

MANIDEEP POLEPALLY

Bellevue, WA, US | (602)-935-6743 | manideepp690@gmail.com | <https://www.linkedin.com/in/manideep18/>

SUMMARY

Data Analyst with 2.5+ Years of experience in Python, SQL, Power BI, and cloud platforms (AWS, Azure, GCP), delivering high-impact analytics at JP Morgan Chase, Dell Technologies, and Cipla. Proven track record in streamlining regulatory reporting by 3 business days, reducing 1.5 TB of redundant storage, and accelerating KPI reporting across 5 business units. Skilled in predictive modeling, anomaly detection, and AI-driven dashboards supporting compliance, fraud detection, and executive decision-making. Recognized for improving team throughput and mentoring analysts to deliver measurable results at scale.

EDUCATION

Arizona State University

Master's in Information Technology

Tempe, AZ
Jan 2023 – Dec 2024

Jawaharlal Nehru Technological University

Bachelor's in Computer Science and Engineering

Hyderabad, India
Aug 2018 – Jun 2022

TECHNICAL SKILLS

Programming and Query Languages

Python, R, SQL, SAS

Data Visualization and Reporting

Power BI, Tableau, Microsoft Excel, Google Analytics

Statistical and Analytical Techniques

A/B Testing, Hypothesis Testing, Linear Regression, Logistic Regression, Time Series Forecasting, Clustering, Cohort Analysis, Predictive Modeling, ANOVA, Chi-square

Databases and Data Warehousing

MySQL, PostgreSQL, Microsoft SQL Server, Oracle, Amazon Redshift, Azure SQL Database

Cloud Platforms

AWS, Microsoft Azure, Google Cloud Platform

DevOps and Version Control

Git, GitHub, Git Lab, Jenkins, Docker

Project and Collaboration Tools

JIRA, Confluence, Agile Methodologies, Scrum, Sprint Planning, UAT Coordination

Soft Skills

Analytical Thinking, Data Storytelling, Stakeholder Communication, Cross-functional Collaboration, Documentation, Mentoring

PROFESSIONAL EXPERIENCE

JP Morgan Chase & Co. | Data Analyst | AZ, USA | Feb 2025 – Current

- Developed and maintained dashboards and SQL reports, visualizing over 120 compliance and performance KPIs and streamlining regulatory reporting by three business days.
- Analyzed and interpreted large financial transaction datasets to identify patterns, trends, and potential risks for real-time decision-making.
- Leveraged AI and machine learning techniques to enhance data analysis, uncover complex patterns, and generate predictive insights for business stakeholders.
- Created intelligent, interactive dashboards incorporating AI-powered features such as natural language queries and anomaly detection for deeper data exploration.
- Collaborated with compliance and risk teams to support fraud detection and deliver actionable insights using advanced data analysis and visualization tools.
- Automated routine data preparation and reporting workflows, improving data accessibility and saving analyst and engineering hours each week.
- Ensured data quality and integrity across reporting systems, facilitating accurate business insights for senior leadership.

Dell Technology | Data Analyst | India | Jul 2021 – Dec 2022

- Analyzed and prepared large volumes of data from diverse sources to ensure accuracy and support business reporting.
- Developed and maintained interactive Power BI dashboards and Excel reports, helping managers track performance and key metrics.
- Conducted data exploration and created visualizations to identify trends and deliver actionable insights for leadership.
- Worked alongside team members to clarify reporting requirements and deliver customized analytics as needed.
- Assisted in improving data quality and modeled data for better forecasting and decision support across business units.
- Designed interactive Power BI dashboards using SQL and Power Query to track operational KPIs across 5 business units, accelerating leadership reporting by 3 business days.
- Aligned with cross-functional teams to migrate legacy datasets into a centralized Azure Data Lake Storage (ADLS) environment, streamlining governance and reducing duplicate storage by 1.5 TB.
- Mentored 2 junior analysts on ETL best practices, SQL optimization, and dashboard design, improving team throughput by 15 additional deliverables per quarter.

Cipla | Data Analyst Intern | India | Jan 2021 – Jun 2021

- Collected, cleaned, and processed large datasets from multiple source systems to ensure data quality and integrity for analytics projects.
- Performed statistical analysis and interpreted data to identify trends, actionable insights, and areas for business improvement.
- Designed and optimized Power BI dashboards and Excel reports to visualize key metrics and support leadership decision-making.
- Collaborated with cross-functional teams to understand data needs and deliver tailored analytical solutions and reports.
- Supported development and optimization of data models to enable more accurate forecasting and business strategies.
