

Mandhira Rathi

Chicago, IL | 312-889-8478 | mandhira0200@hotmail.com | [linkedin.com/in/mandhira](https://www.linkedin.com/in/mandhira)

Summary

Proven Data Analyst with 4 years of IT experience specializing in Business/Data Analysis, ETL Development, and Data Modeling. Skilled in all phases of SDLC, including Analysis, Requirements Gathering, and Designing. Strong background in documenting requirement specifications, functional specifications, test plans, and source-to-target mappings. Adept at SQL joins and data validation, with a focus on delivering actionable insights to support strategic business decisions.

Skills

Programming Languages: Python, SQL, Java, R, SAS
Data Visualization: Tableau, Looker, Power BI
Data Analysis: Dimensional Data Modeling, ETL Development, Data Warehousing, T-SQL
Machine Learning: Linear & Logistic Regression, SVM, KNN, NLP, Decision Tree, Random Forest, Clustering
Libraries & Tools: TensorFlow, Sci-kit learn, Pandas, NumPy, Matplotlib, Keras
Cloud & Data Platforms: AWS, GCP (Google Cloud Platform), Snowflake, SQL Server, Oracle, MySQL
Big Data Technologies: Hadoop, HIVE, Spark, Data Lake, ODS
Software & Tools: JIRA, Git, Airflow, Jupyter Notebooks
Healthcare Standards: EHR, SNOMED CT, RXNorm, UCUM, ICD, CPT, CVX

Professional Experience

Data Analyst | PNC Financials | Dec 2023 – Present

- Engineered solutions for highly imbalanced fraud datasets using Python and Scikit-learn, optimizing machine learning models and increasing fraud detection accuracy by 40%.
- Developed intricate SQL scripts for data manipulation and validation, improving data processing speed by 25% and reducing time-to-insight by 15%.
- Prepared model data and built supervised and unsupervised learning models using R and Python, boosting predictive accuracy by 20% and contributing to a \$100K increase in project ROI.
- Solved complex fraud problems by optimizing multi-layered datasets and existing machine learning libraries, enhancing efficiency by 30% and reducing fraudulent transaction costs by \$50K annually.
- Improved fraud prediction accuracy by 25% using random forest and gradient boosting for feature selection; implemented machine learning models for regression, classification, and regularization.
- Conducted thorough data cleaning and exploration, resulting in a 20% increase in data quality and a \$30K annual reduction in data-related issues.
- Enhanced Snowflake data integration, boosting accuracy by 39% and query speed by 29% through performance tuning.
- Collaborated with cross-functional teams to implement data-driven solutions, improving business process performance by 30% and contributing to a \$500K annual increase in business value.

Data Analyst | Avenir Technology, India | Dec 2018 – Aug 2022

- Orchestrated ETL processes, achieving 100% data accuracy and integrity through the development of complex SQL queries and optimization of query performance.
- Led product strategy discussions, influencing key decision-makers with data-driven insights, resulting in a 25% increase in cross-departmental strategic alignment.
- Developed SQL and Python-based KPI dashboards, leading to a 30% improvement in bug detection during initial testing and a 15% reduction in product time-to-market.
- Enhanced SDLC efficiency by automating JIRA ticket creation from test robot error logs, significantly accelerating issue resolution and testing workflows.

Education

Master of Science in Business Analytics | Trine University
Bachelor of Business Administration in Management | Osmania University

Additional Skills

- Data analysis and profiling, data mapping for clinical data, and implementation of data standards.
- Design and monitoring of performance and quality reports for FHIR products.
- Expertise in retrieving, aggregating, and manipulating data from complex relational databases.
- Strong communication skills with the ability to translate technical concepts to business users.
- Experienced in working in dynamic environments with ambiguity, balancing shifting priorities, and providing technical assistance to data consumers.
