

Patel Maitri

Business Intelligence Analyst

mrt.patel02@gmail.com | (617) 468 6580 | LinkedIn

Business Intelligence and Data Analyst with hands-on experience across financial services and fintech domains, delivering insights through SQL, Python, Power BI, Tableau, and advanced Excel. Skilled in ETL development, data modeling, and cloud platforms (AWS, Azure, GCP) to design scalable and accurate reporting solutions. Adept at KPI reporting, predictive analytics, and data governance to support compliance and strategic decision-making. Proven ability to collaborate with cross-functional teams and translate business requirements into data-driven solutions that drive measurable business outcomes.

Core Skills

- **Databases & Querying:** SQL (Joins, CTEs, Window Functions), PL/SQL, Oracle, MySQL, PostgreSQL, Microsoft SQL Server, AWS Redshift, BigQuery
- **BI & Visualization Tools:** Power BI, Tableau, Looker, Google Data Studio, Microsoft Excel (Advanced Pivot Tables, Power Query, DAX, Data Visualization Best Practices, Storytelling, Executive Reporting)
- **Programming & Data Analytics:** Python (Pandas, NumPy, Matplotlib, Seaborn), R (dplyr, ggplot2), Excel VBA, Jupyter Notebooks, Statistical Analysis, Predictive Modeling
- **Cloud & Data Engineering:** AWS (S3, Redshift, Lambda, Glue, QuickSight), Azure (Synapse, Data Factory), GCP (BigQuery, Looker Studio), ETL Pipelines, Data Warehousing, Data Modeling (Star & Snowflake Schema), API Data Extraction
- **Business & Data Practices:** KPI Reporting, Forecasting, Trend & Cohort Analysis, Data Governance, Data Quality & Validation, Master Data Management, UAT, Requirement Gathering, Agile/Scrum, Stakeholder Reporting

Work Experience

Business Intelligence Analyst — Ramp, Texas, USA

Apr 2024 – Present

- Designed and deployed enterprise-wide BI dashboards in Power BI and Tableau, providing real-time insights that improved decision-making.
- Optimized SQL-based data pipelines and automated ETL workflows in AWS, reducing manual reporting efforts by 45 hours per month.
- Partnered with finance and operations teams to define KPIs, build financial models, and monitor spend efficiency, enabling savings of \$2M annually.
- Implemented data governance and quality frameworks ensuring 99.5% accuracy across reporting systems and compliance with regulations.
- Conducted predictive and trend analysis using Python and Google Data Analytics techniques, helping identify customer churn risks & opportunities.
- Coordinate with data engineering teams to migrate BI infrastructure to AWS cloud, leveraging Redshift & S3 for scalable data storage and processing.
- Created self-service BI solutions and training guides for non-technical stakeholders, reducing ad-hoc data requests by 40%.
- Monitored and maintained BI system performance, integrating monitoring tools to achieve 99.9% uptime for reporting platforms.

Business Intelligence Analyst Intern – Discover Financial Services, Texas, USA

Aug 2023 – Mar 2024

- Assisted in building Power BI and Tableau dashboards to track credit card usage trends, improving reporting turnaround by 25%.
- Wrote and optimized SQL queries to extract and validate datasets, ensuring 98% accuracy in weekly performance and compliance reports.
- Supported senior analysts in KPI documentation and business requirement gathering, standardizing reporting across finance and risk teams.
- Conducted ad-hoc data analysis using Excel and Python to identify anomalies in customer spending, enabling early detection of potential risks.
- Participated in UAT testing of BI dashboards and ETL workflows, verifying data quality and alignment with business requirements before release.

Business Data Analyst – Nexova, India

Aug 2020 – Jun 2021

- Analyzed 120K+ customer financial transactions using SQL and Python to identify delinquency patterns, improving early risk detection by 22%.
- Built interactive dashboards in Power BI to track loan repayment trends across regions, reducing monthly reporting turnaround by 35%.
- Extracted, cleaned, and transformed large datasets from Oracle and Excel into structured models, ensuring 98% data accuracy for reporting.
- Partnered with product managers to gather business requirements and translate them into technical specifications for risk-scoring algorithms.
- Designed automated ETL pipelines using Python and SQL stored procedures, cutting manual processing time by 40 hours per month.
- Conducted exploratory data analysis (EDA) on borrower demographics and payment behavior, driving a 15% reduction in non-performing loans.
- Created data validation & reconciliation checks to ensure consistency between source systems & reporting layers, achieving 1% variance in audits.
- Collaborated with cross-functional teams to define KPIs (default rates, churn ratios, repayment cycles) that aligned with business goals.

Education

Master of Science in Software Engineering, University of Maryland, College Park, MD	Aug 2021 – May 2023
Bachelor of Engineering in Computer Engineering Gujarat Technological University, India	Jun 2016 – Aug 2020

Certifications

-
- Google Data Analytics Professional Certificate
 - AWS Certified Cloud Practitioner
