Profile

Innovative and results-driven Front-End Developer with nearly 5 years of experience in designing, developing, and optimizing web applications. Proficient in Angular and React, with a strong foundation in JavaScript and TypeScript. Passionate about building intuitive, user-centric interfaces and delivering high-performance web solutions. Adept at collaborating with cross-functional teams, integrating third-party libraries, and driving technical innovation.

Skills

Languages & Frameworks : JavaScript, TypeScript, React, React Native, Angular, HTML5, CSS, Tailwind CSS

State Management: Context API, Redux

Dev Tools ,CI/CD: Git, VS Code, Visual Studio IDE, Postman, Azure DevOps, Digital Ocean

Testing , Debugging: Cypress

Visualization & Data: D3.js, RESTful APIs, JSON

Others: Agile Development, Firebase Auth, Cross-Browser Compatibility, Responsive UI Design

Professional Experience

Lead Front-End Developer (Evonaire)

Present

- Leading the development of a **cross-platform application** using **React Native** with **PWA support**, ensuring responsive and consistent UI across web, iOS, and Android.
- Building and maintaining key modules such as multi-step onboarding, upload flow, tiered member dashboards.
- Architecting and managing Redux-based global state, handling role-based routing, subscription licensing, and multilingual scaffolding
- Collaborating with designers and stakeholders to deliver branded, dynamic UI components like icon-based navigation, care & support overlays, and earnings preview interfaces.
- Overseeing CI/CD and deployment pipelines using **DigitalOcean Droplets**, configuring production builds, domain routing, and environment-specific deployments for staging and live releases. .

Front-End Development Analyst (Accenture)

- Developed and maintained scalable web applications using **Angular (v13–15)** and **React.js**, including a structured entity search engine and a pharmaceutical research platform that improved data accessibility by 35%.
- Built **15+ reusable, responsive UI components** and styled layouts using **HTML, CSS, Styled Components**, and **Semantic UI React**, enhancing visual consistency and development speed.
- Implemented robust **state management** using **Context API** and collaborated with back-end teams to integrate and optimize **RESTful APIs**, ensuring seamless data flow across the stack.
- Integrated advanced features and third-party libraries such as **Prism Doc** for document viewing and **D3.js** for interactive data visualizations, enriching user experience.
- Reduced deployment time by **40%** by setting up efficient **CI/CD pipelines** using **Azure DevOps** and ensured application reliability through **Cypress testing** and proactive debugging.

Projects

Chat App [Link](#)

React, Socket.io, Express.js, Node.js

Developed a Chatting application using React.js. Uses Socket.io for real time communication and stores user details in encrypted format in Mongo DB Database. Implemented Authentication for secure user access and leverage React Context API for efficient state management. Used Node.js and Express.js for server side rendering of User details and chat details.

Netflix-GPT [Link](#)

React, Redux, Tailwind CSS

Netflix-GPT stands as the ultimate movie streaming application, harnessing the capabilities of React.js and OpenAI GPT-3.5 turbo APIs to deliver a cinematic viewing experience. Easily navigate through an extensive movie database, indulge in personalized recommendations, and benefit from features like multilingual support, infinite scroll, and secure streaming authenticated via Google Firebase. The app leverages React Redux for efficient state management and employs Tailwind CSS for sleek and customizable styling .

Education

Bachelor of Engineering in Electronics & Communications

Bengaluru, India

Dayananada Sagar College of Engineering **GPA : 3.4**
