

Maneesh Reddy Yanala

(513)-344-0902 | maneeshreddyyanala@gmail.com | linkedin.com/in/maneesh3310 | github.com/Maneesh3110 | Portfolio

Data Engineer specializing in SQL-driven data pipelines, data cleaning, and production-ready datasets for analytics and machine learning teams. Skilled in data ingestion, transformation, validation, and orchestration, with hands-on experience optimizing databases and improving pipeline performance. Proficient with Microsoft Azure (ADF, ADLS Gen2, Azure SQL, Synapse) and Python-based analytics. Seeking an entry-level Data Engineer role focused on analytics, scalability, and data reliability.

Education

University of Cincinnati , Cincinnati, OH <i>Master of Science in Information Technology, GPA: 3.94/4.0</i>	Aug 2024 – Dec 2025
CVR College of Engineering , Hyderabad, India <i>Bachelor of Technology in Computer Science and Information Technology, GPA: 3.42/4.0</i>	Aug 2020 – May 2024

Experience

SDN Softtech Solutions Pvt Ltd , Hyderabad, India <i>Data Engineer</i>	Jan 2023 – Jun 2024
- Developed and maintained ETL pipelines using Python, SQL, and Apache Airflow processing 300K+ records daily from REST APIs, MySQL, and CSV files, reducing manual processing time by 40%. - Built real-time streaming solutions with Apache Kafka and PySpark Streaming processing 50K+ events per minute achieving sub-5-second latency for dashboards and alerting systems serving 15+ stakeholders. - Optimized SQL queries and database schemas in MySQL and PostgreSQL, reducing execution time by 30-40% through indexing and normalization. - Orchestrated data workflows with Apache Airflow maintaining 97%+ successful DAG runs and implemented Python validation scripts improving data accuracy by 15%.	

Technical Skills

Programming Languages: Python, SQL, Java, JavaScript
Data Engineering and Big Data: Apache Kafka, PySpark, Apache Airflow, ETL Pipelines, Data Modeling, Data Analysis, Data Warehouse, Web Scraping
Cloud Platforms: Microsoft Azure (Data Factory, ADLS Gen2, Blob Storage, Azure SQL Database, Synapse Analytics)
Developer Tools: Git, VS Code, Jupyter Notebook, IntelliJ

Projects

Real-Time News Summarization ETL Pipeline - Engineered end-to-end ETL pipeline integrating NewsAPI, Apache Kafka, PySpark Streaming, and MySQL processing 700+ articles/hr with 2-4s latency; utilized TextRank NLP for 70% content reduction. - Implemented hybrid architecture with Kafka event streaming, MySQL persistence layer, and Flask REST API, achieving 80%+ topic classification accuracy with sub-100ms inference.
National Weather Service Live Observations Pipeline - Architected near-real-time pipeline polling NWS API every 60s using Python ingestion and PySpark Structured Streaming with 4 parallel queries, checkpointing, and Parquet outputs. - Developed anomaly detection system for extreme temperatures and humidity deviations incorporating 1-minute rolling averages and 7-day baselines, visualized via Streamlit and PyDeck geospatial mapping.

Certifications

ETL and Data Pipelines with Shell, Airflow and Kafka | **IBM**
Databases and SQL for Data Science with Python | **IBM**
Salesforce Developer Virtual Internship | **Salesforce**
