SUMMARY

Entry-Level Software Engineer with hands-on experience designing, developing, and deploying full-stack applications using **JavaScript/TypeScript, Python, Node.js, React, and cloud technologies (AWS)**. Strong background in **REST API development, database design (SQL/NoSQL)**, and Agile collaboration. Adept at writing clean, maintainable code, debugging complex systems, and leveraging Git/GitHub for version control. Passionate about building scalable, user-focused solutions and continuously learning through mentorship and real-world projects.

EDUCATION

Master of Science - Information Systems Technologies

Wilmington University, New Castle, DE

Jan 2024 – May 2025

Relevant Coursework: Data Management & Modeling, Cloud Management, Networking

Graduate Certificate - Data Mining

New Jersey Institute of Technology, Newark, NJ

Sep 2023 – Dec 2023

Relevant Coursework: Data Mining, Data Analytics, Java Programming

Bachelor of Engineering - Electronics and Instrumentation Engineering

Keshav Memorial Institute of Technology, Hyderabad, India

July 2018 – Aug 2022

SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, C, C++, SQL, HTML, CSS, Data Structures & Algorithms
- **Frameworks & Tools:** Node.js, React, Flask, Django, FastAPI, REST APIs, Git/GitHub, Agile/Scrum
- **Databases:** MySQL, PostgreSQL, MongoDB, NoSQL concepts
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Docker, GitHub Actions CI/CD, CI/CD Pipelines
- **Data Science/ML:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, HuggingFace
- **Other:** Streamlit, Selenium, Apache Kafka, PySpark, Jupyter Notebook, Linux

EXPERIENCE

Cognizant Technology Solutions | Programmer Analyst Trainee

Full Stack Python/JavaScript Developer

Mar 2022 – Oct 2022

- Built and maintained a **Blood Bank Management System** using Python (Django REST APIs) and JavaScript, streamlining donor registration and inventory tracking, which boosted operational efficiency by **25%**.
- Developed responsive UIs with HTML, CSS, Bootstrap, and JavaScript, improving usability for hospital staff and donors.
- Designed optimized SQL queries and relational schemas to enable faster retrieval of critical donor data.
- Implemented secure authentication, data validation, and access control to comply with healthcare privacy standards.
- Increased **code coverage by 20%** through pytest-driven unit and integration testing, reducing post-release issues.
- Participated in Agile ceremonies, code reviews, and pair programming sessions, improving delivery speed by **15%**.
- Leveraged Git for version control, contributing to collaborative, high-quality code development.

PROJECTS

Fraud Transaction Detection Web App

- Built a scalable ML pipeline in Python to detect fraudulent transactions, training on 280k+ records and achieving **98.4% accuracy**.
- Applied **SMOTE balancing, feature scaling, and hyperparameter tuning**, reducing false positives and improving recall.
- Designed interactive dashboards with confusion matrices and ROC curves for clear stakeholder insights.

Personal Finance Tracker with Streamlit Dashboard

- Engineered a finance tracking system with real-time visualizations, helping users cut unnecessary expenses by **15%**.
- Processed and categorized 1,000+ transactions with 99.9% accuracy through input validation and error handling.
- Automated monthly budget alerts and reporting, boosting user engagement by **25%**.

End-to-End ML Deployment with Flask API & Streamlit UI

- Deployed ML models via Flask REST API backend and Streamlit frontend, achieving over **92% accuracy**.
- Automated preprocessing, training, and deployment workflows, improving development efficiency by **40%**.
- Delivered dynamic, interactive UI for real-time predictions with model confidence scoring.

J.P. Morgan Software Engineering Virtual Experience Program – Forage

- Implemented REST APIs and integrated Apache Kafka for real-time data pipelines in a simulated production environment.
- Connected Spring Boot microservices to H2 databases, improving transaction response times.
- Applied Agile best practices and code quality standards, mirroring real-world enterprise development.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** – Amazon Web Services
