Professional Summary

Results-driven Python Full Stack Developer with over 4 years of experience in building scalable, secure web applications using Python, Django, React, and AWS. Proven success in delivering RESTful microservices, integrating CI/CD pipelines, optimizing database performance, and deploying containerized applications on Kubernetes. Adept at collaborating with cross-functional teams using Agile methodologies to deliver high-quality software on schedule. Skilled in infrastructure automation, performance tuning, and secure coding practices.

Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS

Frameworks: Django, Django REST Framework, React.js, Node.js

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Tools: AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes (EKS), Terraform, GitHub Actions, Jenkins, Git

Testing tools: Pytest, Postman, Jest, Selenium

Work Experience

S&P Global, New York

May 2023 - Present

Python Full Stack Developer

- Developed and maintained web applications using Python, Django, and React, resulting in a 30% increase in user engagement.
- Designed RESTful APIs using Django REST Framework to support real-time data ingestion, reducing backend latency by 30%.
- Built dynamic UIs in React with TypeScript and Material UI, enhancing rendering performance and UX.
- Deployed microservices on AWS (EC2, S3, RDS, Lambda) using Terraform for IAC, ensuring consistent environments and 99.9% uptime.
- Implemented containerization using Docker and deployed on EKS, enabling zero-downtime rolling updates.
- Created automated CI/CD pipelines using GitHub Actions and Jenkins, reducing release cycles from weekly to daily.
- Optimized PostgreSQL database queries and schemas, cutting execution time by 25% for 100k+ daily transactions.
- Led Agile ceremonies, maintained 95% sprint success rate by collaborating with PMs, designers, and QA.
- Integrated ELK Stack and Prometheus/Grafana for observability; enforced security via static code analysis and OWASP practices, lowering vulnerabilities by 40%.

Avenir Technologies, Hyderabad

Aug 2019 - Sep 2021

Python Web Developer

- Developed and deployed Django-React applications, resulting in 20% user base growth.
- Boosted page load speed by 35% through MySQL query optimization and performance profiling.
- Developed and secured RESTful APIs using Django REST Framework for core backend operations and Node.js (Express) for asynchronous, read-only endpoints in an internal dashboard, improving data exchange efficiency by 50%.
- Conducted peer code reviews, reducing bugs by 15% and enhancing maintainability.
- Collaborated with cross-functional teams to deliver features within scope and deadlines.

Projects

Visitor Management System

- Integrated ID reader hardware to automate check-ins, reducing check-in time by 40% and data errors by 25%.
- Developed secure APIs using Django REST Framework for real-time data transmission.

- Built a responsive React interface that increased user satisfaction by 20% and reduced load times by 30%.
- Designed a scalable PostgreSQL database supporting 10,000+ visitor records.

Employee Management System

- Integrated biometric machines for accurate attendance tracking, reducing errors by 90%.
- Optimized Django APIs, resulting in a 50% improvement in system response times.
- Built a user-friendly React UI, reducing page load times by 40%.
- Structured MySQL schemas for integrity and boosted retrieval performance by 30%.

Education

Master of Computer Science from University of Bridgeport, CT [may, 2023]

Bachelor of technology (Btech) from JNTUH, Hyderabad [July, 2019]
