intelligence Tools: Tableau, Microsoft Power BI, QuickSight.

Software & IDE’s: Jupyter Notebook, Pycharm, IntelliJ, Visual studio code (VS code).

Databases: MySQL, SQL, DynamoDB, MongoDB.

Web Technologies: HTML5, CSS3, XML (Basics).

Office Suite: Microsoft Office (Excel, PowerPoint, Word), Outlook, Microsoft Teams (Reporting, Meetings).

Others: Document Understanding, Computer Vision, Generative-AI, SDLC, Agile Development, OOP, Distributed Systems, OS Internals, Kernal Development, Scheduling Algorithms, Analytical thinking, debugging, and Troubleshooting.

EDUCATION

M.S. in Computer Science,

University of North Texas, Denton, TX, USA.

Bachelors in ECE,

Sri Venkateswara College of Engineering, India.
