Professional Summary

Technically minded software professional with hands-on experience building scalable web and data-driven applications. Proficient across the software development lifecycle, including system design, development, testing, and deployment using JavaScript, React, Node.js/Express, and SQL/NoSQL databases. Experienced in applying machine learning and computer vision techniques with Python, TensorFlow, OpenCV, and YOLO, with a strong focus on code quality, reliability, and performance.

Education

Master of Science in Computer Science
Texas A&M University – Corpus Christi, TX

Jan 2024 – Dec 2025
GPA: 3.3/4.00

Bachelor of Technology in Computer Science
Stanley College of Engineering & Technology for Women, Hyderabad, India

Aug 2019 – May 2023
GPA: 3.77/4.00

Experience

Texas A&M University – Corpus Christi

Graduate Administrative Research Assistant | Supervisor: Debra Alvarado

Jan 2024 – Dec 2025
Corpus Christi, TX

- Maintained and enhanced departmental websites using HTML, CSS, and JavaScript; ensured performance, usability, and security across devices.
- Conducted QA testing, resolved cross-browser issues, and enforced WCAG 2.1 accessibility standards.
- Automated form submissions and approval workflows using Adobe Experience Manager and Laserfiche.
- Integrated document management systems for secure data handling and compliance tracking.
- Analyzed site analytics and collaborated with IT teams to improve backend performance.

Projects

Learnova – AI Personal Knowledge Companion | React, TypeScript, Node.js, Express, GitHub MongoDB, Generative AI

- Built a full-stack AI learning platform that converts documents into summaries, quizzes, flashcards, and Q&A.
- Integrated generative AI services for document understanding and content generation via REST APIs.
- Implemented secure authentication with Passport.js and MongoDB-backed sessions.
- Designed scalable backend workflows for AI orchestration and data export.

Coupon Fraud Detection System | MERN Stack, Isolation Forest, FastAPI, MongoDB GitHub

- Developed a hybrid fraud detection system combining rule-based logic with ML anomaly detection.
- Implemented real-time risk scoring to Allow, Challenge, or Block coupon redemptions.
- Created an admin dashboard with audit logs and explainable fraud decisions.

Technical Skills

Languages: C/C++, Python, Java, JavaScript, TypeScript

Frontend: React, HTML, CSS, Tailwind, Bootstrap, Redux

Backend: Node.js, Express.js, REST APIs, Passport.js

Databases: MongoDB, MySQL

ML/CV: TensorFlow, OpenCV, YOLOv5, Tesseract OCR

Tools: Git, Linux, Docker, VS Code, Jupyter

Cloud and OS: AWS (basic), Linux, cross-platform deployment
