PROFESSIONAL SUMMARY

I am a recent graduate with a master's degree in Computer and Information Technology (Computer Science) from UPenn. My goal is to secure a position in the technology field where I can leverage my strong critical thinking and analytical skills, along with my ability to resolve problems. I am particularly interested in network systems, artificial intelligence, machine learning, data science and full stack development.

TECHNICAL SKILLS

- Programming Languages: Java, Python, C, JavaScript, MATLAB, CSS, HTML
- Database Management: SQL, Tableau
- Web Development: Spring Framework, React, Spring Boot, Angular, Git
- Software Tools: GIS, Microsoft Office Suite, AutoCAD, SAP 2000, SolidWorks, pandas, Linux OS
- Courses Taken: Introduction to Software Development, Computer Systems, Data Structures & Software Design, Algorithms & Computation, Big Data Analytics, Machine Learning for Data Science, Artificial Intelligence

EDUCATION

The Ohio State University, Columbus, OH
Bachelor of Science, Civil Engineering

Overall GPA 3.58
Aug 2016 - Dec 2020

University of Pennsylvania, Philadelphia, PA
Master of Computer and Information Technology (Computer Science)

Overall GPA 3.46
Aug 2021- May 2024

Per Scholas
Full Stack Java Developer Training

Jul 2024 – Oct 2024

PROJECT

Web Development Project

- Implemented transparent containers with rounded corners and shadows for a sleek and modern aesthetic.
- Utilized JavaScript to handle form submissions and display validation error messages dynamically, improving user feedback.
- Ensured consistent functionality and styling across browsers by adhering to best practices, using UTF-8 character encoding and W3C standards.

Student Management System Project

Dec 2021

- Implemented a console-based student management system using Object-Oriented Programming Design
- Read and parsed the provided files in Java and cleaned them up
- Designed a system for students to manage their courses with three main user roles in the application: Admin, Student, and Professor.

Flu Tweet Project

Apr 2022

- Designed a software system using Java with an N-tier architecture to increase performance optimization
- Used Java library to read data stored in a JSON file
- Analyzed the use of words and expressions that appeared over time on social media to get an understanding of the spread of infectious disease
- Analyzed a collection of potentially flu-related tweets to look for tweets regarding occurrences of the flu and determined the US states in which these tweets occurred

PROFESSIONAL EXPERIENCE

City of Columbus Department of Public Service – Columbus, Ohio

Aug 2019 – Dec 2020

Student Intern II/ Engineering Intern

- Utilized software like AutoCAD and GIS to assist upper-level engineers in performing work related to traffic data collection, crash data review, and traffic studies
- Reviewed crash data, created crash diagrams, and learned to improve intersection safety and capacity
- Conducted field studies with engineers to make decisions regarding traffic data collection
