EDUCATION

California State University Long Beach

Masters in Computer Science - Long Beach, California

2023 - 2025

KL University

Bachelor of Technology

Computer Science Engineering - Vijayawada, India

2018 - 2022

PROFESSIONAL EXPERIENCE

Software Engineer | Fidelity Information Services (FIS) | Bengaluru, India

Feb 2022 – June 2023

- Developed and modified program logic for new and existing fintech applications using Java, Spring, JAX-RS, and Python, directly supporting the full systems development life cycle (SDLC).
- Analyzed reports and data extracts in detail to ensure compliance with business requirements and regulatory standards, maintaining data integrity with careful attention to detail and effective problem solving.
- Developed and optimized ETL workflows using Apache Airflow, ensuring timely and accurate data pipeline execution and 100% uptime and on-time financial reporting without delays.
- Led QA efforts for the Modern Banking Platform, reducing software defects by 20% through functional and non-functional testing while applying end-to-end workflow knowledge and basic root cause analysis.
- Executed backend, upgrade, and automated regression tests that resulted in a 15% increase in efficiency and a 10% reduction in time-to-market, demonstrating strong organizational and prioritization skills.
- Authored comprehensive test cases, test scripts, test plans, and QA documentation, supporting full-cycle testing and traceability. Ensured thorough validation and verification of product features across multiple releases.
- Mentored junior team members, providing technical guidance on coding standards and debugging techniques, ensuring alignment with project goals.

Machine Learning Engineer Intern | Brainovision Solutions India Pvt Ltd | Hyderabad, India

June 2020 - Aug 2020

- Collaborated on the development of a classifier model to predict diabetes, engaging in thorough analysis and utilizing diverse visualization techniques on the diabetes dataset within Jupyter Notebook.
- Employed various classification algorithms, conducting a comparative analysis. Successfully communicated technical findings and insights with team members, showcasing the ability to convey complex concepts effectively.
- Demonstrated proficiency by integrating learnt concepts into the projects, Acknowledged by the supervisor for my dedication, and proactive approach in addressing tasks.

Student Assistant | 49er Shops | California State University, Long Beach

Aug 2024 – May 2025

- Operated POS systems (Square, Clover) for secure and efficient transaction processing, ensuring payment accuracy and PCI compliance.
- Managed inventory databases, conducted stock audits, and applied data-driven strategies for optimal product replenishment.
- Provided technical support for POS software, including troubleshooting, firmware updates, and routine system maintenance.
- Enhanced operational workflows by collaborating on automation solutions using Excel macros and Google Sheets scripts.

PROJECTS

MERN Stack Product Management System

Jan 2025 – Feb 2025

- Developed a full-stack product management application leveraging the MERN stack (MongoDB, Express.js, React.js, Node.js) with CRUD functionalities.
- Designed and validated RESTful API endpoints using Express Router, Postman for integration testing, and Axios for client-side requests.
- Built a responsive and accessible UI with Chakra UI, React Hooks, and Context API, ensuring efficient state management and reusable component design.
- Utilized Mongoose ODM for schema modeling and database validation, enabling scalable and structured data storage in MongoDB.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) to secure user data transactions and enforce authorization policies.
- Maintained modular code architecture, managed workflow with Git, GitHub, and employed VS Code debugging tools for efficient development.

LSTM vs. GRU: Predicting Netflix Stock Movements

Mar 2024-Apr 2024

- Implemented LSTM and GRU models in Python (TensorFlow, Keras) for Netflix stock time series forecasting after data normalization and windowed sequencing.
- GRU achieved 5% lower RMSE and faster convergence, outperforming LSTM in predictive accuracy and temporal pattern recognition.
- Evaluated models on RMSE and convergence rates, concluding GRU's superior adaptability to dynamic stock trends.

Determining optimal position of cabs

Jan 2023- Feb 2023

- Implemented KNN algorithm with Euclidean distance using Scikit-learn on Uber ride data for dynamic cab positioning and optimal dispatch.
- Preprocessed data via feature scaling (StandardScaler), outlier removal, and missing value imputation with Pandas and NumPy.
- Achieved 15% reduction in wait times and 10% increase in service coverage through model deployment.

SKILLS

- Programming & Frameworks:** Java (Spring Boot, Spring MVC, Spring Security), Python (Automation, TensorFlow, PyTorch, Scikit-learn, PySpark), JavaScript, C, C++, .NET, Django, RESTful APIs, MERN Stack (MongoDB, Express.js, React, Node.js), Lightning Web Components (LWC), Aura Components, Visualforce
- Frontend Expertise:** Angular, React, HTML5, CSS3, Responsive Design, UI/UX Optimization
- Database Management:** SQL (MySQL, SQL Server, PostgreSQL), NoSQL (MongoDB, Cassandra, Redis)
- Cloud & Platforms:** AWS (EC2, RDS, Lambda), Google Cloud Platform (GCP), ServiceNow, Linux,
- DevOps & CI/CD:** Jenkins, Git, GitHub, Bitbucket, Rally, Jira, Agile/Scrum, TestRail, Automation Scripting, Docker, Kubernetes, Maven
- API Development & Integration:** RESTful APIs, SOAP APIs, Swagger, Postman, OAuth 2.0/JWT Authentication
- Testing & Security:** JUnit, Mockito, Postman, BrowserStack, OAuth2, JWT, OWASP, RBAC
- Visualization & Data Tools:** Tableau, Power BI, DB Visualizer, Excel, SoapUI, Apache Hadoop, Alteryx, Databricks, Lucidchart, Figma
- Collaboration & IDEs:** Git, Jira, Confluence, Bitbucket, Eclipse, VS Code, PyCharm, Slack
- AI & Machine Learning:** TensorFlow, PyTorch, Scikit-learn, PySpark, Pandas, NumPy, OpenCV, Matplotlib
