PROFILE

Results-driven Data Analyst with 5 years of experience delivering scalable, SQL-driven reporting solutions and performance dashboards for enterprise-scale clients across e-commerce, healthcare, and retail verticals. Proficient in building custom pipelines, automating report delivery using Python and cron-based schedulers, and optimizing queries for large datasets (100K+ rows). Demonstrated success in resolving data discrepancies and collaborating across engineering, operations, product, and analytics teams to enhance data integrity and operational KPIs. Skilled in tools including Tableau, Power BI, Git, and AWS (Cloud Practitioner Certified). Adept at leveraging Generative AI tools like ChatGPT and GitHub Copilot to accelerate development. Seeking to leverage my skills in a dynamic highly analytical data-driven environment.

KEY SKILLS

Programming Languages: SQL(MySQL, PostgreSQL, Oracle), Python(Numpy, pandas, Scikit-learn)

Data Manipulation & Analysis: Pandas, Numpy, MS Excel, Google Sheets, Exploratory Data Analysis(EDA), Data wrangling

Data Visualization: Power BI(Power Query, DAX), Tableau, Matplotlib, Seaborn

Relational Databases & Big Data: PostgreSQL, MySQL, Hive, HDFS, Presto

Change Management & version Control: Git, Github, Linux

Project & Workflow Management: Jira, Asana, Scrum, SDLC, Agile

Cloud & Developer Tools: AWS (S3, Ec2), Jupyter Notebook, Google Colab, VS Code, PyCharm, Query Builder

Office & Reporting Tools: MS Office Suite (Excel, PowerPoint, Word, Outlook)

Data Engineering & Automation: PySpark, Data Warehousing, Report Automation, Cron Scheduling

PROFESSIONAL EXPERIENCE

Verti System

Oct 2023 - Present

Client Name: Uber

Analyst - Grocery/Retail Team

Remote

Key Activities Performed

- Developed and currently manages **custom reporting** for 40% of Grocery/Retail (GR) enterprise merchants.
- Collaborated with **stakeholders** directly to understand the reporting requirements, to discuss scheduling, delivery methods and frequent meetings to develop existing **Key Performance Indicators (KPIs)**.
- Facilitated data quality checks to ensure the accuracy of the in-store item sales data and **provided support & solutions** which increased the accuracy of sales reporting to **<2% delta**.
- Partnered **cross-functionally** with DataOps, data quality, enterprise analytics, marketing, Operations, product, engineering teams when needed for data issues, other improvements within the data sources.
- Specialized in data cleaning, preprocessing, manipulation, integration, processing, interrogation of large datasets to troubleshoot data discrepancies.
- Cooperated on a **Python automation** project to perform scheduling reports for franchises and performing backfills for merchants in bulk which eliminated 60 hours/month(30%) of team's manual work.
- Developed and deployed scalable analytics pipelines using SQL and DevPods to support 20% key merchant segments, automate insights delivery, and enable standardized reporting use cases across the organization.

- Utilized Git for version control and **CI/CD workflows** in **Visual Studio Web**; tested in staging and coordinated production deployment and data backfills.
- Automated SQL-based daily, weekly, and monthly reports using internal scheduling tools with **cron** expressions, streamlining data delivery workflows and reducing manual reporting efforts by 90%.
- **Leveraged Generative AI tools like ChatGPT, Query Copilot and Git/GitHub Copilot** to enhance data analysis workflows, automate code generation, troubleshoot SQL/Python scripts, and accelerate report development, improving productivity and reducing turnaround time.
- Designed and maintained data tracking frameworks to monitor key operational metrics across the UE order process from subscription, ordering to customer feedback by defining KPIs, identifying data sources, and developing SQL logic.
- Queried large-scale **Hive datasets** stored on **HDFS** using **Presto** via Uber's internal Query Builder, supporting daily reporting and data analysis workflows.
- Lead new reporting improvement project, handled 7 custom reports and a team of 3 Analysts for the completion of this project.
- **Supervised the team** during urgent situations and in the manager's extended absence.
- Partnered with Client Success and Strategy teams to assess merchant performance and craft tailored insights and dashboards that demonstrated product value and drove commercial optimizations.

Redleaf IT Systems

April 2022 - Oct 2023

Client Name: Uber

Analyst - New Verticales Team

Remote

Key Activities Performed

- Analyzed large data sets of 100000 records, identified **20-40%** issues, discrepancies in data and provided insights to support decision making processes for senior management and cross functional teams.
- Collaborated with cross-functional stakeholders across account management, operations, and product teams to analyze complex financial and customer datasets, resolve data discrepancies, and deliver strategic recommendations supporting segment-level performance.
- Demonstrated adept communication **problem-solving** skills in fostering cohesive approach to data integrity challenges.
- Created scalable Tableau dashboards and custom analyses to support client-facing teams in building business cases, tracking KPIs, and communicating performance benchmarks to internal and external stakeholders.
- Optimized dashboard performance by improving query efficiency, reducing load times, and employing **data extracts** to enhance the speed and responsiveness of visualizations.
- Utilized advanced Tableau features like **calculated fields** and **table calculations** to derive meaningful insights from complex datasets and provide accurate, real-time reports.
- Identified and fixed data issues for key merchant segments, shared useful recommendations, and helped senior leaders make better data-driven decisions.
- Monitored schedule reports delivery status, adjusted client reports considering the changes in client's data infrastructure.
- Handled 5+ merchant's default reporting within the team, completed the setup and delivery in-time.
- Collaborated with stakeholders from account management, operations, and product teams to gather business Insights, to address and resolve data discrepancy issues.
- Performed Data Analysis in Google Sheets to better understand the data issues and to find the root cause of data discrepancy.
- Working with team members to **optimize** the queries day to day which are being updated timely to generate weekly and daily reports.
- Built reports for client success and operations teams to help with decision-making; solved problems by turning unclear questions into clear, helpful insights.

- Assist with global customer-facing reporting for our Strategic & Enterprise partners.
- Monitor changes in Client's data infrastructure and adjust reporting accordingly
- Interpreted data schemas and structures through **Uber's Databook (Hive Metastore)** to validate data sources, understand partitioning, and optimize query performance.
- Used CTE's, various types of joins, date functions and window functions of SQL while working on querying the data.

Infoshare Systems Inc
Data Analyst - HealthCare

July 2020 - March 2022
 Remote

Key Activities Performed

- Designed and launched Power BI dashboards to track KPIs such as active patients, call volumes, and payer mix (Medicare, Medicaid, commercial), resulting in an increase in dashboard engagement and contributing to a **12% uplift in patient retention**, boosting recurring consultation revenue.
- Optimized SQL queries for patient and visit data using Explain Analyze reducing refresh times and improving data availability, which enabled faster decision-making and drove a **10% increase in upsell opportunities for follow-up services**.
- Automated recurring data transfers from MySQL exports to **AWS S3** using CLI, reducing manual workload by **40%** and improving the timeliness of downstream revenue reporting.
- Partnered with clinical and operational teams to uncover call duration trends and scheduling gaps, leading to a **15% improvement in provider utilization**, which directly supported **increased service capacity and billing volume**.
- Built custom Power BI dashboards using Power Query and DAX, offering real-time operational insights to stakeholders segmented by insurance type and consultation method.
- Conducted detailed analysis using **Excel (VLOOKUP, PivotTables, advanced formulas)** to validate payer-level data and support executive reporting.
- Collaborated with **Data Engineers and ETL teams** to align dashboard metrics with backend data models and ensure reporting consistency.
- Participated in Agile SDLC processes, gathered reporting requirements, and deployed scalable, high-visibility BI tools across healthcare operations.
- Documented dashboard setup, SQL workflows, and data refresh processes to streamline knowledge sharing and onboarding for future analysts.

Gracenote(Nielsen Company)
Systems Analyst - Media/Marketing/Consumer Insights

Sep 2019 - Dec 2019
 Oldsmar, FL

Key Activities Performed

- Designed and optimized SQL queries to retrieve, manipulate, and analyze complex datasets, improving the efficiency of media consumption and audience behavior reporting by 25%.
- Conducted data analysis by examining source data, summarizing useful information, identifying trends and patterns from audience behavior and retail sales source data.
- Performed data validation and quality assurance checks on large-scale media datasets, ensuring data integrity for high-impact business decisions across TV, digital, and retail channels.
- Applied knowledge of SQL **joins, DDL, DML**, views, constraints, **sub-queries, CTE's**, functions to manipulate data.

- Utilized advanced Excel functions, including pivot tables, VLOOKUP, INDEX/MATCH, and complex formulas, to analyze large datasets, generate comprehensive reports, and provide actionable insights for data-driven decision-making.
- Validated data using results of transition process reports which increased accuracy of transition data by 13%.
- Observed customer databases to gain a better understanding of data structures and data management.

CERTIFICATIONS

1. **AWS Certified Cloud Practitioner**, Amazon Web Services — 2023

Gained theoretical knowledge of core AWS services (S3, EC2, Lambda, IAM), cloud architecture, and security best practices.

2. **AWS Data Engineering Certification (In Progress)** — Prepzee (Expected: Oct 2025)

Gaining hands-on experience in Python for Data Engineering, PySpark, Snowflake, building end-to-end ETL data pipelines using AWS services such as S3, Glue, Redshift, Athena, Lambda, AWS Bedrock, Sagemaker, and Step Functions

EDUCATION

University of Dayton / Masters in Computer Science (Dayton, OH)

Sathyabama University / Bachelor's in Electronics and Communication Engineering (Chennai, TN)
