

LOKESH MANAM

Manamlokesh96@gmail.com | (203) 909-8954 | Jersey City, NJ | [linkedin.com/in/manam-lokesh-3442b3183](https://www.linkedin.com/in/manam-lokesh-3442b3183)

SUMMARY

Data Analyst & Developer with 6+ years of experience in software engineering, analytics, and cloud-based solutions. Proven expertise in building scalable dashboards, ETL pipelines, and predictive models using Python, SQL, Power BI, and Azure. Recently completed an MS in Data Science, and actively seeking roles in data engineering, analytics, or applied machine learning.

EDUCATION

Saint Peter's University

Master of Science in Data Science | GPA: 3.75/4

Jersey City, NJ

Sep 2022 – May 2024

Relevant Coursework: Machine Learning, Data Visualization, Big Data, Cloud Computing, Python Programming

SRM University

Bachelor of Technology, Information Technology | GPA: 7.2/10

Chennai, India

July 2016 – March 2020

TECHNICAL SKILLS

- **Languages:** Python (Pandas, NumPy, Matplotlib), SQL, C#, JavaScript
- **Analytics & Visualization:** Power BI, Scikit-learn, Pandas, Excel
- **Machine Learning:** Classification, Clustering, NLP (NLTK)
- **Databases:** MS SQL Server, MySQL
- **Cloud & Tools:** Microsoft Azure (App Services, Storage), Anaconda, Git, VS Code, Arduino IDE

WORK EXPERIENCE

Data Engineer – Neurasol | Jersey City, USA

Sept 2024 – Apr 2025

- Designing, building and maintaining scalable data pipelines to extract, transform, and load data from various sources.
- Developing and implementing data warehouse solutions for storage, retrieval, and analysis of structured and unstructured data.
- Partnered with 3+ cross-functional teams to define data requirements and design scalable data solutions, improving reporting efficiency by 30%.
- Ensuring data quality, integrity, and security across all data processes and systems.
- Tuned SQL Server queries, reducing average query response time by 50%.
- Identifying and implementing new technologies and tools to improve data processing efficiency and effectiveness
- Monitoring and troubleshooting data pipelines and systems to identify and resolve issues in a timely manner.

Software Engineer - Byju's | Hyderabad, India

Mar 2020 – Aug 2022

- Built cloud-based dashboards and analytics platforms on Azure and Power BI, reducing report turnaround time by 70%.
- Automated ETL workflows using Python scripts for real-time data extraction from learning platforms.
- Partnered with data science teams to develop ML models for user behavior prediction (84% accuracy).
- Conducted peer code reviews and guided junior developers on SQL optimization and best practices.

Web Developer - DLK Technologies | Chennai, India

Mar 2018 – Feb 2020

- Developed internal data dashboards using SQL, Power BI, and JavaScript for operational reporting.
- Created REST APIs to enable daily data sync between transactional databases and analytics layer.
- Reduced backend latency by 35% through SQL query tuning and backend script optimization.
- Collaborated on agile sprint planning and documented technical workflows.

PROJECTS

Insurance Fraud Detection | Python, Scikit-learn, SQL

- Built classification model achieving 88% accuracy on fraudulent claim detection.
- Applied preprocessing, feature engineering, and logistic regression using scikit-learn.

Inventory Management System | .NET Core, SQL

- Designed full-stack solution for tracking inventory and automating sales reporting.
- Improved SQL performance by optimizing joins and indexing strategies.

AI Chatbot with NLP | Python, NLTK

- Built a rules-based chatbot with Python and NLTK for automated customer query resolution.
- Integrated with web UI for real-time interactions.

IoT Smart Home Automation | Arduino, Cloud Integration

- Developed Arduino-based home automation with real-time logging and cloud alerts.
- Integrated sensor data to enable automated control of lights and devices.

PERSONAL PROJECTS & INITIATIVES

- Developed websites for local businesses using HTML, CSS, JavaScript, and MySQL.
- Contributed to open-source machine learning repositories on GitHub.

- Published blogs on data science topics including model interpretability and Python automation.
