Profile

Supply Chain and Operations Analyst with 4+ years of experience in inventory management, logistics, and process improvement across manufacturing and e-commerce environments. Skilled in tools like Python, SQL, Power BI, SAP ERP, and Oracle Cloud for data analysis and reporting. Known for a detail-oriented, practical approach to improving efficiency and supporting cross-functional teams. Certified in Six Sigma Green Belt and Data Engineering, with a strong foundation in supply chain systems and analytics.

Skills

- **Data Analytics & Programming:** Python (Pandas, Scikit-learn), SQL, Power BI, Microsoft Excel (Pivot Tables, VLOOKUP), Data Cleaning & Preprocessing, Regression Modeling, Statistical Analysis (Hypothesis Testing, Trend & Correlation Analysis), KPI Tracking, Dashboard Development
- **Enterprise & Warehouse Systems:** SAP ERP, Oracle Cloud Applications, Oracle Fusion HCM, Configure Price Quote (CPQ), Logiwa WMS
- **Supply Chain & Operations Management:** Inventory Management, Order Fulfillment, Warehouse Performance Monitoring, Procurement Coordination, JIT Replenishment, Production Planning, SOP Documentation, Logistics & Distribution
- **Process Improvement & Quality:** Lean Manufacturing, Six Sigma Methodologies, Cycle Time Reduction, Scrap Rate Optimization, Quality Assurance, Workflow Standardization, Operational Efficiency
- **Productivity & Documentation Tools:** Microsoft Word, PowerPoint, Teams, Outlook, AutoCAD

Professional Experience

Supply Chain Analyst

Feb 2023 – Present

Ship cube LLC, Fresno

- Managed daily inventory and processed 150+ customer orders using Logiwa WMS and SAP ERP, ensuring accuracy and timely fulfillment across 3+ online sales channels.
- Utilized Power BI and Excel Pivot Tables to analyze warehouse performance data, supporting insights that helped reduce order processing time by 10–15%.
- Performed basic SQL queries to extract order and inventory data, aiding in weekly reporting and stock reconciliation activities.
- Documented 20+ warehouse SOPs using Microsoft Word and PowerPoint, standardizing receiving, stocking, and outbound logistics workflows.
- Coordinated with UPS, FedEx, and USPS to schedule and track daily shipments, contributing to a 98%+ fulfillment rate and reduced delivery delays.
- Participated in bi-weekly inventory audits and helped resolve stock discrepancies, maintaining inventory accuracy above 95%.
- Collaborated cross-functionally using Microsoft Teams and Outlook to align order fulfillment, shipping schedules, and inventory restocking priorities.

Operational Analyst

May 2020 – Dec 2021

Sri Venkateswara Engineering Works

- Coordinated daily production workflows across 3+ manufacturing lines, managing 15–20 work orders per shift and verifying raw material availability to support timely execution.
- Tracked inventory levels and monitored material usage trends, helping reduce raw material stockouts by up to 25% through proactive replenishment aligned with JIT practices.
- Partnered with planning and operations teams to optimize schedules, contributing to a 10–15% improvement in on-time production delivery rates.
- Identified process gaps and supported lean initiatives that led to a 5% reduction in cycle time by assisting in standardizing routine tasks and minimizing material handling delays.
- Maintained detailed production logs and generated weekly inventory reports in Excel, reviewing historical usage data across 3+ SKUs to aid in capacity planning and forecasting.
- Operated in a high-paced environment processing 100+ units/day, gaining practical exposure to cross-functional operations and the full supply chain lifecycle.
- Assisted in analyzing operational data and identifying key improvement opportunities, supporting weekly KPI reviews and aligning production metrics with business goals.

Industrial Engineer

May 2019 – Apr 2020

Surya Tech

- Tracked usage trends for 100+ raw material SKUs weekly using Microsoft Excel and Pivot Tables, helping maintain consistent material availability and reduce production flow interruptions.
- Coordinated with 5+ external suppliers to ensure on-time delivery of raw materials, contributing to a 20% reduction in machining delays and improved production continuity.

- Analyzed machining tolerances across multiple parts and supported process changes that led to an estimated 15% decrease in scrap rates, driving cost-efficiency in operations.
- Documented and reviewed quality assurance data for 200+ finished components per month, enabling more accurate forecasting and decision-making in procurement and planning.
- Maintained detailed shipment and logistics records for 300–400 finished components weekly, supporting inventory accuracy and streamlined distribution tracking.
- Assisted in process audits and workflow reviews that helped reduce inventory update time by 25%, supporting continuous improvement across manufacturing support functions.
- Gained cross-functional exposure to lean manufacturing, production scheduling, and supply chain coordination across a 3-line machining facility, building a holistic understanding of industrial operations.

Projects

Data Analyst

Aug 2023 – Dec 2023

California State University, Fresno

- Built machine learning models (linear & multivariate regression) using Python (Pandas, Scikit-learn) and SQL to forecast crop yields from agricultural datasets.
- Conducted data preprocessing, statistical analysis, and created reports with visual insights in Excel and PowerPoint to support precision agriculture decisions.

Four-Way Hacksaw System

Aug 2018 – Sep 2018

Engineering Capstone Project

- Designed and fabricated a multi-directional four-way hacksaw machine using principles of mechanical design, CAD modeling, and workshop safety standards.
- Optimized the system for increased material cutting efficiency, operational stability, and reduced cycle time across multiple axes.
- Integrated into machining workflow, ensuring structural alignment, precise cutting, and compliance with manufacturing safety protocols.

Education

Masters' Degree, Industrial Technology

Jan 2022 – Dec 2023

California State University Fresno, CA

Bachelors' Degree, Mechanical Engineering

Jul 2015 – May 2019

Vignan University

Related Coursework & Projects

Supply Chain Optimization, Warehouse Management Systems, and Logistics

Aug 2022 – Dec 2023

California State University, Fresno

- Applied lean and quality management concepts from Quality Management Technologies to reduce warehouse waste and enhance operational efficiency.
- Gained practical exposure to smart manufacturing, automation, and sensor technologies through Advanced Manufacturing Systems and Application of Sensor Technologies.
- Analyzed supply chain data for decision-making in Product Data Analytics; explored autonomous logistics applications in Self-Driving Vehicles; researched scalable systems in Intelligent Big Data Technologies.

Go-Kart Competition

Oct 2018

- Installed and calibrated mechanical systems (steering, suspension, braking, drivetrain) to enhance vehicle handling and ensure performance under high-speed competitive conditions.
- Led troubleshooting and testing protocols for safety and system reliability.

2D Drafting Project

May 2016 – Jun 2016

Vignan University, India

- Designed technical drawings using AutoCAD 2016, implementing precise 2D drafting techniques and optimizing tool settings for accuracy and workflow efficiency.

Certificates

- Six Sigma Green Belt™ (CSSGB™) – International Six Sigma Institute
- Oracle University Certificate – Oracle Cloud Applications Overview
