

SUMMARY

Results-driven Power BI Developer with over 5 years of experience delivering end-to-end BI solutions that transform data into actionable insights. Skilled in Power BI, DAX, Azure Synapse, and Data Factory, with deep expertise in data modeling, ETL automation, and performance optimization. Adept at partnering with stakeholders to design dashboards and KPIs that improve visibility, accuracy, and executive decision-making. Recently focused on modern analytics using Microsoft Fabric, Copilot, and Data Activators enhancing collaboration, governance, and automation across enterprise BI environments. Recognized for developing scalable BI solutions that reduce reporting time and boost user adoption.

SKILLS

- **Business Intelligence & Visualization:** Power BI Desktop & Service, Power BI Fabric, Copilot, Data Activators, DAX, Power Query (M), Dataflows, Deployment Pipelines, Power BI Premium
- **Data Modeling & ETL:** Star & Snowflake Schemas, Semantic Models, Aggregations, Azure Data Factory, SSIS, Query Folding, Incremental Refresh
- **Cloud & Databases:** Azure Synapse Analytics, Azure SQL Database, Azure Data Lake, AWS Redshift, Snowflake, Databricks (familiarity)
- **Programming & Analytics:** SQL, Python (Pandas, NumPy), R (Basic Analytics), Excel (Power Pivot, VBA)
- **Automation & Integration:** Power Automate, Power Apps, Power BI REST API, Git, Azure DevOps, CI/CD
- **Governance & Performance:** Row-Level Security (RLS), Data Governance (Azure Purview), Workspace Access Controls, Performance Tuning
- **Methodologies & Tools:** Agile/Scrum, JIRA, Confluence, ServiceNow

EDUCATION

- Master of Science from University of South Carolina Upstate, Spartanburg, South Carolina

CERTIFICATIONS

- [Microsoft Certification: Azure Fundamentals](#)
- [Microsoft Certified: Power Bi](#)

EXPERIENCE

Microsoft | SEP 2024 – Present

Power BI Developer

- Designed and delivered enterprise-grade Power BI dashboards for customer analytics, improving reporting accuracy by 35%.
- Built semantic models and aggregations in Azure Synapse Analytics, integrating SQL Server, Data Lake, and REST APIs into a unified analytics layer.
- Developed advanced DAX measures and optimized Power Query transformations using query folding and incremental refresh, cutting load times by 50%.
- Implemented Row-Level Security (RLS), workspace governance, and Azure Purview policies to ensure compliant and secure data access.
- Configured Power BI Deployment Pipelines and Git integration for CI/CD-based release management.
- Partnered with business teams across Sales, Product, and Marketing to define KPIs, improving executive reporting adoption by 20%.
- Leveraged Microsoft Fabric, Copilot, and Data Activators to accelerate report generation and trigger data-driven alerts.
- Used Python scripts for predictive modeling and trend analysis, improving forecast accuracy by 18%.

Accenture | AUG 2019 – JUL 2023

Power BI Developer

- Delivered interactive Power BI dashboards for finance and operations, reducing report turnaround time by 45%.
- Designed data pipelines using AWS Redshift, Snowflake, and SSIS, integrating Salesforce, SQL Server, and Excel data into a centralized data warehouse.
- Developed data models supporting ad-hoc analytics, improving query response by 30%.
- Built predictive analytics in Python and R for anomaly detection and forecasting, enhancing accuracy by 15%.
- Automated refreshes and report distribution via Power BI Service and scheduled pipelines, reducing manual work by 40%.
- Collaborated with project managers and data engineers in Agile sprints to ensure timely BI delivery.
- Authored technical documentation, data dictionaries, and user guides, cutting onboarding time by 25%.
