

MAITRI PATEL

E-mail ID: maitripatel0508@gmail.com || (M):+1 980-240-0636
Harrisburg, North Carolina, 28075.

Objective

Analytical and detail-oriented Computer Science graduate with a concentration in Data Science and a Graduate Certificate in Software Development. Demonstrates hands-on experience in data analysis, business intelligence, and reporting. Proficient in SQL, Python, Tableau, and automation tools to extract insights, improve workflows, and support data-driven decision-making. Committed to leveraging data-driven strategies to solve business challenges and support organizational success.

Education

University of North Carolina, Charlotte Bachelor of Computer Science concentration in Data Science	(NO SPONSORSHIP NEEDED)
University of North Carolina, Charlotte Software Development, Graduate Certificate	January 2024-December 2024

Skills

- **Data & BI Tools:** SQL, Power BI, Tableau, Advanced Excel, Google Sheets
- **Programming:** Python (Pandas, NumPy), R, Java
- **Data Handling:** Data Cleaning, Data Wrangling, ETL (Informatica, Spark)
- **Visualization & Reporting:** Tableau, Power BI, AWS (EC2, S3), Jenkins, GitLab
- **Tools & Frameworks:** Jira, Agile/Scrum, Automation Anywhere, Splunk
- **Databases:** MySQL, MS Access
- **Other:** Microsoft Office Suite, HTML, CSS, JavaScript, Statistical Analysis

Experience

TIAA-Financial Services, Charlotte, NC Technical Associate, Data Analyst	June 2021 – September 2022
---	-----------------------------------

- Created interactive dashboards using Tableau and Power BI to visualize KPIs and drive executive decision-making.
- Automated data collection and transformation processes using SQL and Python, reducing manual effort by 40%.
- Collaborated with cross-functional teams to gather business requirements and deliver analytical solutions.
- Conducted ETL processes, data modeling, and built scalable data pipelines using SQL and Spark.
- Interpreted large datasets to uncover actionable insights, presenting findings to stakeholders.
- Led automation projects with Automation Anywhere to streamline email and data reporting workflows.

Business Analyst	June 2020 – June 2021
• Analyzed service metrics using Excel and SQL to assess IT group performance against targets. • Partnered with developers in an Agile/Scrum team to improve processes and capture business requirements. • Applied AWS tools and Python for streamlining data analysis and visualizing insights.	

TIAA-Financial Services, Charlotte, NC Project Management, Internship	June 2019 – August 2019
--	--------------------------------

- Followed instructions and delivered assigned work as evidenced by the assistance provided during the Alignment summary file creation and the Initiative/Program/Project budget updates for a horizontal fee.
- Quickly picked up skills to understand and learn, clarity demonstrated through report testing and updating SLT sponsor information in Clarity.
- Helped with data mining on the Nuveen Initiative/Program Projects in Clarity and Hyperion Files.
- Gap analysis of meeting attendees through the remainder of the year for CS&T Governance meetings and Change Leader meetings.
- Attended almost all the events that took place on campus and attended the voluntary service opportunity given by TIAA.
- Worked on Tableau reporting and visualizing.

Technology Support Desk Assistant, Atkins Library, University of North Carolina, Charlotte	January 2019- December 2019
---	------------------------------------

- Used Microsoft Office to solve problems and accomplish goals.
- Assisted with phone calls of International Students and guided them in selecting the appropriate program.
- Provided support to the administrative team, doing such things as Front desk receptionist, filing, copying, inventory supplies, running errands, and other general office duties.
- Demonstrated responsible work habits.
- Build collaborative relationships with fellow team members.
- Operated and supported 3D, large format printing, laser cutters, and desktop CNC routers in the makerspace.
- Accommodated with EZ studio, visualization lab, and Gaming lab.

Projects

Dimensional Data Modeling for Data Warehouse System

- Designed a data warehouse system for an e-commerce online sales business to achieve fast query performance.
- Defined multiple metrics (e.g., product revenue churn) to help address business questions related to online sales.
- Utilized Advanced analytical and Windows functions with CTE expression to query all the business questions, and performed time series analysis using Python to forecast online sales.

Data Mining and Visualization

- Mine data from various databases, implement data models, analyze information, and generate actionable business insights.
- Build interactive dashboards to visualize filtered information and help address business problems

Certificates

- [Google IT Automation with Python Professional Certificate](#)
