Summary

Data-driven Business Analyst with an MS in Business Analytics and 6+ years of entrepreneurial experience. Adept at translating complex data into strategic insights, having leveraged SQL, Python, and Excel to drive 20%+ revenue growth and 50%+ campaign engagement. Seeking to apply my analytical expertise and leadership skills to an entry-level analyst role in a growth-focused organization.

Work Experience

John Muir Land Trust

Oakland, California, US

Business Analyst intern

March 2025 - Ongoing

- Implemented **Google Tag Manager** and used Classy's **A/B testing** to analyze donor behavior and optimize conversion paths.
- Analyzed **Google Analytics data** for user segmentation, donation timing, and engagement trends; built interactive **Looker Studio** dashboards to correlate newsletter campaigns, land announcements, and donation spikes.
- Recommended donor retention strategies through cross-functional collaboration, **increasing** repeat donations by 20% and **improving** fundraising efficiency.

Foodinquisitive

Haryana, India

Founder, CEO, Business Analyst

Aug 2018 - Dec 2024

- Founded and scaled** a data-driven nutrition consultancy to 500+ clients, leading a team of 4 and driving 20% YoY revenue growth through service optimization and strategic planning.
- Designed structured data collection using **Google Forms** and managed a **custom CRM**; built **Excel dashboards** to track **KPIs** (adherence, revenue per client, satisfaction), increasing **client retention** by 15% through personalized consultations.
- Launched targeted social media campaigns across multiple platforms, increasing engagement by 50% and raising inquiry-to-client conversion to 20% using analytics-driven acquisition strategies.

Projects

Nutrition and Calorie Calculator

Remote, California, US

Academic Project

June 2025 - Ongoing

- Engineered a scalable end-to-end **ETL pipeline** to extract, transform, and load nutrition data from public **GitHub repositories** into **SQL databases** and structured spreadsheets, enabling advanced analysis and seamless integration into nutrition platforms.
- Designing a dynamic, **user-first dashboard** leveraging the food database to power nutrient tracking, automated recipe generation, and personalized diet planning, built to improve how users engage with dietary data and optimize health outcomes.

Wachira Wines - Culminating Research Experience Project

San Francisco, California, US

San Francisco State University

Fall 2024

- Analyzed **Shopify sales** data in **Tableau** to identify high-impact sales trends, seasonal demand shifts, and top-selling wine products, uncovering insights that contributed to a 15% increase in quarterly sales.
- Built a personalized wine recommendation engine using **Singular Value Decomposition (SVD)**, boosting customer engagement and unlocking new upselling pathways.
- Simulated advanced pricing and bundling strategies with **Excel Solver** to maximize profit margins and elevate perceived customer value through data-driven product pairings.

Customer Churn Prediction

San Francisco, California, US

San Francisco State University

Fall 2024

- Engineered and evaluated machine learning models (**Logistic Regression, XGBoost, and Naive Bayes**) to predict customer churn, achieving **81.4% accuracy** with XGBoost, highlighting strong model tuning and evaluation skills.
- Used cross-validation (**Grid Search CV**) to tune hyperparameters and conducted feature importance analysis to identify key variables driving churn.
- Improved model performance through data preprocessing, including **feature engineering, transformation, and standardization**.
- Translated predictive insights into actionable customer retention strategies, supporting data-driven decision-making.

Education

San Francisco State University

San Francisco, California

MS in Business Analytics

Aug 2023 - Dec 2024

Manav Rachna International Institute of Research and Studies

Faridabad, India

MSc in Nutrition and Dietetics

July 2016 - May 2018

University of Delhi

New Delhi, India

BSc in Life Sciences

July 2012 - May 2015

Skills

Certificates

Google Data Analytics Certificate

Languages and Databases

SQL, Python, R, Microsoft SQL Server, PostgreSQL, NoSQL, MongoDB, DynamoDB

Data Analytics & BI

Power BI, Tableau, Looker, Excel, Spreadsheets, Access, SAS, SPSS

Machine Learning

Scikit-Learn, XGBoost, LightGBM, TensorFlow, SVD, PCA, K-Means Clustering

Business Analysis

Market Analysis, A/B Testing, Customer retention, Decision Making, Project Management
