SUMMARY

Detail-oriented and analytical **Business Analyst with 3 years of experience** leveraging **data-driven insights** to support strategic initiatives, regulatory compliance, and operational improvements in banking and financial services. Skilled in bridging technical and business domains to translate requirements into scalable analytics solutions. Proficient in developing **interactive dashboards**, optimizing **ETL workflows**, and automating reporting using **SQL, Python, Power BI, Tableau**, and **cloud platforms** such as **AWS** and **Azure**. Demonstrated ability to collaborate cross-functionally in Agile environments, streamline reporting, and drive business performance through actionable insights.

SKILLS

- Business & Data Analytics:** Business process modeling, KPI reporting, forecasting, trend analysis, ad-hoc analysis, competitive analysis, data storytelling
- Tools & Technologies:** Power BI, Tableau, Excel (Power Query, Pivot Tables), Gephi, JIRA, Confluence, Asana
- Programming & Scripting:** Python (Pandas, NumPy, Matplotlib, Tweepy), R, Shell scripting
- Databases & Warehousing:** SQL Server, MySQL, PostgreSQL, Redshift, Snowflake, DBT, SSIS
- Cloud Platforms & Services:** AWS (S3, Lambda, Redshift), Azure (Synapse, Data Factory, Blob Storage)
- ETL & Data Integration:** Airflow, Azure Data Factory, SSIS, automated data pipelines, root cause analysis
- Project & Process Management:** Agile, Scrum methodologies, sprint planning, requirement elicitation, UAT coordination
- Soft Skills:** Stakeholder engagement, cross-functional communication, problem-solving, critical thinking, adaptability, documentation

EXPERIENCE

Wells Fargo & Company	Mar 2024 – Feb 2025
Business Analyst	USA
- Translated business needs into technical specifications by conducting over 30 stakeholder interviews across finance, operations, and compliance, resulting in the launch of three scalable analytics solutions used in quarterly forecasting. - Designed enterprise-level KPI dashboards using Power BI and Tableau, integrating structured data from SQL Server and unstructured logs from AWS S3, which reduced reporting preparation time by 45%. - Led implementation of ETL pipelines using DBT and Azure Data Factory to automate monthly financial data workflows, reducing manual intervention by 80% and increasing data refresh frequency to daily. - Consolidated 4 reporting systems into a centralized Snowflake warehouse, cutting infrastructure maintenance costs by 35% and enabling cross-departmental data access for real-time risk analysis. - Established a data access governance framework with role-based permissions (RBAC) in line with GDPR and SOX policies, decreasing audit findings related to unauthorized access by 90%. - Conducted root cause analysis on reporting anomalies impacting regulatory disclosures, implementing validation logic that improved data quality scores by 42% in quarterly audit reports. - Delivered monthly executive data review packs combining regulatory metrics and financial KPIs, which improved stakeholder alignment and shortened decision-making cycles by 25% across finance leadership. - Collaborated with QA and engineering teams to develop test scenarios for data integration testing, resulting in a 60% reduction in downstream reporting issues during production releases.	
Goldman Sachs Group, Inc.	Jan 2022 – Jul 2023
Business Analyst	India
- Collaborated with quantitative teams to create a daily trade surveillance dashboard in Tableau, reducing regulatory breach detection time by 60% and eliminating reliance on static Excel-based reviews. - Defined detailed business and functional requirements for a trade analytics module that supported \$500M+ in high-frequency trading operations, improving system traceability and reducing change requests post-deployment. - Analyzed over 10 million transaction records using Python (Pandas, NumPy) and SQL, identifying inconsistencies that led to a 25% reduction in financial reporting variances and audit flags. - Automated compliance report generation via scheduled Python scripts and parameterized SQL jobs, reducing team workload by 15 hours per week and achieving 100% on-time delivery for monthly filings. - Facilitated Agile planning cycles, managing user stories in JIRA, conducting sprint demos for stakeholders, and coordinating UAT sessions that achieved a 98% approval rate across five product releases. - Built anomaly detection scripts to validate performance and trade attribution datasets, working with data engineers to deploy integrity checks that improved reporting reliability by 30%. - Supported data lineage mapping and documentation for key regulatory datasets, enabling faster onboarding for new analysts and reducing dependency on legacy SMEs by 40%. - Led integration of third-party market data APIs into trade dashboards, enhancing real-time insights for compliance monitoring and improving data completeness by 25% across high-volume reports.	

EDUCATION

Master of Science in Business Intelligence & Analytics	USA
Stevens Institute of Technology	May 2025
Bachelor in Business Administration	India
ICFAI Foundation for Higher Education	May 2023
