SUMMARY

Graduate Construction Management and Technology Student with 3 years of experience in the construction field. I bring hands-on experience in quantity take-offs, bid analysis, and database management and a solid understanding of construction equipment, materials, and sustainable building practices. I am seeking an internship position in the construction field in the summer of 2025.

PROFESSIONAL EXPERIENCE

Anulaxa Enterprises, Mumbai, India: Estimation Engineer

June 2022 – July 2024

- Demonstrated quantity take-offs using Excel, ensuring precise calculations for building materials required for various projects.
- Evaluated 20 contractor proposals through detailed analysis sheets, refining decision-making criteria and leading to an improved selection process optimizing project outcomes, and minimizing execution risks.
- Updated and maintained the estimation database by adding over 120 new cost estimates and incorporating 50 revisions, ensuring data accuracy and supporting precise project planning for 15 major projects.
- Planned and conducted 23 active site visits, acquiring practical insights and ensuring alignment between project planning and on-site realities across 10 major projects.
- Utilized information from 15 building models and 30 detailed drawings, contributing to more accurate and comprehensive project planning by integrating data across 12 major construction projects.

City, and Industrial Development Corporation, Mumbai, India: Junior Engineering Intern

Dec 2021 – Jan 2022

- Gained Hands-on experience in RMC plant operations and precast manufacturing, including mix design, quality checks for materials, and understanding the production process of precast structures.
- Conducted quality evaluations and testing for precast elements and structures, focusing on strength, durability, and structural integrity while analyzing connection methods and construction processes.

Jamuna Construction, Mumbai, India: Junior Engineering Intern

Dec 2020 – June 2021

- Managed material estimations and progress reporting for a G+6 residential project, including calculating requirements for steel, concrete, and tiles, and preparing detailed monthly reports on progress, resource utilization, and timelines for stakeholders.
- Supervised on-site construction activities, leading 2 teams of laborers, and monitored reinforcement and foundation work to ensure quality and compliance with design specifications.

EDUCATION

M.S. Construction Management and Technology

December 2025

Arizona State University, Tempe, AZ

4.00 GPA

Relevant Coursework: Heavy Civil Estimation, Construction GMP, Construction Project Management.

B.S. Civil Engineering

May 2022

M.H Saboo Siddik College of Engineering, Mumbai, Maharashtra, India

3.73 GPA

TECHNICAL SKILLS

Software: Primavera P6, Bluebeam, Inegith, StaadPro, AutoCAD, Microsoft Excel, and Microsoft Project.

Technical Expertise: Quantity take-offs, bid analysis, cost estimation, project scheduling, quality control, and database management

Other Skills: Problem-solving, Critical Thinking, Project Budgeting, Sustainable Building practices, and Site Supervision

PROJECTS

Sustainable Building, Class Project

Spring 2022

- Collaborated with a team to design a sustainable G+5 building, creating a 3D model for visualization and incorporating energy-efficient designs, sustainable materials, and waste-reduction techniques.
- Focused on minimizing environmental impact by implementing energy-saving strategies and designing a building model that reduced carbon emissions and optimized resource use throughout its lifecycle.

Heavy Construction Estimation, Class Project

Fall 2024

- Led a comprehensive bid review for the Polacca SR 264 Highway Widening project, focusing on risk analysis, cost optimization, and scheduling. Key achievements included identifying risks, allocating contingency funds, and leveraging subcontractor quotes for a competitive bid.
- Collaborated with an exceptional team to apply classroom knowledge to real-world challenges, emphasizing detailed scheduling, contingency planning, and precise estimation. I am grateful for the guidance of instructors Aaron Cohen and Jake Bottcher, whose insights on cost estimation and project management were invaluable.
