PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of experience building high-performance, secure, and scalable web applications using React.js and Node.js. Adept at designing RESTful APIs with Express.js and managing both SQL (PostgreSQL) and NoSQL (MongoDB) databases. Experienced in GraphQL integration, Docker-based deployments, and configuring CI/CD pipelines using GitHub Actions and CircleCI. Proven ability to implement secure authentication using OAuth2 and JWT, and build responsive, accessible UIs using Tailwind CSS and Next.js. Strong understanding of Agile workflows and compliance-aware development within regulated industries.

SKILLS

- React.js (Hooks, Redux, Component Design)
- Node.js with Express.js (REST API Development)
- PostgreSQL (Schema Design, Query Optimization)
- MongoDB (Indexing, Aggregation Pipelines)
- GraphQL (Schema & Resolver Implementation)
- HTML5, CSS3, JavaScript
- Tailwind CSS
- Next.js 13/14 (App Router & SSR)
- OAuth2 & JWT (Authentication & Security)
- Docker & Kubernetes
- CI/CD with GitHub Actions & CircleCI
- Git & GitHub (Version Control, Branching)
- AWS (EC2, RDS, S3)
- Testing Frameworks (Jest, Mocha)
- Agile/Scrum (Sprint Planning, Stand-ups)
- Compliance-Aware Development (Data Privacy & Financial Regulations)

EXPERIENCE

- Full Stack Developer

Faststream Technologies | California, United States

June 2024 - Current
- Engineered high-performance web applications using React (Hooks, Context API), Tailwind CSS, and Node.js (Express.js), achieving a 30% increase in page load speed and improved user engagement.
 - Built and optimized RESTful and GraphQL APIs to reduce client-server data fetch latency by 25%, streamlining real-time data exchange across platforms.
 - Deployed and managed scalable cloud infrastructure on AWS (EC2, S3, RDS), ensuring 99.9% uptime and supporting seamless autoscaling for growing traffic demands.
 - Implemented JWT and OAuth2-based authentication with secure token rotation, safeguarding sensitive user data and enforcing role-based access control across microservices.

- Boosted backend efficiency by optimizing PostgreSQL and MongoDB queries and indexing strategies, reducing query response time by 40% in large-scale transactional systems.
- Configured CI/CD pipelines using GitHub Actions and CircleCI, reducing deployment times by 85% and enabling rapid, reliable production pushes.
- Integrated third-party services like Stripe, Twilio, and OAuth providers, enhancing platform features with real-time alerts, secure payments, and federated login.
- Leveraged GitHub Copilot and Tabnine to improve code generation and testing efficiency, leading to a 15% drop in QA-reported bugs.
- Spearheaded frontend implementation from Figma prototypes, achieving full responsive design with 100% pixel accuracy across devices and screen sizes.
- Introduced server-side rendering (SSR) and dynamic routing using Next.js App Router, enhancing SEO performance and initial load times.

Full Stack Developer

January 2021 - July 2023

Techtic Solutions Pvt. Ltd. | India

- Developed, tested, and deployed enterprise-grade platforms and landing pages using Next.js 13/14 (App Router, SSR), React, and Node.js, ensuring responsive design and optimal performance.
- Designed and built reusable UI components with React.js and Tailwind CSS, contributing to a 30% reduction in UI development time.
- Integrated RESTful APIs using Express.js, maintaining secure and scalable communication between frontend and backend services.
- Developed scalable PostgreSQL schemas and implemented data migration strategies for production-grade web applications.
- Increased organic traffic by 38% through SEO-optimized SSR using Next.js.
- Implemented secure authentication using OAuth2/JWT, complying with data security standards.
- Conducted comprehensive code reviews and enforced GitHub workflows, reducing post-release bugs by 20%.
- Resolved high-severity production issues within SLA timelines, maintaining 98% service uptime.
- Aligned RESTful API development with financial industry standards for secure, auditable access.
- Collaborated in Agile sprints with QA teams, ensuring on-time delivery of SaaS solutions.

EDUCATION

Master of Science (M.S.) - Computer Engineering

May 2025

California State University, Northridge, Northridge, California

Bachelor of Engineering - Electrical & Electronic Engineering

July 2022

Amrita School Of Engineering, India
