PROFILE

- A seasoned IT professional with 12 years of experience in the information technology industry.
- Competent with content management systems for the insurance sector, including OnBase, Oracle Documaker Studio, Quadient/GMC Inspire, OpenText, and ImageRight. Has practical knowledge in SQL, and UNIX.
- Implementing ECM solutions according to the requirements set by business owners and stakeholders while adhering to budget estimates.
- Managing project-related activities such as gathering requirements, providing technical solution designs, reviewing proposals, and evaluating SLAs.
- Skilled in managing projects from requirements to production support, both independently and as a team leader, while multitasking effectively.
- The maintenance of existing forms and the development of new forms based on specific requirements.
- DAL scripting, managing overflows, batching and implementing triggers are essential for enhancing functionality requirements.
- Engaged in creating SQL queries to update the database tables with variable information from the forms.
- Detail-oriented Data Visualization Analyst having experience in analyzing and visualizing complex datasets to drive business decisions.
- Experience in transforming complex data sets into compelling visual stories.
- Proficient in leveraging data visualization tools to drive insights and support data-driven decision-making.
- Skilled in dashboard creation, data analysis, and translating business requirements into actionable visual solutions.
- Proficient in preparing technical reports through the collection, analysis, and summarization of information and technology trends.
- Experienced in gathering reporting and analysis requirements and documenting the report specifications.
- Experienced in the creation of technical, functional, and requirement documentation.
- In-depth understanding of features and functionalities of Power BI DAX and Power Query.
- Skills include Business Analysis, writing technical, business, and system requirements, as well as handling issue resolution and defect management.
- Expertise in writing SQL queries.
- Proactive with strong communication skills, results-driven, and known for a positive attitude, commitment to achieving results, and a strong desire for continuous learning.
- Results-oriented business analyst with extensive experience in the insurance industry, leading cross-functional teams to develop, document, and implement process innovations that drive business goals.
- Demonstrates exceptional skills in identifying problems within business systems and recommending effective controls to address them.
- Deep understanding of SDLC processes and Agile development methodologies, including Waterfall, Scrum, and the Agile Framework.
- Proficient in preparing technical reports through the collection, analysis, and summarization of information and technology trends.
- Effective teamwork, strong communication, problem-solving abilities, and business skills.
- Specialized in software development, integration testing, and the implementation of improved deliverables.

SKILLS

- ECM/CCM Skills – Documaker, OnBase, Quadient Inspire, OpenText, ImageRight
- DAL Scripting
- Power BI
- Data Analysis
- Data Visualization
- Power Query
- Languages & Databases: SQL, Microsoft SQL Server, SSMS
- Unix

TOOLS

- ECM/CCM Tools – Documaker Studio, Documaker Workstation, OnBase Studio, OnBase Client, OnBase Configuration tool, Report Services, GMC/Quadient Inspire, OpenText, ImageRight
- Data Visualization Tools – Power BI Desktop, MS Report Builder
- ServiceNow
- DigiCert
- Putty
- WinSCP
- Microsoft SQL Server
- DbVisualizer
- IBM OnDemand
- Bladelogic
- Jupyter Notebook
- Eclipse
- GitHub
- JIRA
- Remedy
- Agent Ransack
- Beyond Compare
- Adobe Professional
- Power Automate
- MS Office Suite

CERTIFICATIONS

- OnBase System Administrator

PROFESSIONAL EXPERIENCE

DCM Infotech, Canada | IT/Data Visualization Analyst | 09/2024 – Current (RICOH)

Roles and Responsibilities

- Designed and developed interactive Power BI dashboards and reports to visualize key business metrics for improved decision-making.
- Developed Power BI datasets, created and deployed reports, and verified dashboard performance to ensure data accuracy and usability.
- Used DAX to develop calculated columns and measures as needed in reports for dynamic analysis.
- Performed data cleaning, data transformation, and data modeling using Power Query in both Power BI Desktop and Excel.
- Wrote and executed SQL queries to retrieve relevant data for reporting and analysis.
- Analyzed raw data for meaningful insights using spreadsheets and applied transformations to support business needs.
- Collaborated with stakeholders to gather requirements, validate them, and translate into detailed technical specifications.
- Created scalable and interactive visualizations that facilitated data-driven decision-making across teams.
- Assisted in creating and refining user stories using the Agile/Scrum framework for project tracking and delivery.
- Collaborated with cross-functional teams for issue resolution and defect management across multiple projects.
- Managed the entire lifecycle of SSL certificates in DigiCert, including certificate creation, renewal, and revocation.
- Sent expiration reminders to application owners and confirmed renewal needs for expiring SSL certificates.
- Followed up with application owners to gather and track information regarding certificate installation details, such as server, port, and IP address.
- Created and maintained System Understanding Documents as part of knowledge transition processes to ensure operational continuity.
- Created and managed risk management policies for both UAT and Production environments using the ServiceNow platform.
- Gained hands-on experience with the ServiceNow tool for ticketing, workflow automation, and policy management.
- Utilized Microsoft Excel for data analysis, transformation, and visual representation of trends and metrics.

Accenture, India 08/2013 – 09/2024

Business/Data Visualization Analyst - Roles and Responsibilities

- Understand business needs and confirm requirements with clients.
- Lead requirements sessions with stakeholders and SMEs.
- Log and prioritize new or updated requirements from discussions.
- Create customized documentation, including user stories and presentations.
- Analyze data for insights and communicate business requirements to technical staff.
- Break down requirements into JIRA tickets with acceptance criteria.
- Resolve questions and ambiguities for developers and QA.
- Develop test scenarios and plans for business sign-off and assist with testing.
- Collaborate with product owners and development teams in sprint planning.
- Manage JIRA workflows and the product backlog.
- Maintain documentation in Confluence.
- Clean data with spreadsheets and write SQL queries to extract data.
- Collaborate closely with the Scrum team and facilitate the meetings as well.
- Create interactive and visually engaging Power BI reports, dashboards, and visualizations based on business needs.
- Develop and manage intricate data models while ensuring data accuracy and optimizing performance.

- Integrate data from multiple sources such as SQL Server, Excel etc.
- Utilize Power Query and other Power BI tools to transform clean, and manipulate data.
- Participated in grooming sessions to translate functional requirements into desired technical specifications by engaging in sprint planning.
- Conducted demonstrations with stakeholders to solicit feedback, identify actionable items, and perform user acceptance testing (UAT).
- Developed Power BI datasets, reports, and dashboards, and published these reports to the Power BI service.
- Created Power BI dashboards and apps within the Power BI service.
- Expertise in building data visualizations and a strong understanding of various chart types to highlight patterns in both unstructured and structured datasets.
- Created workspaces tailored to different work environments and developed deployment pipelines for deploying reports from development, quality assurance (QA), to production.
- Experience with Power Automate for streamlining processes and have created flows in Power BI to share essential reports with business users.
- Proficient in DAX, allowing me to create complex formulas, and I utilized Power Query (an ETL tool in Power BI) to transform raw data as needed, producing measures and custom columns as required.
- Worked with both direct and import data models in Power BI Desktop and created various datasets.
- Developed intuitive and user-friendly dashboards by incorporating guided navigation links, prompts, and drill-downs effectively.

ECM Developer – Oracle Documaker/Quadient Inspire/OpenText/OnBase

Roles and Responsibilities

- Analyzed business requirements and defined functional solutions.
- Managed changes on high-priority JIRA stories.
- Handled Test and Production deployments independently.
- Conducted various testing phases and managed defect resolution.
- Tracked defects in JIRA and estimated story points.
- Automated test deployment with UNIX scripting and Python.
- Provided knowledge transfer to peers and new joiners.
- Supported technical issues and communicated progress with the onsite team.
- Received appreciation from clients and management.
- Mentored team members and conducted code reviews.
- Collaborated with stakeholders in scrum and status calls.

Documaker

- Managed three correspondence modules, developed and modified insurance forms, and created/alterd DAL scripts and tables.
- Mapped XML to create forms and updated database tables using SQL queries.
- Assisted the client in developing templates and addressing queries regarding the migration from Documaker to Quadient Inspire.
- Write SQL queries to update changes in the database and to retrieve data.
- Developed complex forms and attachments with high quality, resulting in few peer review comments and no QA defects.
- Expertise in form and attachment construction, DAL scripting, creating subforms, and developing lookup and entry tables.
- Skilled in XDD and common field creation, integration testing, and implementing triggers.
- Independently resolved critical defects and conducted unit and workstation testing, which included preparing test plans and test cases.
- Conducted peer reviews, trained new team members in Documaker, and managed resource reconciliation for month-end releases and promotions to Dev environments.

Quadient Inspire

- Good knowledge of Quadient Inspire, including hands-on experience in WFD creation, designing print layouts, and all aspects of the software life cycle.
- Proficient in data modules, workflow creation, writing rules, scripts, and data transformations in Inspire Designer.
- Familiar with flat files, relational and non-relational databases, XML, and JSON.
- Experienced in creating and designing forms based on business specifications.

OpenText

- Basic experience in OpenText Content Server, including creating and managing templates and forms, designing form views and workflows, and performing admin tasks like user and group management with access permissions.
- Skilled in creating reports, dashboards, and document scanning and capturing.

OnBase

- Analyzed system specifications and business requirements.
- Designed and modified OnBase Workflow solutions.
- Configured document types and customer queries for business processes.
- Managed user accounts, keywords, and document type groups across environments.
- Assisted end users by gathering requirements and developing storage and workflow solutions in OnBase.
- Developed and implemented workflows, E-forms, Unity forms, and Scan Queues.
- Experienced in document import processing and using report services tools.
- Utilized Easy Vista and JIRA for ticket management.
- Handled incidents, problem tickets, change requests, and service requests.
- Performed regular system maintenance tasks.
- Certified OnBase System Administrator.
- Maintained and operated OnBase solutions.

Accomplishments

- Implemented automated deployment processes, leading to a 5% increase in profit margins.
- Served as the primary liaison between project management and IT.
- Improved collaboration and processes with development leads.

EDUCATION

- Anna University, Master of Technology, Chennai. (2011 – 2013)
- Andhra University, Bachelor of Technology, Visakhapatnam. (2007 – 2011)

ELIGIBILITY TO WORK ABROAD

- Possesses a Canadian W1 work permit visa.
