

MAHESH BHAVITHA

513-413-9969 | maheshba@mail.uc.edu | [linkedin.com/in/bhavithamahesh/](https://www.linkedin.com/in/bhavithamahesh/) | Cincinnati, OH

EDUCATION

Master of Science | University of Cincinnati, Cincinnati, OH | CGPA: 3.9 | **Aug 2024 – Present**

Bachelor of Technology (Minor) in Data Science | JNT University, Hyderabad | CGPA: 9.3 | **Dec 2022 – Jun 2024**

Bachelor of Technology in Information Technology | JNT University, Hyderabad | CGPA: 9.3 | **Dec 2020 – Jun 2024**

SKILLS

- **Programming Languages:** Python, R, Java, SQL, C, Jupyter, Linux
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, Matplotlib, Seaborn
- **Big Data & Databases:** Hadoop, Hive, Pig, MongoDB, Firebase, SQL
- **Cloud & DevOps:** Microsoft Azure (Certified), Docker (Basics)
- **Web Technologies:** HTML5, CSS3, JavaScript, React.js
- **Other Tools:** Excel (Advanced), Tableau (Basics), Firebase

EXPERIENCE

Intern – Data Analyst | Innominds, Hyderabad, India | Jan 2024 – Jul 2024

- Profiled and cleaned bulk client data in Python, SQL, and Excel to derive usable business insights.
- Designed interactive dashboards in Excel and Tableau to be used by internal stakeholders to enhance the efficiency of reporting by 30 percent.
- Cleaned and pre-processed 100,000+ data records to guarantee the predictive analytics models' accuracy and reliability.
- Worked with senior analysts to build classification and forecasting models to increase the accuracy of decision-making by 12%.
- Scripted routine data reporting processes in Python and cut down on manual overheads by 40 percent.

Research Assistant - CVR College of Engineering | Feb 2023 – Dec 2023

- Conducted literature reviews and data analysis for 5+ AI-driven healthcare projects focused on early disease diagnosis.
- Facilitated in designing and evaluating 4 machine learning models for medical imaging and symptom-based prediction, improving AUC by 16%.
- Collaborated with faculty, demonstrating teamwork, on writing 3 technical papers and 2 conference submissions related to deep learning in health informatics.
- Directed improvement of model accuracy by 4% through strategic decision-making, iterative tuning, and implementing ensemble techniques.
- Managed preprocessing of 100,000+ data points, model validation, and performance benchmarking using Python and TensorFlow, showcasing effective multitasking and reducing runtime by 5%.

PROJECTS

Hybrid Recommender System (Python, Keras, NLP, Deep Learning, Movielens100k)

- Built a hybrid recommender system integrating content-based and collaborative filtering, improving accuracy by 2% using dashboard-sourced preferences.
- Extracted user/item features from 100,000+ reviews via NLP to support cold-start user recommendations.
- Improved cold-start accuracy by 28% for new users with minimal history, reducing irrelevant suggestions.

Cryptocurrency Price Prediction (Python, SAM-LSTM, Deep Learning, BTC Price API)

- Collected and cleaned real-time Bitcoin data using APIs, reducing preprocessing errors by 25% for time-series modeling.
- Implemented SAM-LSTM architecture with attention mechanisms, improving feature weighting accuracy by 15% in high-volatility datasets.
- Achieved 89% prediction accuracy in 5-day rolling price forecasts, outperforming standard LSTM by 11%.

Phishing Email Detection (Python, Scikit-learn, Random Forest, NLP)

- Built a phishing detection model using Random Forest on a labelled dataset of 10,000+ emails.
- Extracted 15+ features including URL patterns, header anomalies, and NLP-based text cues.
- Analysed Logistic Regression, SVM, and Random Forest, achieving the highest F1-score with Random Forest.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals – Microsoft
- Artificial Intelligence – Silver Certified – [Wipro](#)
- Cloud Computing – Silver Certified – [Wipro](#)
- Cyber Security – Bronze Certified – [Wipro](#)
- Python for Data Science – Elite Certified – [NPTEL](#)

ACHIEVEMENTS

- **Organizational Secretary:** Led a university-level hackathon “Code Hunt” with 100+ participants and coordinated end-to-end logistics.
