PROFILE

Data Engineering professional with 2.5+ years of experience delivering scalable data solutions for global financial institutions. Specializes in optimizing data lakes, managing 10+ TB of data, and deploying containerized pipelines via OpenShift to support real-time processing. Proficient in SQL, Oracle, and PostgreSQL, with a strong focus on building robust analytics infrastructures that meet stringent business and technical requirements.

SKILLS

- **Temenos Tools:** Temenos Data Lake (TDH), Temenos Wealth Management
- **Databases:** Oracle, PostgreSQL, Microsoft SQL Server
- **Data Streaming:** Apache Kafka, Data Event Streaming (DES)
- **Containerization:** OpenShift, Docker
- **Testing Tools:** JIRA, HP ALM
- **Languages:** Python, SQL
- **Reporting:** SQL Server Reporting Services (SSRS)
- **Monitoring:** Grafana
- **Version Control:** Git, GitHub
- **Operating Systems:** Windows, Linux
- **Collaboration:** Knowledge Transfer Sessions, Cross-functional Teams

WORK EXPERIENCE

Tech Mahindra

Software Engineer

Feb 2021 - Aug 2023

Chennai, India

Provided Data Engineering and DES support for Trade & Development Bank of Mongolia.

- Engineered Temenos Data Lake (TDH) and analytics solutions, boosting processing speed by 30% and reducing reporting time by 20% to meet business analytics requirements.
- Optimized TDH pipeline filtering logic to reduce data processing errors by 15% and maintain 99.9% data accuracy across datasets.
- Deployed Data Event Streaming (DES) infrastructure for real-time processing of over 1 million daily transactions, integrating multiple disparate data sources.
- Managed Oracle and PostgreSQL databases containing 10+ TB of banking data, enhancing data accessibility and system reliability.
- Leveraged OpenShift for deployment and orchestration of 15+ data engineering components, improving scalability and resilience.

Tech Mahindra

Software Engineer

Feb 2021 - Aug 2023

Chennai, India

Directed functional testing efforts during the Leadcom_Mizrahi T24 transformation for Bank Mizrahi, consolidating legacy Capital Markets systems and reducing product rollout timelines by 25%.

- Designed and executed over 200 test cases across key modules—including Security Order Capture, Security Master Maintenance, IPOs, and Security Borrowing & Lending—to achieve 100% test coverage.
- Facilitated 10+ knowledge transfer sessions, increasing team efficiency by 20% and reducing new member onboarding time by 30%.
- Earned a performance rating of 4.8/5 for exceptional delivery, stakeholder communication, and documentation practices while utilizing JIRA and HP ALM for test management and defect tracking.

Tech Mahindra

Software Engineer

Feb 2021 - Aug 2023

Chennai, India

Client: Monetary Authority of Macau (AMCM)

Role: Data Engineering and Containerization Support

- Deployed TDH on OpenShift, reducing infrastructure costs by 15% and enabling scalable, containerized data processing. Configured DES configuration to enable real-time data streaming for over 500 transactions per day.
- Built SSRS-based reporting dashboards, providing actionable business intelligence and reducing stakeholder decision time by 25%.
- Enhanced deployment automation using container orchestration tools within OpenShift, boosting deployment efficiency by 40%.

Tech Mahindra

Intern - Software Engineer

Nov 2020 - Feb 2021

Chennai, India

- Executed functional testing and authored test cases for multiple banking modules, enabling on-time delivery of 5+ client projects.
- Gained hands-on experience with JIRA and HP ALM, accelerating defect resolution by 10% and improving test documentation for projects.

EDUCATION

University of North Texas

Master of Science, Computer Science

Aug 2023 - May 2025

PROJECTS

Temenos Data Lake Implementation – Trade & Development Bank of Mongolia

Trade & Development Bank of Mongolia

- Implemented Temenos Data Lake and Temenos Analytics, optimizing data pipelines to improve data processing speed by 30%. Integrated Oracle and PostgreSQL databases to manage 10+ TB of financial data.
- Enabled DES-based real-time data streaming, supporting the processing of daily transactions and reducing data latency by 35% for time-critical banking operations.

Temenos Data Lake on OpenShift – Monetary Authority of Macau (AMCM)

Monetary Authority of Macau (AMCM)

- Implemented TDH on OpenShift, enabling scalable, container-based deployment and increasing data processing capacity by 40%.
- Designed SSRS reports and supported DES installation, enabling real-time data streaming and reducing reporting turnaround time by 25%.

Leadcom_Mizrahi T24 Transformation – Bank Mizrahi, Israel

Bank Mizrahi, Israel

Israel

- Migrated legacy Capital Markets applications into a unified Temenos T24-based solution.
- Authored 200+ test cases and led functional testing across critical modules including Security Order Capture, IPOs, and Security Borrowing & Lending, achieving 100% test coverage.
- Conducted 10+ knowledge transfer sessions, improving cross-functional team onboarding speed by 30%.

CERTIFICATIONS

- Certified Tester ISTQB Foundation Level (CTFL)
