

MAHIPAL REDDY GUMIREDDY

4355 south bobcock st Apt 9303, Melbourne Florida, 32901 | +1(816) 715-8248 | mahipal.gumireddy@gmail.com | [Linkedin](#)

Summary

Proficient Full Stack Software Developer with 5+ years of experience in designing and implementing scalable microservices architecture using Java, Spring Cloud, and Angular, ensuring high performance and reliability. Skilled in Java development and leveraging AWS services to deliver efficient and high-quality software solutions. Adept at writing clean, maintainable code following best practices and industry standards to ensure scalability and reliability. Strong collaborator with cross-functional teams, fostering effective communication and teamwork to ensure seamless project execution and timely delivery of solutions.

Skills

- Methodology:** SDLC, Agile, Waterfall, SOLID principles, Test-Driven Development (TDD), Behavior-Driven Development (BDD), Scrum, Pair Programming.
- Databases:** MySQL, PostgreSQL (RDBMS), MongoDB (NoSQL), Oracle, PL/SQL, DB2, Cassandra, DynamoDB, Redis.
- Languages:** Java, Python, SQL, C, JavaScript, TypeScript.
- Architecture:** Monolithic, Microservices, MVC Architecture, Event-Driven Architecture.
- Cloud-Native Technologies:** AWS Lambda, EC2, S3, IAM, VPC, ECS, Elastic Beanstalk, CloudFormation, API Gateway.
- J2EE Technologies:** Servlets, JSP, JSTL, JavaBeans, JDBC, JMS.
- Frameworks:** Spring MVC, Spring Boot, JSF, Hibernate, JPA, Node.js, Express.js, Spring REST, Spring Security, Spring Cloud, Log4j, Spring ORM.
- Container Orchestration Tools:** Docker, Kubernetes, K8s, Helm.
- Web Technologies:** HTML5, CSS3, JavaScript, Angular, React, JSON, XML, Bootstrap.
- Process Orchestration Tools:** Camunda, Jenkins, Apache Kafka.
- Version Control Tools:** Git, GitHub, GitLab, Bitbucket, SVN.
- Testing Tools:** Mockito, JUnit, Postman, Newman, Selenium, JMeter.

Experience

Full Stack Developer Cigna Healthcare	06/2023 to Current USA
- Implemented robust role-based access control (RBAC) using Spring Security, integrating HTTP Basic Authentication and JWT for secure API session management and fine-grained user access control. - Designed and developed an automated attendance tracking system, reducing manual entry efforts and decreasing administrative workload by over 30%. - Optimized backend performance by applying effective indexing strategies in both MySQL and MongoDB, significantly reducing query execution times and improving overall API responsiveness. - Containerized the application using Docker, ensuring seamless cross-environment deployments and integrated the solution into CI/CD pipelines for automated testing and continuous delivery. - Boosted application efficiency by optimizing SQL and NoSQL queries, resulting in a 30% improvement in data retrieval speed and responsiveness. - Managed scalable deployments using Kubernetes and Helm, maintaining high availability, fault tolerance, and streamlined version control across environments. - Deployed and maintained full-stack applications on AWS, leveraging services like EC2, ECS, and AWS Lambda to ensure cost-effective scaling and operational resilience. - Configured and monitored AWS API Gateway for traffic management, request routing, access control, and real-time API analytics, ensuring performance and security compliance.	
Full Stack Software Developer Lenskart	10/2020 to 08/2021 India
- Developed and maintained scalable web applications using Java, Spring Boot, React, and Node.js, ensuring seamless integration between front-end and back-end components. - Reduced critical system defects by 32% through in-depth debugging, root cause analysis, and proactive performance tuning, resulting in enhanced application stability and reliability. - Designed and implemented RESTful APIs using Spring Boot and MongoDB, enabling efficient data exchange and flexible handling of NoSQL data models. - Enhanced system performance by identifying and resolving application bottlenecks, improving speed, scalability, and overall user experience through advanced full-stack optimization techniques. - Built and deployed containerized applications with Docker and Kubernetes, streamlining deployment workflows and supporting horizontal scaling in cloud-native environments. - Applied Agile methodologies to improve project delivery cycles, actively participating in sprint planning, daily stand-ups, and retrospectives to ensure continuous improvement. - Integrated modern frameworks and libraries into the tech stack, maintaining code quality and adherence to industry best practices and security standards. - Collaborated with cross-functional teams, including designers, QA, and DevOps, to deliver robust and user-centric solutions through clear communication and technical leadership. - Utilized AWS cloud services (such as EC2, S3, Lambda) and DevOps tools to develop, deploy, and manage scalable applications with high availability and fault tolerance.	
Software Developer BharatPe	02/2018 to 09/2020 Remote, India
- Tested and debugged Java-based software applications, reducing critical defects by 20% and significantly enhancing the reliability of transaction processing systems. - Designed and developed scalable applications using Java, Spring Boot, MySQL, Kubernetes, Docker, and Gradle, enabling maintainable and high-performance solutions. - Deployed and managed containerized applications with Docker and Kubernetes, ensuring smooth scalability, high availability, and consistent deployment across environments. - Resolved complex bugs efficiently, contributing to improved system stability, reduced downtime, and a better user experience. - Collaborated in Agile development environments, actively engaging in sprint planning, backlog grooming, and retrospectives to ensure on-time and high-quality project delivery. - Engineered optimized data pipelines to process large datasets, reducing data processing time by 30% and enhancing overall system performance. - Utilized Java and big data technologies to design high-performance pipelines capable of efficiently managing large-scale data ingestion, transformation, and storage tasks.	

Certifications

- AWS Certified Solution Architect - Associate

Education

Bachelor of Technology: Electronics and Communication Engineering Reva University	2019 INDIA
Master of Science: Computer Science University of Missouri – Kanas City	2022 USA
