

Manideep Akkinapelli

Business Analyst

(219) 246 -1407 | manideepakkinapelli.ms@gmail.com | LinkedIn

Professional Summary

Business Analyst with 5+ years of experience in the financial services, pricing analytics, and lending domains, specializing in credit risk management, regulatory compliance, and enterprise software implementation. Proven expertise in gathering and documenting business and functional requirements (BRD/FRD), performing gap and root cause analyses, and leading Agile ceremonies to drive project delivery. Adept at creating mock-ups, process flows, and user stories, and facilitating UAT to ensure stakeholder alignment and solution quality. Hands-on with tools such as JIRA, Confluence, Visio, Lucidchart, Tableau, SQL Server, and Excel. Strong domain knowledge in mortgage risk (Freddie Mac), pricing analytics (Vistaar), and lending platforms (Azentio). Recognized for cross-functional collaboration, stakeholder communication, and delivering strategic solutions that improve risk scoring accuracy, pricing effectiveness, and regulatory compliance.

Technical Skills

Business Analysis: Requirements Gathering, BRD & FRD Documentation, Gap Analysis, Root Cause Analysis, Functional Specs, Agile Ceremonies, Change Requests (CRs), Mock-ups, UAT

Tools & Platforms: JIRA, Confluence, Microsoft Visio, Lucidchart, Tableau, SQL Server, Excel, PowerPoint

Data Analysis & Reporting: KPI Monitoring, Data Validation, Risk Scoring Models, Pricing Calculations, Forecasting, Strategic Planning Support, Regulatory Reporting, Data Pipeline Design, Interactive Dashboards

Domain Knowledge: Mortgage & Credit Risk (Freddie Mac), Pricing Analytics (Vistaar), Lending Solutions (Azentio), Financial Products, Risk Management, Regulatory Compliance

Project & Process Management: Agile (Scrum), SDLC, Milestone Tracking, Delivery Coordination, Production Deployment, Escalation Management, Risk Mitigation, TAT Compliance

Testing & QA: Test Scenario Design, UAT Execution, QA Coordination, Functional/System Testing, Defect Triage, Resolution Tracking

Professional Experience

Business Analyst | Freddie Mac, USA

Feb 2025 – Present

- Collaborated with stakeholders from Risk, Finance, and IT teams to gather and document business requirements for enhancing Freddie Mac's mortgage risk assessment models; created detailed BRD, FRD, and process flow diagrams using Visio and Lucidchart.
- Led gap analysis and root cause investigation to identify inefficiencies in existing risk scoring workflows, resulting in a redesigned data pipeline that improved credit risk profiling accuracy by 18%.
- Facilitated JIRA-based sprint planning, backlog grooming, and UAT testing cycles in an Agile environment; ensured timely delivery of features for internal risk dashboard powered by Tableau and SQL Server.
- Worked closely with data analysts and model developers to support data validation, KPI monitoring, and regulatory reporting requirements; maintained alignment with SOX and Fannie Mae compliance standards.

Business Analyst | Vistaar Systems Pvt Ltd, Mumbai, India

Oct 2021 – Nov 2023

- Designed and delivered pricing analytics solutions to support strategic planning, forecasting, and decision-making.
- Authored comprehensive test scenarios and executed user acceptance testing (UAT) to ensure solution quality.
- Led customer-facing solution review sessions to capture business requirements and recommend enhancements.
- Developed and presented interactive storyboards and mock-ups to stakeholders, aligning product features with business needs.
- Utilized design thinking to address complex business challenges and enhance product usability.
- Performed detailed price calculations using SQL and Excel, supporting accurate pricing models and insights.
- Translated business requirements into functional specifications, ensuring alignment with organizational goals.
- Collaborated with cross-functional teams to implement new features and enhancements within Agile sprints.
- Investigated and resolved system defects through root cause analysis in coordination with development teams.
- Facilitated feature finalization by conducting mock-up review sessions with development, QA, and architecture teams.
- Tracked project milestones and deliverables, ensuring compliance with timelines and requirements.
- Delivered key insights and updates to stakeholders and leadership to support smooth product rollouts.
- Analyzed integration issues between Vistaar products and external systems, providing enhanced insights for future developments.

Business Analyst | Azentio Software Pvt Ltd / 3i Infotech Pvt Ltd, Navi Mumbai, India**May 2019 – Oct 2021**

- Gathered and documented business requirements, design specifications, user manuals, and process flows to support development efforts.
- Coordinated across multiple teams to manage software development and production deployment efficiently. · Led on-site and offshore support, ensuring smooth implementation of business solutions.
- Provided on-site and offshore support, ensuring seamless delivery and implementation of business solutions.
- Conducted gap analysis on existing systems and recommended performance enhancements aligned with industry trends.
- Translated business needs into functional product features and technical specifications.
- Delivered product demonstrations to clients, highlighting newly developed functionalities in the lending domain.
- Performed detailed product analysis to enhance design, functionality, and overall customer experience.
- Designed and delivered training sessions to support smooth adoption of new system features by end users.
- Facilitated Agile ceremonies including sprint planning and backlog grooming, ensuring timely delivery of high-priority items.
- Collaborated with QA and development teams to resolve functional and technical issues during UAT and system testing phases.
- Managed escalations and proactively addressed project risks to minimize delays and ensure client satisfaction.
- Executed critical change requests (CRs) that optimized client operations and improved system performance.
- Supported UAT execution and ensured business requirements were met within specified timelines.
- Researched and resolved production support issues, maintaining compliance with turnaround time (TAT) commitments.
