

MAHESHWARI KATNAPALLY

Data Analyst

(682) 597-2910 | maheshwari.katnapally@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with 3.5 years of experience working with **Python, SQL, R, and Power BI** to transform complex data into clear, actionable insights. Skilled in **cleaning and organizing data**, building **dashboards**, and automating **reporting** processes to improve accuracy and efficiency. Strong background in **problem-solving** and **data automation** from prior industry roles, reinforced by a master's in information technology with projects focused on real-world **data scraping, analysis, and visualization**. Excited to bring both technical expertise and analytical thinking to help teams make informed business decisions.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, R
- **Data Analysis & Visualization:** Power BI, Tableau, Advanced Excel, Statistical Analysis
- **Programming & Databases:** Python, SQL, R, MySQL, PostgreSQL, MongoDB
- **Core Strengths:** Data Cleaning, Query Optimization, Dashboarding, ETL, Reporting
- **Other Tools:** Git, Jira

PROJECTS

Legislative Vote Data Scraper | Python (BeautifulSoup, Pandas, PyMuPDF)

- Built a Python tool to scrape legislative vote records from Oklahoma House websites by parsing HTML with BeautifulSoup.
- Collected and cleaned structured roll call data, bill details, and legislator information into tabular format using Pandas.
- Automated text extraction from PDFs containing representative details with PyMuPDF, improving data completeness and accuracy.
- Exported processed datasets to CSV for downstream analysis and visualization.

Census Data Insights Dashboard | Power BI (Academic Project)

- Created an interactive dashboard by analyzing UCI Adult Census data across demographics, education, and income, which showed income gaps by education level and workforce participation by gender.
- Summarized findings in an executive-style report with 3+ visualizations tailored for non-technical readers.

PROFESSIONAL EXPERIENCE

PYTHON DEVELOPER | Tata Consultancy Services | Hyderabad, India

Jan 2021 – Mar 2023

- Built a Python-based CLI that combined two APIs into one command, streamlining workflows and reducing integration effort.
- Automated service deployments using Python and Ansible, transforming manual, error-prone processes into repeatable and reliable operations.
- Developed Python monitoring scripts to track Docker container health, enabling proactive detection and automated recovery instead of reactive troubleshooting.
- Extended certificate monitoring scripts to include PKI-generated certs, ensuring complete coverage and uninterrupted service availability.
- Enhanced REST APIs with Kafka event notifications, converting static logs into real-time, event-driven data pipelines for improved observability.
- Investigated production issues using log analysis, resolving root causes and improving long-term system stability.

TECHNICAL SUPPORT ENGINEER | Tata Consultancy Services | Hyderabad, India

Aug 2019 – Dec 2020

- Resolved technical issues for Microsoft applications, ensuring 99% uptime
- Conducted root cause analysis, reducing repeat incidents by 25%
- Provided technical training to junior team members, improving onboarding efficiency by 20%.

STUDENT REPORTER (PART-TIME) | Collegio Newspaper | Pittsburg, KS

Aug 2024 – Dec 2024

- Reported on campus events and authored opinion pieces, strengthening communication and storytelling skills.
- Contributed to a 10% increase in reader engagement by delivering timely and diverse content.

EDUCATION

MASTER'S DEGREE | Information Technology | Pittsburg State University

(Relevant coursework: Python Programming, VB.NET & Excel, Database Management Systems (DBMS), Statistical Application of Data Analysis)

BACHELOR'S DEGREE | Electronics & Communication Engineering | GuruNanak Institutions Technical Campus
