SKILLS

Programming Languages	Python, C#, JavaScript, TypeScript, PHP, Java
Frontend Development	React JS, HTML, CSS, Tailwind CSS
Backend Development	GraphQL, REST API, C# .NET, Entity Framework
Database	MySQL, SQL, MongoDB, PostgreSQL, Redis
Tools & Frameworks	Git, GitHub, Docker, Kubernetes, Office 365, Jira
AI	Gen AI, LLMs, RAG, MCP, Vector DB

EXPERIENCE

Software Development Intern May 2025 - Aug 2025
Paycom Irving, TX

- Enhanced CRM developer productivity by implementing a GraphQL API layer in C# .NET using HotChocolate, increasing query flexibility and reducing endpoint redundancy by 40%. Migrated REST endpoints to GraphQL, streamlining data retrieval and lowering backend maintenance overhead.
- Applied the Repository Pattern to simplify data access and improve scalability for future feature development.
- Collaborated in Paycom's 2025 Codeathon, winning first place by developing a full-stack CRUD application, showcasing problem-solving, clean architecture, and teamwork.

Salesforce Developer Intern April 2023 - July 2023
Smart Bridge Remote

- Completed Salesforce Trailhead modules covering Apex, Lightning Web Components (LWC), Flows, API integration, and organizational setup, building strong Salesforce development expertise.
- Implemented automated process flows and optimized data relationships, reducing manual work by 25% and improving business process efficiency by 40%.
- Designed and styled custom Salesforce forms to streamline data entry and improve UI consistency.

EDUCATION

University of Kansas January 2024 - December 2025
Master's in Computer Science (GPA: 3.97/4.0) Lawrence, Kansas

Coursework: Data Science, Artificial Intelligence, Mobile Security, High-Performance Computing, Software Reverse Engineering

Jyothishmathi Institute of Technology and Science August 2019 - August 2023
Bachelor's in Computer Science (GPA: 3.33/4.0) India

Coursework: Programming Fundamentals, Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems

PROJECTS

Leasing & Rental Full-Stack Application (*React, Node.js, GraphQL, MongoDB, Tailwind CSS*)

- Designed an interactive React + Tailwind CSS UI for browsing listings, applying filters, and submitting rental applications. Implemented secure authentication and role-based access control, ensuring privacy for landlords, tenants, and admins.
- Built a GraphQL API with Node.js and Express, improving query flexibility and reducing over-fetching compared to REST.

Auto-Tuning GEMM Tile Sizes for High-Performance Matrix Multiplication (*Python, Scikit-learn, Gen AI, LLMs*)

- Designed a machine learning framework to predict optimal tile sizes for GEMM operations across CPUs and GPUs.
- Implemented kernels to benchmark matrix multiplication performance, generating diverse runtime datasets.
- Trained regression models (Random Forest, XGBoost, LightGBM) achieving 97% accuracy, enabling accurate runtime prediction and optimal tile selection.

Blockchain-based Crowdfunding System (*React, Solidity, Tailwind CSS*)

- Built a decentralized crowdfunding platform with wallet-based authentication, allowing users to log in, create campaigns, and manage projects securely on-chain.
- Implemented Solidity smart contracts supporting CRUD-like operations to enable complete project lifecycle management.
- Enhanced user experience by 50% with a responsive React + Tailwind CSS interface, while ensuring secure and immutable transactions through blockchain integration.
