Education

University of California, San Diego

Expected Graduation 2025

B.S. in Pharmacological Chemistry; Minor in Technology, Innovation, and Supply Chain Management

GPA: 3.855

Relevant Coursework: Accounting, Business Analytics, Innovation Strategy, Organic Chemistry, Biochemistry, Drug Design & Synthesis

Experience

BioSapien

San Diego, California

Business Analyst

June 2024 - April 2025

- Analyzed PK/PD and efficacy data from 100+ Phase I oncology trials to identify 10+ high-potential small-molecule candidates for the drug-delivery platform; assessed 15+ market trends to guide key stakeholder pipeline-expansion and partnership strategy
- Authored 10+ business development and investor-relation pitch decks, consolidating 15+ scientific and strategic insights from 3 preclinical studies to provide 5+ value propositions; expanded industry network across 8+ VC and pharma outreach initiatives
- Enabled CMC and regulatory readiness for FDA pre-IND filings by auditing 130+ SOPs and refining briefing materials; oversaw ISO-7 cleanroom onboarding, expanding in-house GMP capacity by 30% to support Phase I trials and future commercialization

HawkPartners

New York, New York

Pharmaceutical Market Research and Strategy Consulting Intern

September 2023 - December 2023

- Executed journey mapping of stakeholder processes, identifying 5+ pain points within oncology treatment, generating a thematic analysis by leveraging 50+ stakeholder insights to assess the impact on 3 client products, and developing 3 strategic priorities
- Analyzed survey data from 100+ healthcare providers, utilizing 250+ data points to generate impact assessments of 5+ potential pharmaceutical products; generated 10+ comparative graphs, forecasting market landscape to inform strategic decision-making
- Conducted secondary research on 300+ drugs in varying stages of clinical trials, identifying 15+ emerging market trends; generated a database of 20+ potential clients, evaluating 30+ pharmaceutical products for strategic insights and opportunities

EmpiricBio LLC

Westlake, California

Business Development and Strategy Intern

June 2023 - September 2023

- Initiated a targeted outreach to 800+ pharmaceutical, biotechnology, and medical device companies through strategic LinkedIn and email campaigns, acquiring 10 clients and facilitating 25+ partnerships, thereby increasing the market presence by 35%
- Developed a cost-benefit analysis to assess the profitability of a collaboration program, analyzing profit and operating margins for 50+ companies; conducted 10+ comparative analyses, delivering 15+ actionable insights into the program's financial viability
- Standardized 3 CRM processes, streamlining workflows to improve lead qualification efficiency by 30% and reduce lead response time by 20%; utilizing inbound techniques to increase client engagement by 25% and outreach efficiency by 15%.

Pareto Care

San Diego, California

Business Strategy Intern

September 2022 - December 2022

- Modeled expenses for 250+ cardiovascular departments, stratified by 5+ hospital classifications, developed a value-based care model, and improved the value proposition by 15%, generating profitability models projecting a 25% increase in hospital profit.
- Researched 150+ Medicare and Medicaid insurance codes to identify 10+ sources of marketplace revenue; developed use cases to shape integration strategies into the healthcare system, enhancing economic value proposition by 75% and product market fit
- Performed market research to propose 5+ international expansion strategies, analyzing through insurance policy frameworks, competitor landscapes, and ease of adoption in 6 countries; identified 3 high-potential markets to develop go-to-market strategies

Leadership & Activities

Lumnus Consulting

La Jolla, California

President, Project Manager

April 2022 - March 2024

- Spearheaded a team of 10 board members, 35+ consultants, and 7 internal committees, achieving a 100% client satisfaction rate, handling over 50+ client interactions per quarter, and implementing strategic initiatives that boosted annual revenue by 25%.
- Developed and implemented an OKR system tracked by 5 KPIs, increasing efficiency and member performance by 65%, by facilitating improved internal communication of objectives and key results, thereby increasing the organizational output by 40%
- Headed a team of 12 consultants as a project manager to evaluate the existing market positioning and landscape to create growth strategies that increased the client acquisition rate by 30% and identified 3 new competitors in the healthcare market segment.

Dennis Carson Laboratory at UCSD Health

La Jolla, California

Undergraduate Researcher

December 2022 - December 2023

- Conducted research on 15+ organic compounds as potential vaccine adjuvants by identifying 3 synthetic pathways for compounds that modulate innate immunity based on the nature of their functional groups that determine the reactivity.
- Developed a precise standard curve using Excel and UV-Vis spectroscopy, involving the measurement and analysis of absorbance data from 50+ samples of varying dilutions to determine the optimal concentration for a new drug formulation
- Analyzed 20+ academic journals to identify and optimize synthesis pathways for novel chimeras, resulting in an increase in Calcium (II) ions secretion in targeted cell models; successfully proposed 5 potential synthesis pathways for the chimeras
