

Manasa Marampally

Email Id : marampallymanasa1@gmail.com

Phone Number : +1 (314)-724-2220

PROFESSIONAL SUMMARY:

Motivated and detail-oriented Junior Python Developer with hands-on experience in developing and maintaining web applications using Python, Django, HTML, CSS, JavaScript, and Java. Proficient in building RESTful APIs, writing efficient SQL queries, and working with relational databases. Strong understanding of object-oriented programming and the software development lifecycle (SDLC), with experience using Agile and Waterfall methodologies. Familiar with Git for version control and passionate about continuous learning, problem-solving, and delivering clean, scalable code. Adept at both frontend and backend development, with excellent collaboration, communication, and team leadership skills. Proficient in unit testing using unittest and pytest to ensure code reliability and maintainability, with a strong focus on writing clean, testable Python code. Fast learner with strong adaptability, consistently quick to grasp and apply new frameworks, technologies, and tools to meet evolving project requirements. Collaborative team player, experienced in Agile environments with active participation in sprints, stand-ups, and project planning at Accenture

EDUCATION

- Master of Science (Computer Science) - Southeast Missouri State University, USA – CGPA-3.8/4
- Bachelor's Of Technology(Information Technology) - Malla Reddy Engineering College For Women, INDIA - CGPA: 3.8/4

TECHNICAL SKILLS

Category	Technologies / Tools
Languages	Python, SQL, HTML, CSS, JavaScript
Packages & Frameworks	Django, Pandas, NumPy, Flask, FastAPI
Databases	MySQL, SQL Server, MongoDB
IDEs	PyCharm, Visual Studio Code
Methodologies	SDLC, Agile, Waterfall
Version Control	Git, GitHub
OS & Environments	Windows, UNIX, Linux

PROFESSIONAL EXPERIENCE

Role : Python Developer

Client: Accenture ,India, Hyderabad

Nov 2022 - July 2023

Responsibilities:

- Motivated and detail-oriented **Python Developer** with hands-on experience in designing, developing, and maintaining web-based applications.

- Proficient in **Python** and its frameworks such as **Django**, with a good grasp of web technologies including **HTML**, **CSS**, **JavaScript**, and **Java**.
- Skilled in building and consuming **RESTful APIs** and working with **relational databases** using **SQL**.
- Experience in using **Agile methodologies**, contributing actively to daily scrums, sprint planning, and project retrospectives.
- Familiar with **software development lifecycle (SDLC)** processes and version control tools like **Git**.
- Developed web applications and RESTful web services and APIs using Python Flask, Django.
- Proficient in creating and maintaining **web services** using Python.
- Contributed to both **frontend and backend** components of web applications.
- Followed **Agile, SDLC, and Waterfall** methodologies in various projects.
- Wrote **efficient SQL queries** for data storage and retrieval.
- Strong understanding of **Object-Oriented Programming (OOP)**.
- Excellent **analytical, problem-solving, debugging and critical thinking** abilities.
- Passionate about continuous learning and adapting to new technologies.
- Successfully led team projects, delegated tasks, and ensured timely delivery.
- Enthusiastic about contributing to innovative and user-friendly applications in a fast-paced development environment.
- Effective communicator and a reliable **team player**, also capable of working independently.

CERTIFICATIONS:

- C Certification From Cisco
- Python Certification From Coursera
- C For Everyone Structured Programming From Coursera
- Introduction To HTML From Coursera
- Object-Oriented Programming with Java From Coursera
- Programming for Everybody (Getting Started with Python) From Coursera.
- Python Certification From Cisco

ACADEMIC PROJECT

Phishing Website Detection Using Machine Learning

- This project is designed using machine learning algorithms, specifically supervised learning techniques, to analyze website features and classify them as phishing or legitimate. Python is the main programming language used for developing machine learning models, as it offers a wide range of libraries and tools for data preprocessing, feature extraction, model training, and evaluation. Additionally, web scraping techniques are employed to gather website data, and HTML and CSS are utilized for parsing and analyzing webpage content
- My project on phishing website detection aims to develop an efficient and reliable system that can automatically identify and classify phishing websites. This system will help users, especially those with limited cybersecurity knowledge, to distinguish between legitimate and malicious websites, thereby reducing the risk of falling victim to phishing attacks
