PROFESSIONAL SUMMARY

- Highly motivated and analytical Data Analyst with strong foundational knowledge in healthcare analytics, data transformation, data analysis, SQL, Python, Tableau, and Power BI.
- Results-driven Data Analyst with strong expertise in healthcare analytics, data transformation, SQL, Python, Power BI, and Tableau.
- Collaborated with stakeholders to reduce Length of Stay (LOS) by optimizing care processes and improving discharge planning.
- Skilled in creating interactive dashboards using Tableau and Power BI with calculated fields, parameters, data blending, and LODs to drive actionable insights.
- Proficient in writing optimized SQL queries, developing ETL pipelines, and performing data cleaning and automation using Python (Pandas, NumPy).
- Adept at collaborating with stakeholders to understand data needs, support data flow improvements, and enhance reporting capabilities through powerful visual tools.

TECHNICAL SKILLS

Category	Skills & Tools
Data Analysis & Tools	SQL, Python, Excel, Power Query
Data Visualization	Tableau, Power BI
Documentation	BRD, FRD, User Stories, Workflow Diagrams
ETL & Data Transformation	Data Mapping, Data Cleaning, Pandas, NumPy
Development Life Cycle	Requirement Gathering, Testing, Deployment, Maintenance

Academic Projects & Hands-on Experience:

Sales Performance Dashboard using Tableau

- Designed an **interactive Tableau dashboard** to analyze **product-wise** and **regional** sales.
- Integrated **Excel** and **SQL Server data sources** for real-time updates.
- Created **calculated fields** for **sales contribution**, **YOY growth**, and **performance metrics**.
- Used **parameters** to toggle between **KPIs** like **sales** and **profit**.

Business Sales Analysis Using Power BI

- Imported and cleaned sales data from Excel and SQL Server using Power Query.
- Created a multi-page Power BI report analyzing product performance, and customer segments.
- Developed DAX measures to calculate key KPIs such as total revenue, and year-over-year growth.
- Used slicers and filters to enable dynamic reporting based on category, region, and sales rep.
- Designed drill-down charts for interactive navigation from overall metrics to product-level insights.

Student Database Management using SQL

- Designed **normalized schema (3NF)** for a student records system.
- Created tables with **primary and foreign key constraints**.
- Wrote advanced **SQL queries** using **JOIN, GROUP BY, HAVING, and CASE Statements**.
- Created **indexes** to improve performance of frequent queries.
- Implemented **triggers** to log changes to **grades and enrollments**.
- Built **user-defined functions (UDFs)** to calculate **GPA** and academic status.
- Ran **audit queries** to ensure **data consistency and integrity**.
- Generated detailed **reports for administration and student services**.

Data Cleaning and Analysis in Python

- **Loaded large datasets** using **Pandas** and **cleaned using transformation logic**.
- Replaced **missing values** using **mean/mode/forward-fill/backward-fill** techniques.
- Created **line plots, scatter plots, and histograms** using **Matplotlib**.
- Used **Seaborn heatmaps** and **correlation matrices** for variable analysis.
- Automated processing with **loops, conditional logic, and mapping functions**.
- Handled exceptions using **try-except blocks** to ensure script robustness.
- Exported **final datasets to CSV and Excel for reporting**.
- **Integrated datasets with Tableau and Power BI** for further visualization.

Professional Experience

Data Governance Analyst Jan 2021 - November 2023

Claro Software Solutions – Hyderabad, India

- Improved key data quality metrics by 20%, reducing data-related errors by 15%, enhancing consistency across - systems.
- Developed SQL queries and optimized data pipelines to improve data quality and reporting accuracy.
- Automated attribute validation reports and visualized attribute health in Tableau dashboards. - Collaborated with cross-functional teams to integrate data feedback, increasing data usability and accessibility.
- 500+ audits to ensure data integrity and compliance with regulatory standards.

Program Trainee Intern April 2020 - Sep 2020

Megha Engineering and Infrastructures Ltd (MEIL) – Bala Nagar, Telangana Hyderabad, India -

Conducted data validation, anomaly detection, and system testing using SQL and MS Excel to streamline operational efficiency by 10%.

- Collaborated with subcontractors to ensure real-time data accuracy, improving reporting efficiency by 12%.
- Analyzed operational data and streamlined processes to enhance data flow and accuracy. • Worked with technical teams to optimize data processes and reporting efficiency. PROJECTS.

Certifications

Introduction to Data Visualization & SQL for Data Science (Coursera).

Internship Certificate at Megha Engineering and Infrastructures Ltd (MEIL).

Education:

Master of Science in Data Analytics

Indiana Wesleyan University- Indiana, USA.

Graduation: December 2025
