

Manaswini Challa

Java Full Stack Developer

Phone: +1(314) 213-0949 | Mail: challa.manaswini@outlook.com | Location: MO 63146 | [Linkedin](#)

SUMMARY

Java Full Stack Developer, with 4+ years of experience in creating interactive web applications with React, Angular, JavaScript, and JSON guaranteeing seamless user experiences. Built single-page applications using MVC frameworks like Node.js, ensuring efficient and scalable web solutions. Proficient as a UI/front-end developer, expert in creating applications with HTML, CSS, JavaScript, jQuery, AJAX, and JSON, assuring good user experiences. Proficient in developing microservices architectures with Spring Boot, enabling scalable and modular systems. Adept at building RESTful APIs, managing backend services, and ensuring seamless integration across distributed systems. Experience creating Kubernetes Clusters in AWS and deploying Docker Images on top of Kubernetes Clusters for scalable application deployment.

TECHNICAL SKILLS

Development Methodologies: SDLC, Agile, Waterfall

Programming Languages: C, C++, C#, Java, Python

Frameworks & Technologies: Spring MVC, Hibernate, Node.js, Restful API, SOAP, WebSocket, RabbitMQ, SaaS, Spring Boot, JPA (Java Persistence API), Spring Security, Spring Cloud

Development Tools: PyCharm, Jupyter Notebook, Visual Studio Code

Cloud & Containerization: AWS (EC2, S3 bucket, Virtual Private Cloud), Docker, Kubernetes, Google Cloud

Application Servers: Apache Tomcat

Databases: SQL, MySQL, MongoDB, SQL Server, PostgreSQL

Version Control/Other Tools: Git, Postman, CI/CD, Jenkins, Jira, Webpack, Rally, Junit, Atom

Big Data & Streaming Platforms: Kafka

Operating Systems: Linux, Ubuntu, Windows, Mac

Front-End Technologies: HTML, CSS, Bootstrap, XML, YAML, JSON, Ajax, jQuery, DOM Manipulation, Redux, TypeScript, JavaScript, React.js, Next.js, Express.js, Angular.js

Back-End Technologies: Spring MVC, Hibernate, Node.js, Restful API, SOAP, WebSocket, RabbitMQ, Spring Boot, JPA (Java Persistence API), Spring Security, Spring Cloud

PROFESSIONAL EXPERIENCE

Java Full Stack Developer | Metlife, USA

January 2024 - Present

- Developed single-page, responsive web applications using **HTML5**, **Bootstrap**, **CSS3**, **JavaScript**, **jQuery**, and **Node.js**, ensuring seamless and engaging user experiences.
- Operated and maintained **Kubernetes Clusters** in AWS (**EKS**), deploying Docker images for testing, increasing the speed of deployment by 30%, and decreasing the time of downtime by 25%.
- Guided the agile development of a **Java ERP** system, directly contributing to a 20% increase in project delivery speed.
- Integrated **Java** applications with social media **APIs**, enhancing user engagement and enabling social sharing features.
- Established a **Java** application feature using machine learning for customer sentiment analysis, enhancing customer service responses by 40%.
- Influenced the development of a **Java-based** CRM system, improving sales team efficiency and customer relationship management capabilities.
- Leveraged **Spring Boot** for building **RESTful APIs** in a **microservices** environment, ensuring high performance, reliability, and easy deployment of services across multiple environments.
- Built customizable components for the new website using **React.JS** and **React-Routes** to create a single-page web application.
- Implemented and maintained **microservices** using **Spring Boot**, enhancing the flexibility and scalability of web applications by decoupling services and optimizing resource usage.

Java Full Stack Developer | Tata Consultancy Services, India

November 2020 - August 2022

- Designed and implemented responsive user interfaces using **Angular14**, incorporating reusable components from **NPM** and state management via **Redux**, enhancing user experience and application efficiency.
- Managed application states using **NGRX**, streamlining state management and improving maintainability.
- Deliberated unique cloud solutions for clients based on the specific requirements and needs of the **Azure cloud**, which led to a 25% improvement in efficiency and a 20% decrease in expenses.
- Settled environments of different applications on **AWS** by provisioning on **EC2** instances using **Docker**, **Bash**, and **Terraform**.
- Improved cloud deployments for cost and performance, achieving a 20% cost reduction through resource optimization and security automation.
- Enhanced client system availability by architecting highly available cloud solutions, achieving 99.95% uptime.
- Documented disaster recovery strategies for **Azure** platforms to minimize the impact of disasters on business operations and improve system availability by 35% while decreasing possible downtime by 50%.
- Employed **Spring Boot** Actuator for monitoring and managing the application's health and performance metrics. Secured **RESTful APIs** with Spring Security by configuring authentication and authorization mechanisms, including OAuth2 token for secure API access.
- Implemented **Resilience4j** Circuit Breaker to enhance system resilience by managing and preventing service failures, improving application reliability and uptime.

Java Developer | Bytes Soft Solution, India

August 2018- October 2020

- Engineered websites with **React** and **Typescript** (frontend), **Node.js** and **Express** (backend).
- Established **Admin UI** for the notification system, focusing on project setup, security, and user management.
- Raised website performance for a user base of 50,000+ globally, ensuring seamless user experiences.
- Produced front-end components using **HTML**, **CSS**, and **JavaScript**, enhancing the user interface and overall user experience.
- Enriched code quality with comprehensive **JUnit** test suites, achieving 90% code coverage and reducing bugs.
- Improved code quality and test coverage to 95% using **Jest** development for robust software performance.
- Initiated an **AWS** Lambda function to automate weekly report generation, reducing operational costs by 45%.
- Planned and generated **RESTful APIs** to facilitate seamless communication between front-end and back-end systems, enhancing data exchange efficiency by 30%.
- Optimized **CI/CD** pipelines using Jenkins for build and deployment, reducing deployment failures by 40% and improving the deployment speed by 50%.
- Intellectualized **J2EE** technologies such as **Servlets**, **JSP**, **JSTL**, **JavaBeans**, and **JDBC** for building interactive web applications.
- Conducted performance testing with **JMeter** and achieved project documentation and analysis using MS Excel, contributing to the overall project's success.
- Leveraged **Google Cloud Platform (GCP)** services to deploy and manage scalable web applications, reducing infrastructure costs through efficient resource allocation and use of serverless technologies like Cloud Functions.

EDUCATION

Masters in Computer Science,

August 2022 – December 2023

Saint Louis University, Missouri, United States

Bachelor of Engineering in Computer Science and Engineering,

August 2016 – July 2020

BVRIT Hyderabad College of Engineering for Women, Bachupally, India
