SUMMARY

Supply Chain Analyst with 4+ years of experience specializing in supply chain optimization, lean manufacturing, strategic sourcing, and process automation. Expertise in Python, SQL, Power BI, and UiPath to automate workflows, optimize logistics, and forecast inventory needs and Microsoft Dynamics 365 Supply Chain Management (D365 SCM), including Product Information Management, Sales & Marketing, Accounts Receivable, and Procurement & Sourcing. Proven ability to drive cost reduction, enhance operational efficiency, and improve inventory management through predictive modeling, data-driven insights, and Six Sigma methodologies. Proficient in SAP SCM for end-to-end supply chain management, including vendor coordination, demand planning, and quality assurance. Strong background in executing sustainability initiatives to reduce carbon emissions and improve supply chain sustainability. Experienced in working collaboratively with cross-functional teams, supporting large-scale projects, ensuring regulatory compliance, and delivering actionable insights to guide business decision-making. Adept at providing continuous improvement, lean manufacturing practices, and operational excellence across complex supply chain processes.

TECHNICAL SKILLS

Programming Language:	Python, SQL, R
Data Analytics	Power BI, Tableau, SQL, Python, R, Advanced Excel, Predictive Analytics, Data Visualization, KPI Dashboards, ETL Processes
Supply Chain Management	SAP SCM, Oracle ERP, SAP SCM, Microsoft Dynamics 365 SCM (Product Information Management, Sales & Marketing, Accounts Receivable, Procurement & Sourcing), Demand Planning, Inventory Optimization, Procurement, Vendor Management, Strategic Sourcing, Logistics, Supply Chain Metrics, Sustainability Initiatives, Quality Assurance and Control
Process Optimization	Workflow Automation (UiPath, Automation Anywhere), Lean Manufacturing, Six Sigma, Process Improvement, Value Stream Mapping, Kaizen, 5S, JIT
Technical Skills	AP ERP, Oracle ERP, AWS, Microsoft Azure, UiPath, APIs, Integration Tools, Cloud-Based Analytics Tools, SQL Query Optimization
Project Management	Agile, Scrum, Strategic Planning, Stakeholder Communication, Risk Management, Resource Allocation
Leadership and Soft Skills	Team Collaboration, Leadership, Problem-Solving, Decision-Making, Time Management, Effective Communication, Presentation

PROFESSIONAL EXPERIENCE

LyondellBasell, USA	Feb 2025 –
Present	
Supply Chain Analyst	
- Spearheaded the optimization of supply chain operations using Python, SQL, SAP SCM, and Dynamics 365 SCM, enhancing inventory forecasting and demand planning. - Designed advanced predictive models to mitigate supply chain risks, maintaining a 95% on-time delivery rate during a major refinery decommissioning. - Developed comprehensive product lifecycle models in D365 Product Information Management, enhancing SKU traceability and lifecycle control. - Supported cross-functional sales operations and invoice management using Dynamics 365 Sales & Marketing and Accounts Receivable, reducing cycle time by 15%. - Improved procurement and vendor management processes through Dynamics 365 Procurement & Sourcing and SAP SCM. - Automated reporting and logistics workflows using UiPath, reducing manual efforts by 35% and increasing team productivity. - Partnered with sustainability teams to implement eco-friendly transportation strategies, reducing logistics-related carbon emissions by 10%. - Delivered actionable insights from data analysis to support strategic decisions, driving cost savings and enhanced operational efficiency.	
Intex Technologies	Feb 2020 – Aug 2023
Supply Chain Analyst	
- Developed and implemented advanced time-series forecasting models using Python (ARIMA, Exponential Smoothing), achieving 85% demand prediction accuracy across 500+ SKUs. - Designed and deployed Economic Order Quantity (EOQ) frameworks and dynamic safety stock models, reducing overstock levels by 18% and saving \$1.2M annually in holding costs. - Built and maintained interactive Power BI dashboards to monitor key metrics such as inventory turnover, stock availability, and replenishment schedules, streamlining decision-making and cutting manual reporting efforts by 30%. - Optimized ETL workflows with SQL and Python to process and integrate three years of historical sales and inventory data from SAP ERP, enhancing data accuracy by 25%. - Spearheaded inventory optimization strategies in two regions, achieving a 25% improvement in product availability and successfully scaling the solution across all distribution centers.	

- Collaborated with procurement teams to synchronize purchase orders with demand forecasts, improving supplier fulfillment rates by **15%** and reducing lead times through better **logistics coordination**.
- Conducted detailed ABC classification of **SKUs** to streamline replenishment processes, boosting inventory turnover rates by **22%**.
- Applied Monte Carlo simulations to assess and select optimal replenishment strategies, minimizing **risks** and enhancing the efficiency of **inventory management practices**.

PROJECTS

Procurement Optimization Dashboard

- Built an interactive Power BI dashboard to visualize procurement KPIs including supplier lead times, fulfillment rates, and cost variances.
- Enabled real-time decision-making by connecting SQL-based ETL pipelines to SAP ERP data, reducing procurement cycle time by 20% and saving \$1.2M annually in holding costs.

Research on the Optimizing Project Performance in Manufacturing: An Analytical Approach to Agile Project Management | Capstone Project

- Developed strategies to streamline workflows, improve efficiency, and reduce time-to-market in manufacturing.
- Engaged with stakeholders to validate recommendations and presented findings on integrating Agile into traditional manufacturing processes.

Inventory Forecasting and Automation System

- Designed and deployed a Python-based inventory forecasting model using ARIMA and Exponential Smoothing, achieving 85% accuracy across 500+ SKUs.
- Integrated the model with UiPath to automate weekly replenishment reports, reducing manual effort by 40% and improving stock availability across distribution centers.

EDUCATION

Masters in Information Technology Management

Webster University, San Antonio

Jan 2024 – May 2025

Bachelor of Technology in Mechanical Engineering

Gudlavalleru Engineering College, India

Aug 2017 – Jul 2021
