EDUCATION

Hunter College

Bachelor of Arts in Computer Science, Minor in Mathematics

Honors: Dean's List, Fall 2022 - Spring 2025

Relevant Coursework: Object-Oriented Programming, Discrete Structures, Data Structures and Algorithms, Computer Architecture, Computer Theory, Introduction to Blockchain, Operating Systems, Digital Image Processing, Digital Product Development

New York, NY

May 2026

GPA: 3.7 / 4.0

EXPERIENCE

Johns Hopkins Applied Physics Laboratory

Software Engineer Intern

June 2025 - August 2025

Laurel, MD

- Engineered **GitLab CI/CD** pipelines using **Node.js** with integrated **Fortify SAST** and **DAST** scans, cutting manual build time by **65%** while enforcing secure, production-ready deployments
- Implemented **25+** frontend unit and integration tests for a **Vue.js** GUI integrated with **RESTful backend APIs** using **TypeScript**, **Jest**, and **AstroUX**, boosting UI code coverage by **40%** and enabling rapid regression detection
- Developed a **Python** tool leveraging **NetworkX**, **graph algorithms**, **YAML**-defined scenarios, and **Docker**-based **GNS3** with **iPerf** traffic simulation, validated using **Wireshark**, to optimize mission-critical **C3 network topologies**, improving performance by **50%**
- Validated telemetry dashboards for **RF signal processing**, increasing observability by **45%** and reducing diagnosis time by **35%**

NYC Administration for Children's Services

Wireless Asset Management Intern

January 2025 - April 2025

New York, NY

- Automated reporting pipelines with **Excel** and **Exchange** integrations, increasing inventory data accuracy by **25%** and reducing manual reporting time by **20 hours** monthly
- Orchestrated lifecycle tracking for **100+ wireless devices** using **Excel** and asset management tools, improving data integrity by **28%** through automated validation workflows and structured audits

Consolidated Edison

Network Engineer Intern

June 2024 - August 2024

New York, NY

- Designed a **Clipboard API** using **JavaScript**, **HTML**, and **CSS**, eliminating manual copying tasks in internal network documentation, and conserving **80+ hours** per year for team members
- Developed a **PowerShell** script to check for **100+** broken links and created a detailed **CSV report** with **Excel**, refining site navigation and saving **150+ hours** of maintenance time annually
- Applied **Git** protocols for **version control** and **code updates**, preventing **\$1,000** in annual costs by avoiding deployment mistakes
- Streamlined network troubleshooting by reducing **12 hours** of team effort on critical issues through identifying and labeling unlabeled circuits, configuring **Cisco routers** and **static routing** using **PuTTY**, and applying **OSI model principles**

NYC Department of Social Services

Software Engineer Intern

June 2023 - August 2023

New York, NY

- Enhanced **Salesforce** and **Excel** workflows, cutting **\$10,000** in annual costs and elevating data accuracy by **60%** across departments
- Resolved **200+** technical issues for end-users, including software installation and configuration, achieving a **95% satisfaction rate**
- Revamped ticketing systems to track **120+** incidents, accelerating resolution time by **15 minutes** and supporting IT infrastructure
- Collaborated with engineering and product teams to optimize document systems, expediting document processing by **2 hours per project**

PROJECTS

FuelUp | Website | Source Code

TypeScript | Next.js | Express.js | PostgreSQL

- Implemented a scalable inventory system with **TypeScript**, **Next.js**, **Express.js**, and **PostgreSQL**, enabling dual-role access for **500+ campus users** to log itemized food withdrawals and restocking in real-time, reducing manual tracking errors by **40%**
- Built an analytics dashboard using **SQL** and **TypeScript** to surface trends for **20+** high-demand essentials and peak visit patterns, informing procurement strategies that improved order accuracy by **25%**

GradeMyProfessor | Website | Source Code

React | Django | PostgreSQL

- Launched a course evaluation platform with **Django REST Framework** backend and **React**, serving **1,000+ CUNY Hunter students**
- Designed **PostgreSQL** schemas to support efficient professor search, grade histograms, and review submissions across **100+** courses

La Liga Zone Fantasy | Website | Source Code

React | Spring Boot | PostgreSQL | Python

- Engineered **data pipelines** to scrape match stats for **700+ players** using **Python** and **Pandas**, powering **live soccer analytics** for fans and analysts through a **Spring Boot** dashboard
- Developed a **scikit-learn** match-outcome model with **87% accuracy**, streaming results to **50+ internal users** through a **React** interface backed by real-time **PostgreSQL** queries

TECHNICAL SKILLS

- Languages:** Python, C++, Java, JavaScript, TypeScript, SQL, HTML, CSS, MIPS Assembly, PowerShell, Bash
- Frameworks / Libraries:** Spring Boot, Pandas, NumPy, Matplotlib, React, Vue.js, Node.js, Express.js, Next.js, Flask, PyTorch, Django
- Developer Tools:** AWS, Git, Docker, Postman, PostgreSQL, Jira, Azure, Google Cloud Platform, Unix, Supabase, MongoDB, Firebase
- Certifications:** Codepath Introduction to Web Development 101, Codepath Intermediate Web Development 102
