Summary:

- **Experienced Business Analyst** with 3 years of expertise in driving process improvements, identifying **business opportunities**, and implementing **data-driven strategies** to enhance performance and achieve business goals.
- **Business Analyst** with expertise in processing **complex datasets**, optimizing **workflows**, and developing **insights** to drive **strategic decision-making**.
- Proficient in **AWS, SQL, Tableau, and Excel**, with a strong background in **automation, real-time analytics**, and **reporting accuracy**.
- Led **infrastructure redesign projects**, enhancing **scalability** and **efficiency**.
- Successfully delivered **analytical solutions** in **customer feedback analysis, IoT security**, and **business performance evaluation**.
- Strong **collaborator** with **cross-functional teams**, ensuring **data integrity** and **operational growth**.
- Holds an **MS in Business Analytics**, focusing on improving **efficiency** and **market insights**.
- Experienced in **data-driven decision-making**, leveraging advanced **analytics** techniques to deliver impactful business solutions.

Technical Skills:

- **Business Analytics:** Data Visualization (Power BI, Tableau, Excel), SQL Analysis, CRM (Salesforce), ETL, Statistical Analysis.
 - **Analytics:** Power BI, Tableau, SQL, Salesforce, Excel; Data Visualization, Analysis, ETL.
 - Business Analytics: Data Visualization, SQL Analysis, CRM, ETL.
 - Power BI, Tableau, Salesforce, Excel.
-

Work Experience:

AX XPRESS, IL, USA

July 2024 – Present

Business Analyst

- **Assist** in gathering **business requirements** from **stakeholders** through **interviews, surveys**, and **documentation**.
- **Collaborate** with **cross-functional teams** to understand **business processes** and identify **improvement opportunities**.
- Conduct **market research** and **data analysis** to support **business decisions**.
- Create and maintain detailed **documentation** including **business requirements, process flows**, and **user stories**.
- Assist in developing **functional specifications** and **business process models**.
- Support in preparing **reports, presentations**, and **dashboards** to communicate **insights** and **findings**.
- Perform basic **data analysis** using **Excel, SQL**, or other **analytical tools**.
- Participate in meetings with **stakeholders** to provide updates and gather **feedback**.
- Assist in performing **user acceptance testing (UAT)** and validating solutions against **business requirements**.

- Utilized advanced **Excel** features, such as **pivot tables** and **VLOOKUP**, to optimize **data processing workflows**, leading to a reduction in **data cleaning time**.
- Designed and developed interactive **Tableau dashboards** that visualized complex **data sets**, supporting **data-driven decisions** and boosting departmental **efficiency** by providing actionable **insights**.
- Collaborated with departments to translate **business needs** into **analytical projects**, improving **data accuracy** and enhancing **decision-making effectiveness** by 25%.
- Conducted thorough exploratory **data analysis (EDA)** to identify key **business trends** and **anomalies**, which informed **strategic decisions** and improved **operational efficiency**.

Academic Projects:

Capstone Project on Starbucks

February 2023– March 2024

- Developed and implemented a customer feedback analysis tool, resulting increase in actionable insights for marketing strategies.
- Optimized data processing algorithms, reducing average processing time by 25% and enhancing report generation efficiency.
- Designed a user interface for the feedback system, increasing user engagement through improved accessibility and navigation.
- Integrated real-time data tracking features, providing up-to-date insights on customer behaviour and preferences, enhancing decision-making processes.
- Coordinated with cross-functional teams to ensure project milestones achieved on schedule, achieving a 10% on-time delivery rate.

Security in IoT Infrastructure

February 2023– March 2024

- Engineered a robust security framework, increasing threat detection accuracy and reducing false positives.
- Implemented encryption protocols across IoT devices, enhancing data protection and securing sensitive information with a 50% improvement in encryption strength.
- Developed intrusion detection algorithms, reducing response time to security breaches and improving overall system resilience.
- Integrated multi-factor authentication mechanisms, raising system access security by 45% and ensuring compliance with industry standards.
- Conducted vulnerability assessments, identifying and addressing critical security flaws, mitigating potential risks and strengthening infrastructure defences.

Business Performance Analysis - Coca-Cola

October 2022– November 2023

- Conducted a comprehensive market analysis, identifying growth opportunities and increasing market share in targeted regions.
- Analysed sales data trends, enhancing forecast accuracy by 20% and improving inventory management efficiency.
- Developed financial performance reports, highlighting increase in profit margins and optimizing resource allocation.
- Implemented KPI tracking systems, boosting operational efficiency by 25% and streamlining performance evaluation processes.
- Collaborated with cross-functional teams to address strategic challenges, achieving improvement in overall business performance.

Education:

Master of Science in Data Science - DePaul University
Bachelor of Commerce in General - Kavitha Memorial College

June 2022 – March 2024
August 2015 – May 2018
