PROFESSIONAL EXPERIENCE

Product Management Intern, Four Dragons | [April 2025]- Present| Internship

- Collaborated with the team to test and validate new product features, ensuring quality and performance standards were met.
- Created and managed incident tickets using the ServiceNow platform to track and support feature testing.
- Conducted market research and competitive analysis to support product strategy and identify opportunities for growth.

Senior Research Assistant, SUNY Research Foundation | [April 2024 - May 2025]

- Assisted in data collection and maintenance for data center setups, including troubleshooting and maintenance of rack configurations, while integrating new systems and machines into the research environment.
- Managed a team of 3 to 4 junior researchers, ensuring efficient collaboration and workflow.

Customer Support Executive, Konnect It, Dahanu, India | [June 2022- July 2023]

- Provided technical and non-technical support for desktops, laptops, and networking devices, ensuring prompt issue resolution and high customer satisfaction.
- Assisted customers in selecting appropriate hardware solutions aligned with their needs and budget.
- Managed product-related queries, warranty claims, and service requests efficiently, reducing turnaround time.
- Maintained detailed logs of support cases and identified recurring issues to recommend process improvements.
- Educated customers on product features, installation guidelines, and basic troubleshooting steps.
- Fostered long-term customer relationships through timely follow-ups and exceptional service delivery.

PROJECT EXPERIENCE

Stock Price Prediction Using Time Series Analysis, B.E Major Project | Palghar, Maharashtra

- Developed a website for predicting future stock prices in the banking sector using an Auto-Arima model, conducting robust analysis with ten years of historical data and comprehensive documentation, including technical diagrams, to enhance credibility and usability.
